

Release Notes

Version 26.2

1 - Platform and System Requirements

1.1 - .NET and .NET Framework

All components using .NET target either the .NET 10.0 runtime or .NET Framework 4.8. Depending on the component, it may require either the Desktop or ASP.NET runtime.

Each File Reporter package installer will install any necessary .NET runtime or .NET Framework. In cases where Internet access is not available, you must install the required .NET runtime as indicated below.

.NET Version	Components
<ul style="list-style-type: none"> .NET Framework 4.8 	<ul style="list-style-type: none"> Report Generator (hosted with Engine service) Web Application
<ul style="list-style-type: none"> .NET 10.0 Desktop Runtime (64-bit) 	<ul style="list-style-type: none"> Configuration Utilities (Agents, Engine, etc.) AgentFS Agent365 ManagerFC AgentFC Report Designer Report Viewer Data Analytics

NOTE: Updates to .NET Framework or .NET runtime may require a reboot of the operating system to complete.

1.2 - Supported Platforms

Component	Supported Operating System	Notes
<ul style="list-style-type: none"> Engine / Web 	<ul style="list-style-type: none"> Windows Server 2025 	

1 - Platform and System Requirements

Component	Supported Operating System	Notes
<ul style="list-style-type: none"> • ManagerFC • AgentFC • Agent365 	<ul style="list-style-type: none"> • Windows Server 2022 	
<ul style="list-style-type: none"> • AgentFS 	<ul style="list-style-type: none"> • Windows Server 2025 • Windows Server 2022 • Windows Server 2019 	Other servers such as Windows 2012 R2 and supported NAS devices that host Windows shares are supported via agent proxy access.
<ul style="list-style-type: none"> • Report Designer • Data Analytics Client • Report Viewer 	<ul style="list-style-type: none"> • Windows 11 • Windows Server 2025 • Windows Server 2022 	

1.3 - Supported Databases

The following database versions and editions are supported with this release:

1.3.1 - Microsoft SQL Server

- SQL Server 2025
- SQL Server 2022

The following SQL Server Editions are supported:

- Standard
- Enterprise

SQL Server is supported on either Windows Server or Linux platforms where available.

1.3.2 - PostgreSQL

- PostgreSQL 18
- PostgreSQL 17
- PostgreSQL 16

1.4 - Supported Web Browsers

File Reporter supports the latest release of each of the following desktop browsers:

- Chrome
- Firefox
- Microsoft Edge

2 - Required Product Updates

2.1 - Product Upgrades

File Reporter 26.2 only supports direct upgrades from the following previous releases:

- File Reporter 25.2 or later

To upgrade from an earlier release do one of the following:

- Upgrade to a version listed above then upgrade to File Reporter 26.2
- Contact support at support@filereportersupport.com as direct upgrades from some older versions may be possible

2.2 - Required Component Updates

File Reporter 26.2 requires all components to be upgraded to version 26.2 except for the following which may run version 25.2 or later for this release:

- AgentFS

3 - New Features and Updates

3.1 - File Reporter 26.2

3.1.1 - Third-Party Components

- OpenSSL updated to version 3.6
- Many third-party components have been updated to recent versions, providing recent vendor updates and security fixes.

3.1.2 - .NET 10.0

All components using .NET have been updated to .NET 9.0.

Components using legacy .NET Framework continue to support .NET Framework 4.8.

3.2 - File Reporter 25.4

3.2.1 - Improved MS365 Drive Scan Cancellation

Multiple Microsoft 365 Drive Scans that are queued or in progress may now be selected and canceled as a single action.

3.2.2 - Updated Database Support

This release adds support for SQL Server 2025 and PostgreSQL 18.

Older database versions SQL Server 2019 and PostgreSQL 15 are no longer supported.

3.2.3 - Third-Party Components

Third-party components have been updated to recent versions, providing recent vendor updates and security fixes.

3.3 - File Reporter 25.3

3.3.1 - Data Discovery & Risk Insights Module

Numerous updates have been added to the OpenText Data Discovery & Risk Insights (DDRI) integration agent. For details see Data Discovery & Risk Insights Integration.

3.3.2 - Updated Database Views

Database views updated to provided text formats for various binary data for improved support with Power BI and other data analysis platforms.

3 - New Features and Updates

3.3.3 - Bug Fixes

- Fixed issue with incorrect data and chart display for the built-in Historic File System Comparison report
- Fixed issue with Agent365 authentication timeout for long-running Drive scans and SharePoint permissions collection.

3.4 - File Reporter 25.2

3.4.1 - Data Discovery & Risk Insights Module

This release introduces an integration module for use with OpenText Data Discovery & Risk Insights (DDRI) extending risk analysis to include data access via folder permissions for files in DDRI workbooks. For details see Data Discovery & Risk Insights Integration.

3.4.2 - Updated Database Views

More updated views for Microsoft 365 scan data have been added for support of Power BI and other third-party frameworks.

NOTE: For information on Microsoft Power BI report templates for use with File Reporter, visit <https://filequerycookbook.com>.

3.4.3 - .NET

All components using .NET have been updated to .NET 9.0.

Components using legacy .NET Framework continue to support .NET Framework 4.8.

3.4.4 - AgentFS

Fixed an issue in which collection of Directory Quotas when scanning in proxy mode failed to work.

4 - Known Issues and Limitations

4.1 - AgentFS

- AgentFS does not support scanning against nested DFS targets, in which a DFS target references another DFS link or target path.

5 - Open Enterprise Server Support

To provide a more intentional approach to platform support that coincides with the requirements of its customer base and Open Enterprise Server (OES) releases, OpenText directs File Reporter support for OES and eDirectory to a dedicated product offering set and release schedule.

To that end, the File Reporter 3.x product line will continue to support OES installations and evolve with forthcoming releases and later versions.

The File Reporter 24.x product line focuses exclusively on Microsoft ecosystem environments, including Active Directory, Windows, and NTFS file systems, as well as Microsoft 365 environments. The product line will continue to evolve with forthcoming releases and later versions.
