Technical Requirements for SmartConnectors

OpenText ArcSight Security products are a next-generation of data collection and storage engine that unifies log data collection, storage, and security data management in a scalable, high-performance software or appliance solution.

This document discusses operating system, appliance, browser, and other support details for ArcSight SmartConnector and select your ArcSight product from the list presented.

Intended Audience

This guide provides information for IT administrators who are responsible for managing the ArcSight software and its environment.

Additional Documentation

The ArcSight SmartConnector documentation library includes the following resources:

- [Installation and User Guide for SmartConnectors](#), which provides detailed information about installing SmartConnectors.
- [Configuration Guides for ArcSight SmartConnectors](#), which provides information about configuring SmartConnectors to collect events from different sources.
- [Configuration Guide for SmartConnector Load Balancer](#), which provides detailed information about installing Load Balancer.
- [ArcSight Customer Support - Help with SmartConnector and Parser Updates](#), which provides detailed information about customer support.
- [SmartConnector Recommendations for Windows Event Log Collection](#), which provides detailed information about SmartConnector recommendation for windows log collection.
- [Installation Guide for WiNC on Connector Hosting Appliance](#), which provides detailed information about installing WiNC on CHA.
- [Setup Guide for Format Preserving Encryption Environment](#), which provides detailed information about preserving encryption environment.
- [Performance Tuning Guide for SmartConnector](#), which provides detailed information about the performance tuning for SmartConnectors.

For the most recent version of this guide and other ArcSight SmartConnector documentation resources, visit the [documentation site for ArcSight SmartConnectors 8.4](#).

Contact Information

We want to hear your comments and suggestions about this book and the other documentation included with this product. You can use the comment on this topic link at the

bottom of each page of the online documentation, or send an email to MFI-Documentation-Feedback@opentext.com.

For specific product issues, [contact Open Text Support for Micro Focus products](#).

Product and OS Support Policies

Product Support Policy

For specific support information regarding your ArcSight product and release, see the [Product Support Lifecycle Policy](#) and select your ArcSight product from the list presented.

Operating System Support Policy

- A *certified* operating system means that platform support has been tested and certified with regression tests for the SmartConnector version. ArcSight will accept support calls and address bugs for installations on the certified platform. SmartConnector runs only on the platforms that are applicable to the connector type and specific device type. For example, the SmartConnector for Microsoft Windows Event Log runs on Windows platforms only.
- A *supported* operating system means that ArcSight has performed a general run-through to verify that the platform support works as expected, ArcSight will accept support calls and address bugs for installations.

Support for Operating System Minor Releases Hosting ArcSight Infrastructure Software

OpenText recommends the fully tested and certified platforms described in the product documentation. However, customers running on other platforms or with configurations that are not certified will be supported until the point OpenText determines that the root cause is the platform or configuration that was not certified. Issues that can be reproduced on the certified platforms will be prioritized and fixed according to standard defect-handling policies.

Vendor-supported and newly-patched operating system instances hosting ArcSight software or new operating system minor releases (for example: from RHEL 7.6 to RHEL 7.7) that are not explicitly defined in the Technical Specifications document are now approved by the ArcSight Product Management team for ArcSight support even without certified testing for the ArcSight components on the new minor or patched release. OpenText will support ArcSight products and components running on these upgraded OS releases on a 'best effort' basis.

Should an issue involving a new OS minor release and an ArcSight component be incapable of being fixed or worked around in a timely manner, the customer may be asked to revert to a certified OS release listed in the Technical Specifications until the problem can be fixed or the newer OS minor release level has passed product certification testing.

Note: Major version changes, for example, RHEL 7.x to 8.0, are explicitly not supported without a certification by ArcSight..

Compatibility Matrix of SmartConnector

Version	Support	Operating Systems	ArcSight Product Versions	Upgrade Path
8.4.3	Certified	<ul style="list-style-type: none"> • RHEL 8.6, 8.8, 9.0, 9.1, and 9.2 • Rocky Linux 8.6, and 8.8 • CentOS Linux 7.9 • Microsoft Windows Server 2022 Standard 64-bit • Microsoft Windows Server 2019 Standard 64-bit • SUSE Linux Enterprise Server (SLES) 15 SP 2 	<ul style="list-style-type: none"> • ArcMC 3.2.1 • ESM 7.6.5 • Logger 7.3.0 P1 • Transformation Hub 3.7.1 	<ul style="list-style-type: none"> • 8.3 latest patches to 8.4.3

Load Balancer Requirements

The following section describes the software and hardware requirements for Load Balancer.

Hardware and Software Requirements

Category	Requirement
Hardware	<ul style="list-style-type: none">• CPU: 2 CPU X 4 Cores each (2 x Intel E5620, quad core, 2.4 Ghz or better)• RAM: 16 GB• Disk: 60 GB• Number of network interfaces: 1 Dedicated Gig Ethernet interface
Software	<ul style="list-style-type: none">• Supported:<ul style="list-style-type: none">◦ Red Hat Enterprise Linux 7.x.x and 8.x.x (64-bit only)◦ Rocky Linux 8.6• Certified:<ul style="list-style-type: none">◦ Red Hat Enterprise Linux 8.x.x and 9.x.x (64-bit only)◦ Rocky Linux 8.8
ArcSight SmartConnectors	<ul style="list-style-type: none">• File-based or Syslog SmartConnectors version 7.12.X or later

Important

- Server must be dedicated to Load Balancer. No other applications must be installed on the server.
- For high availability, there must be two separate servers. One for the active or primary Load Balancer and another for standby or secondary Load Balancer. Both the servers must be in the same network as they must share one virtual IP address.
- Use the standard hardware required to deploy more than one SmartConnector to create the pool of SmartConnectors. For more information, see the SmartConnector documentation.

Certified And Supported SmartConnectors and Their Releases

The following table lists the applications and their supported and certified versions:

Note: The device versions currently documented here are versions that have been tested by ArcSight Quality Assurance. These are generally referred to as certified versions. For device releases that fall in between certified major versions, it has been our experience that vendors typically do not make significant changes to the event generation mechanism. Oftentimes, there are few, if any, significant changes even between major versions to the event logs. Therefore, we consider minor releases to be supported and major versions may be supported depending on the types of changes made to the latest version. Where possible, minor adjustments can be accommodated by parser overrides as needed. For example, Extreme Networks Dragon Export Tool versions 7.4 and 8.0 have been certified; Dragon Export Tool version 7.5 is also supported.

UNIX OS Syslog Updated 8.4.4!	UNIX OS	<ul style="list-style-type: none"> • Oracle Solaris 10 and 11 64-bit (SPARC) • Oracle Solaris 11 64-bit (x86_64) • HP-UX 10 and 11 (64-bit) • Red Hat Linux Enterprise 6.7.0, 7.0.0, 7.1.0, 7.2.0, 7.3.0, 7.4.0, 8.0.0, 8.1.0, 8.2.0, 8.3.0 (64-bit), 8.4, 8.5, 8.6, 9.0, 9.1, and 9.2 • IBM AIX 7.1.0 (64-bit) • Linux Kernel-based Virtual Machine (KVM) 9.0 	PDF	January 2024

VarySys

SmartConnector For	Supported Devices/Applications/Log Sources	Certified Version	PDF Download	Last Updated On
VarySys PacketAlarm IPS Syslog¹	PacketAlarm	4.6.0	PDF	October 2023

VMware

SmartConnector For	Supported Devices/Applications/Log Sources	Certified Version	PDF Download	Last Updated On
VMware Carbon Black EDR New!	VMware Carbon Black EDR SaaS Solution	March 2023	PDF	January 2024
VMware ESXi Server Syslog	VMware ESXi Server	5.5.0, 6.0.0, 6.5.0, and 7.0	PDF	October 2023
VMware Web Services ¹	VMware Web Services vCenter	5.5.0, 6.0.0, and 6.5.0 are supported on ESXi servers 5.5.0, 6.0.0, and 6.5.0	PDF	October 2023

Vormetric

SmartConnector For	Supported Devices/Applications/Log Sources	Certified Version	PDF Download	Last Updated On
Vormetric CoreGuard Syslog ¹	Vormetric CoreGuard	1.0.0	PDF	October 2023

Zeek

SmartConnector For	Supported Devices/Applications/Log Sources	Certified Version	PDF Download	Last Updated On
Zeek IDS NG File ¹	Bro IDS	2.1.0 and 2.3.0	PDF	October 2023
	Zeek	3.1.3		

Note: ¹ This log source is also supported through the [Amazon S3 SmartConnector](#). However, you need to make sure that the logs from these log sources are made available in the S3 bucket.

Note: For information about additional devices supported through Flex Connector, visit [Marketplace](#), then select **All Categories > ArcSight > ArcSight FlexConnectors**.

Send Documentation Feedback

If you have comments about this document, you can [contact the documentation team](#) by email. If an email client is configured on this computer, click the link above and an email window opens with the following information in the subject line:

Feedback on Technical Requirements (SmartConnectors 8.4.3)

Just add your feedback to the email and click send.

If no email client is available, copy the information above to a new message in a web mail client, and send your feedback to MFI-Documentation-Feedback@opentext.com.

We appreciate your feedback!
