CIP for FISMA 6.0

Compliance Insight Package for the Federal Information Security Management Act (CIP for FISMA) v6.0 provides an essential foundation for your FISMA compliance program. The CIP for FISMA uses ArcSight™ ESM features, such as event categorization, threat prioritization, trends, workflow, and case management, to easily identify and address activities and anomalies involving systems that are subject to FISMA compliance.

Release Contents

The files included in this release are:

File name	Description
ESM_FISMA_Solution_ReleaseNotes_6.0.pdf	This document. Product descriptions and open issues
ESM_FISMA_SolutionsGuide_6.0.pdf	<i>ArcSight ESM Compliance Insight Package for FISMA 6.0 Solutions Guide</i> Product architecture, installation, configuration, and operation instructions with a description of product contents.
ArcSight-ComplianceInsightPackage-FISMA.6.0.0004.arb	Installable package bundle for all operating systems. Contains all the resources of the Compliance Insight Package for FISMA. Note: If you use Internet Explorer to download the ARB file, it may convert the ARB file to a ZIP file. If this occurs, rename the ZIP file back to an ARB file before importing into ArcSight ESM.

Installing CIP for FISMA 6.0

The Compliance Insight Package for FISMA (CIP for FISMA) is supported on the following versions of ESM:

- ESM 6.8c
- ESM 6.9.1c
- ESM 6.11.0
- ESM 7.0

CIP for FISMA 6.0 is for fresh installation only.

Complete installation and configuration instructions for the Compliance Insight Package for FISMA are located in the document called *ArcSight ESM Solution Guide Compliance Insight Package FISMA 6.0* (ESM_FISMA_SolutionGuide_6.0.pdf).

Performance Impact of CIP for FISMA

ArcSight ESM Solution Packages contain data monitors and rules that can place an additional load on the ArcSight ESM Manager, which may impact the ArcSight ESM Manager performance. If your ESM system is operating at an average event per second (EPS) rate that has maximized the CPU utilization, you might experience a reduced average EPS rate after installing the CIP for FISMA package. If this performance impact occurs, ArcSight recommends that you disable unneeded data monitors and rules to reduce the load on the Manager.

Open Issues in this Release

The following issue is open in this release.

None at this time

Send Documentation Feedback

If you have comments about this document, you can [contact the documentation team](#) by email. If an email client is configured on this computer, click the link above and an email window opens with the following information in the subject line:

Feedback on Release Notes (ESM CIP for FISMA ESM 6.8c, 6.9.1c, or 6.11.0, 7.0)

Just add your feedback to the email and click send.

If no email client is available, copy the information above to a new message in a web mail client, and send your feedback to arc-doc@hpe.com.

We appreciate your feedback!
