Logger Compliance Insight Package for NERC

ArcSight Logger is a storage solution optimized for extremely high event throughout. An *event* is a time-stamped log entry, either sent by protocols such as syslog, or appended to a log file. Logger receives and stores events, and can optionally forward selected events.

Logger Compliance Insight Package (CIP) for NERC is a stand-alone package that is installed on ArcSight Logger, and leverages ArcSight Logger's litigation-quality, long-term repository of log and event data to facilitate NERC compliance using ArcSight Logger's reporting, alerting, and dashboard capability.

> Note: Version 1.01 of ArcSight Logger CIP for NERC provides a new software installer component, which enables you to install the package on ArcSight Logger 6.6 or later. For information about supported versions of ArcSight Logger, see "Minimum Requirements" below.

These release notes cover these topics:
