Release Notes for the S8000 - SIEM Storage Appliance

This document contains information about the 25.3 version of the S8000 appliance.

For specific product issues, contact [Open Text Customer Care](#).

What's New

The S8000 - SIEM Storage Appliance provides on-premises object storage for the DB8400 - SIEM Database Appliance in your SIEM Platform environment. The S8000 - SIEM Storage Appliance is a scalable storage platform based on the most stable version of the Ceph storage system, with a Ceph management platform, deployment utilities, and support services.

An S8000 - SIEM Storage Appliance deployment must include a minimum of four S8000 appliances set up as a cluster.

Known Issues

OCTCR77JK4810852 — Administrators cannot add custom certificates

The S8000 - SIEM Storage Appliance supports only self-signed certificates. To add custom certificates, administrators must contact Open Text customer support.

Downloading Your Factory Restore Image Files

While your S8000 appliances come pre-installed with their software, you might require to return them to their factory settings for a number of reasons. In such case, obtain the restore image file using the information below.

OpenText provides a digital public key to enable you to verify that the signed software you received is indeed from OpenText and has not been manipulated in any way by a third party.

To download your upgrade files, visit:

<https://www.microfocus.com/en-us/support/downloads/>

Appliance	Files to download
S8000	SIEM-R7615-S8000-RH96-FIPS-STIG-CIS2-25.3-1.iso

Downloading and Verifying the Installation Files

1. Log in to the host where you want to begin the installation process.
2. Change to the directory where you want to download the installer files.
3. Download all the necessary product installer files from the [OpenText Downloads website](#) along with their associated signature files (*.sig).

Evolving security needs imply the renewal of certificates for the signature verification procedure. To ensure a successful verification of your product signature, download the latest public keys file before proceeding with the verification process (step 1 of the Get the Public Keys procedure).

OpenText provides a digital public key that is used to verify that the software you downloaded from the OpenText software entitlement site is indeed from OpenText and has not been tampered with by a third party. For more information and instructions on validating the downloaded software, visit the [Micro Focus Code Signing site](#). If you discover a file does not match its corresponding signature (.sig), attempt the download again in case there was a file transfer error. If the problem persists, please contact OpenText Customer Support.

4. Begin the installation, following the instructions in [Restoring an Appliance to Factory Settings](#).
