Resolved Issues

Access Manager 5.0.1.2 resolves the following issues:

Component	Bug ID	Issue
Security	NA	This release contains the fix for the following log4j vulnerability: <ul style="list-style-type: none"> ◆ CVE-2021-44228 ◆ CVE-2021-45046
Access Gateway	413081	After installing the secondary Access Manager Appliance, Access Gateway is not added to the existing cluster before the migration.

Updates for Dependent Components

This release includes log4j 2.17.0.

Supported Migration Path

To migrate to Access Manager 5.0.1.2, you must be on one of the following versions of Access Manager:

- ◆ 4.5 Service Pack 2
- ◆ 4.5 Service Pack 3
- ◆ 4.5 Service Pack 4
- ◆ 4.5 Service Pack 5

IMPORTANT: Apply this release if you want to migrate Access Manager from version 4.5.x to 5.0.x. If you are on version 5.0 Service Pack 1, do not apply the 5.0.1.2 release. Instead, apply the patch release for the Log4j vulnerability fix. For more information, see [NetIQ Access Manager Patch for Log4j Vulnerability Release Notes](#).

Installing or Migrating to Access Manager Appliance 5.0.1.2

Table 1 Files Available for Access Manager Appliance 5.0.1.2

Filename	Description
AM_45X_appcore.tar.gz	Contains the appcore.jar file for Access Manager Appliance 4.5.2, 4.5.3, 4.5.4, and 4.5.5 releases.
AM_5012_AccessManagerAppliance.iso	Contains the Access Manager Appliance ISO file.

- ◆ [“Migration” on page 3](#)
- ◆ [“Post-Migration” on page 3](#)

Pre-migration

NOTE: A fresh installation of Access Manager Appliance 5.0.1.2 does not require the following procedure. Use the procedure only for the migration.

- 1 Stop the Administration Console service.
- 2 Replace the appcore.file at /opt/novell/nam/adminconsole/webapps/roma/WEB-INF/lib in Administration Console [Primary Access Manager Appliance 4.5.x] for the release that you want to migrate from, such as Access Manager 4.5.2, 4.5.3, 4.5.4, or 4.5.5.

NOTE: You must replace the appcore.jar only if Analytics Server is installed in Access Manager.

- 3 Restart the Administration Console service.
- 4 Install Access Manager Appliance 5.0.1.2 as a secondary node.

Migration

Procure the license key from the [Software License and Download](#) portal to register to the 5.0.1.2 channel.

The following are the changes for Access Manager Appliance installation and migration:

- ◆ Access Manager Appliance installation is a two-step process.
 1. Deploying the Access Manager Appliance ISO. For more information, see [Installation Using the Access Manager Appliance ISO](#).
 2. Configuring Access Manager Appliance using Common Framework Appliance (CAF) user interface. For more information, see [Configure Access Manager Appliance Using Common Appliance Framework User Interface](#).

NOTE: You must be on VMWare ESXi 6.0 version or later to deploy Access Manager Appliance.

Post-Migration

After migration, you can install up to three secondary Access Manager Appliance nodes.

For more information, see [To Migrate Access Manager Appliance](#) in the *NetIQ Access Manager Appliance 5.0 Installation and Upgrade Guide*.

Verifying Version Number After Migrating to 5.0.1.2

After upgrading to Access Manager Appliance 5.0.1.2, verify that the version number is indicated as **5.0.1.2-12**. To verify the version number, perform the following steps:

- 1 In Administration Console Dashboard, click **Troubleshooting > Version**.
- 2 Verify that the **Version** field lists **5.0.1.2-12**.
