

Where Are You on the Micro Focus ART Roadmap?

4.3	4.4	4.5	5.1	5.2	5.3	5.40.2	5.40.4	5.40.6	5.40.8
<p>Publish PowerPoint 2007 presentations to PDF</p> <p>Mask confidential information (for example, name, personnel number) that displays in captured screenshots</p> <p>Modify callouts and screen size from one view</p> <p>Use JavaScript for course and simulation output to minimize use of Flash</p> <p>Choose which specific pages to import from a course</p> <p>Choose which specific steps to import from a document</p> <p>Create specific assessment feedback for each page</p> <p>Add .WAV or MP3 files to course pages</p> <p>Add transcripts for simulation steps</p> <p>Create informational steps that require no specific action to progress in a published simulation</p>	<p>Generate guided help to assist users in a live environment (included in default Show-Me GUI)</p> <p>View published output documents, simulations, and courses, and the end user website – on the iPad</p> <p>Support 508 Accessibility with keyboard-accessible simulation and course outputs</p> <p>Record audio narration directly within the client generated as WAV files or select an existing sound file. When using ART in combination with LAME, ART will generate MP3 files.</p> <p>Apply newly-created template sections to existing documents</p> <p>Record SAP NetWeaver Business Client (NWBC), Dynamic Adobe Forms, and most 64-bit Windows and web-based applications</p>	<p>Include local video files and Youtube movies from WWW (copy embedded code) in course pages</p> <p>Assess user understanding via Drag and Drop Sequencing and Hotspot Single course stencils</p> <p>Add titles, icons and images to course hotspots</p> <p>Support for .gif animated files and other image enhancements</p> <p>Insert mode-specific simulation notes</p> <p>Control individual note and action sequence timing & duration in simulations</p> <p>Flag all non-text elements in .udc and .ulc files for localization in translated versions</p> <p>Configure which file properties to include in XLIFF export</p> <p>Support SAP Solution Manager 7.1</p> <p>Style Field Description and generic tables</p>	<p>Add notes or audio during the recording process</p> <p>Utilize text-to-speech functionality</p> <p>Support and record Microsoft Windows 8 (Desktop), Internet Explorer 10, SAP Windows GUI 7.30, SAP NWBC 4.0, Static and Dynamic Adobe Interactive Forms rendered in Adobe Reader or Acrobat XI, and PeopleSoft 9.1 (32- and 64-bit)</p> <p>Create, display, and manage Arabic content; published content is displayed in a right-to-left (RTL) format.</p>	<p>Take advantage of enhanced, more usable interfaces for document, simulation, course editors, and recorder preview pane</p> <p>Deliver enhanced published output</p> <p>View content on iOS, Android, and Windows tablets</p> <p>Leverage Auto Save for automatic saving of documents and simulations</p> <p>Support SAP GUI right-to-left when recording</p> <p>Form upgrades to Windows Presentation Foundation (WPF) to support accessibility requirements for keyboard navigation, screen readers, etc.</p>	<p>Add animated transitions to course pages</p> <p>Add animations to objects on course pages</p> <p>Customize course page layouts with flexible stencils</p> <p>Embed web videos from third-party sites into course pages</p> <p>Batch update embedded simulations in courses</p> <p>Add alternate text to images and videos in courses to support use of screen readers</p> <p>Support for recording Microsoft Windows 10</p> <p>Support for recording SAP Business Client 6</p>	<p>New video output MP4/WMV option for a Show-Me simulation including voice narration</p> <p>New Procedure Table output option for a step-by-step recording: 3- column layout format for condensed output (HTML or PDF format)</p> <p>Procedure Table: Customize the size of the thumbnail for the Procedure Table output</p> <p>New template feature: Ability to make Document Properties required for authors.</p> <p>New template feature: Ability to hide Field Description table for a type action</p>	<p>Removed all Flash dependencies</p> <p>ART records by default voice narration as MP3 audio files which can be played natively by most browsers</p> <p>When using the older Windows 7 platform, LAME files are required to convert WAV audio files to MP3</p> <p>Includes optimized Recording profile for Micro Focus Silk Central</p>	<p>Fixes for Removing remaining Flash dependencies</p> <p>Capturing steps Microfocus Silk Central</p> <p>Ability to recognize SAP HTML GUI target application and capture help context correctly</p>	<p>Fixes for: Unable to edit step text for multiple steps (D-18760) (D-18760)</p> <p>Cannot see checkboxes when selecting translate (D-13431)</p> <p>ART client crashes when attempting to advance audio in a step with no audio (D-14756)</p> <p>Branched steps do not display correctly in MP4 output (D-15044)</p> <p>ART client crashes with "Out of Memory" issues while editing steps in simulation view (D-17995)</p> <p>Cannot add audio to UDC file (D-17997)</p> <p>Courses with image hotspots fail to publish to PDF and Word formats (D-17568)</p> <p>Course assessment feedback "Show my answer" link for hotspot questions</p>

<p>View steps with missing information from the step pane</p> <p>View the properties form of an object by double-clicking</p> <p>Support 508 Accessibility with: skip links, a logical tab order, and keyboard-accessible screen Elements</p>	<p>Support and record Safari 5, Internet Explorer 9, and Firefox 4.0 browsers</p>	<p>Insert notes in Field Description table rows</p> <p>Record 64-bit Java applications and 64-bit Excel</p> <p>Support and record SAP Portal based on NW 7.3, SAP GUI 7.30, NWBC 3.5 and Business One (B1)</p>							<p>not displaying correctly (D-16418)</p>
