Confidential computer software. Valid license from Micro Focus required for possession, use or copying. The information contained herein is subject to change without notice.

The only warranties for Micro Focus products and services are set forth in the express warranty statements accompanying such products and services. Nothing herein should be construed as constituting an additional warranty. Micro Focus shall not be liable for technical or editorial errors or omissions contained herein.

No portion of this product's documentation may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopying, recording, or information storage and retrieval systems, for any purpose other than the purchaser's internal use, without the express written permission of Micro Focus.

Notwithstanding anything to the contrary in your license agreement for Micro Focus ArcSight software, you may reverse engineer and modify certain open source components of the software in accordance with the license terms for those particular components. See below for the applicable terms.

U.S. Governmental Rights. For purposes of your license to Micro Focus ArcSight software, "commercial computer software" is defined at FAR 2.101. If acquired by or on behalf of a civilian agency, the U.S. Government acquires this commercial computer software and/or commercial computer software documentation and other technical data subject to the terms of the Agreement as specified in 48 C.F.R. 12.212 (Computer Software) and 12.211 (Technical Data) of the Federal Acquisition Regulation ("FAR") and its successors. If acquired by or on behalf of any agency within the Department of Defense ("DOD"), the U.S. Government acquires this commercial computer software and/or commercial computer software documentation subject to the terms of the Agreement as specified in 48 C.F.R. 227.7202-3 of the DOD FAR Supplement ("DFARS") and its successors. This U.S. Government Rights Section 18.11 is in lieu of, and supersedes, any other FAR, DFARS, or other clause or provision that addresses government rights in computer software or technical data.

For information about legal notices, trademarks, disclaimers, warranties, export and other use restrictions, U.S. Government rights, patent policy, and FIPS compliance, see <https://www.microfocus.com/about/legal/>.

Chapter 1: Welcome to the Quick Start Guide for ArcSight Classic MSSP Usage Reports

Micro Focus provides a pay-per-use program for Managed Security Service Providers (MSSPs). This program offers our Partners a more affordable "pay as you go" option instead of maintaining a perpetual license that requires a large initial investment.

To help you calculate daily and monthly average EPS (events per second) usage, we provide reports that you can add to the following products:

- [ArcSight ESM](#)
- [ArcSight Logger](#)

This quick start guide provides instructions on how to add and run the report in your products, as well as guidance for submitting your monthly reports to Micro Focus.

Chapter 2: ArcSight ESM

The **ArcSight Classic MSSP Usage Reports** display daily average EPS metrics about events that have been received from ArcSight SmartConnectors during a specified date range.

The MSSP Reports package contains the following resources:

- **/All Rules/ArcSight Solutions/MSSP Usage Report/Event Counts Detected**
Writes event counts to an active list when triggered by agent :050 events.
- **/All Active Lists/ArcSight Solutions/MSSP Usage Report/Events Count**
Stores event counts for each Partner per day.
- **/All Reports/ArcSight Solutions/MSSP Usage Report/Daily EPS Usage for All Customers**
Displays the daily average EPS history for all Partners for the specified time period.
- **/All Reports/ArcSight Solutions/MSSP Usage Report/ArcSight Classic MSSP Program Usage Report**
Displays the aggregated daily average of EPS. The aggregated value represents the combined average of all days within the specified time period.

You can export this report for submission to Micro Focus. In accordance with your MSSP contract with Micro Focus, email the report to msspcyberres@microfocus.com. If you need assistance, [contact Support](#).

ESM generates the EPS usage reports from event counts in the active list, which uses real-time rules. As a result, the report will not include data older than the date that you installed the package.

Supported Platforms

You can run the reports on the following versions of ArcSight ESM:

- 7.6
- 7.5
- 7.4
- 7.3
- 7.2
- 7.0
- 6.11

Installing the ArcSight Classic MSSP Program Usage Reports for ESM

The installer file is available from the [Micro Focus Marketplace](#).

1. Download the ArcSight_Classic_MSSP_Program_Usage_Reports_1.1.zip file from the Marketplace to a secure network location.
2. Extract the ArcSight_Classic_MSSP_Program_Usage_Reports_1.1.arb installer file.
3. Log in to the ArcSight Console as an administrator.
4. On the Packages tab of the Navigator, click Import to import and install the ArcSight_Classic_MSSP_Program_Usage_Reports_1.1.arb package.
5. On the Packages tab of the Navigator, go to **All Packages > ArcSight Solutions > MSSP Usage Report**.
6. Open the MSSP Reports package.

Running the ArcSight Classic MSSP Program Usage Reports for ESM

For your convenience, you can configure ESM to run the **ArcSight Classic MSSP Program Usage Report** each month, then automatically email the results to Micro Focus at msspcyberres@microfocus.com. If you need assistance, [contact Support](#).

1. Log in to the ArcSight Console.
2. Click Reports > Navigator > ArcSight Solutions > ArcSight Classic MSSP Program Usage Reports.
3. (Conditional) To run the monthly, aggregated usage report, select ArcSight Classic MSSP Program Usage Report.
4. (Conditional) To check daily EPS usage, select Daily EPS Usage for All Customers.
5. Configure the report's settings.
6. Run the report.

ESM generates the report from event counts in the active list, which uses real-time rules. As a result, the report will not include data older than the date that you installed the package.

7. Export the report as a PDF file.
8. Submit the report to Micro Focus.

For more information, see the following guides:

- ["Running and Viewing Reports"](#) in the *ArcSight Command Center User's Guide for ESM*
- ["Running a Report"](#) in the *ArcSight Console User's Guide for ESM*

Chapter 3: ArcSight Logger

MSSP usage reporting for Logger is built into the product.

The Classic MSSP Pay-Per-Use License requires Partners to provide ArcSight Data Platform (ADP) License Usage reports.

For information about standalone Logger ADP license usage, see [Logger Standalone GB per day License](#).

For information about ADP license usage for a Logger that is managed by ArcMC, see [GB Managed by ArcMC License Usage](#) and [ADP License Usage for the Last 30 Days](#).

Note: Both reports provide a limited look at usage, making timely report submission a priority.

Send Documentation Feedback

If you have comments about this document, you can [contact the documentation team](#) by email. If an email client is configured on this computer, click the link above and an email window opens with the following information in the subject line:

Feedback on Quick Start Guide for ArcSight Classic MSSP Usage Reports

Just add your feedback to the email and click send.

If no email client is available, copy the information above to a new message in a web mail client, and send your feedback to Documentation-Feedback@microfocus.com.

We appreciate your feedback!
