What is New?

The following section outlines the fix for a critical severity security issue found in Change Guardian bundled Apache ActiveMQ library (CVE-2023-46604), specifically the OpenWire Module. (Defect 1069005)

Vulnerability Fix

A security issue was found in Apache ActiveMQ, specifically the OpenWire Module. Apache ActiveMQ library is bundled in with Change Guardian. The issue may allow a remote malicious user to run arbitrary shell commands by manipulating serialized class types in the OpenWire protocol and exploit the broker or client. This release addresses the critical security vulnerability in the Apache ActiveMQ library (CVE-2023-46604). The Apache ActiveMQ library has been upgraded to version 5.16.7 which fixed the issue.

Fix: Upgrade Change Guardian server to version 6.3.0.2 which is bundled with Apache ActiveMQ library version 5.16.7.

System Requirements

For more information about hardware requirements, supported operating systems, and browsers, see the [System Requirements for Change Guardian 6.3](#).

Installing Change Guardian 6.3.0.2

The steps for the installation of 6.3.0.2 are same as that of 6.3. For more information about the installation procedure, see [Change Guardian Installation and Administration Guide](#).

Upgrading to Change Guardian 6.3.0.2

You can upgrade to Change Guardian 6.3.0.2 from Change Guardian 6.3 or later. For information about the upgrade procedure, see [Upgrading Change Guardian in the Change Guardian Installation and Administration Guide](#).
