

## **Micro Focus Audit Assistant on Premise v19.2.2**

### Patch Release Notes

Document Release Date: February 7, 2022

Software Release Date: February 7, 2022

## **Products and/or Components Updated with this Patch**

Fortify Audit Assistant on Premise

### **Updates**

The patch includes the following changes:

- Log4j has been updated to version 2.17.1
- Kubernetes deployment security updates
  - All containers now run as unprivileged users; you can no longer run a container as root.
  - Disable mounting Kubernetes service account token to the containers.
  - Root filesystem is mounted as read-only. All data is written to container volumes.
- Faster startup of training daemon containers with large datasets

**Note:** This patch includes quality updates made in the 19.2.1 update. That update was handled by the Micro Focus Professional Services team on a case-by-case basis. This patch is designed to update version 19.2.0 or 19.2.1 to version 19.2.2 and includes the quality updates of 19.2.1 as well as the changes noted above.

### **Documentation**

- There are no documentation updates required for this patch. Use the latest versions of the documentation created for 19.2.

### **Installation Notes**

**Note:** Always back up your system before installing a patch.

To install the patch, consult the “Fortify Audit Assistant Installation” section in the *Micro Focus Fortify Audit Assistant on Premise Installation and Administration User Guide*.
