

ArcSight Content AUP and Context Update Files

Software Version: 8.4.x

New Download Process

Document Release Date: 2023

Software Release Date: 2023

Downloading Content and Context Files

Starting October 2021, the Content AUP and Context update files will no longer be available for download from ArcSight Content Subscription Entitlement SKU as Patch file. The standalone ArcSight Content Subscription Entitlement SKU SB-AC600 will be dropped for further use.

Following are the new download locations for Content AUP and Context Update files:

- **Content AUP (Categorization):** Available with ArcSight SmartConnector Software License SKU.
- **Context Updates:** Available with ArcSight ESM and ArcSight Logger License SKUs.

The content AUP file is named *ArcSight-`<versionnumber>`-ConnectorContent.aup* and contains the device signature and other categorization changes that can be applied to systems where SmartConnector is installed.

The context updates are part of the *ArcSight_Context_Update_<month>_<year>.<buildno>.zip* file, which contains the CVE vulnerability signature and geo location details that are consumed by ArcSight ESM and ArcSight Logger.

New versions of Content AUP and Context update files are released through Patch manager monthly, or up to two times a month. If two releases are made in a single month, they will be designated as R1 and R2. The latest release always supersedes all other previous releases.

New Download Process in Software Licenses and Downloads Portal

- ArcSight Content Subscription SKU will be dropped for further use.
- Content AUP is delivered as Patch and available through ArcSight SmartConnectors License SKU, once every two weeks. Customers who are still on legacy ArcSight product structure that have not migrated to ArcSight Standard Edition license structure may obtain the AUP updates through most current version of core product downloads.
- Context Update is delivered through ESM and Logger SKUs, once every two weeks.
- ArcSight SmartConnectors bundle SKU will also be available as the child SKU of Sentinel SKU.
