OpenText™ Fortify Audit Assistant on Premises v23.2.0
Release Notes
Document Release Date: October 17, 2023
Software Release Date: October 17, 2023

Update

Changes in this release of Fortify Audit Assistant on Premises:

- **New Generation 2 (G2) AI/machine learning model:** The new G2 model provides greater prediction precision and features detailed parameters tuning. You can elect to use a pretrained Fortify prediction model or a local hybrid model. The local hybrid model offers predictions based on both the pretrained Fortify model and any local training data you provide.
- **Sharing Data:** The option to share data between tenants is no longer available.
- **New Prediction Policies:** To use the advanced precision of the G2 model for predictions, you must create new policies designed for the G2 model.
- **OpenText™ Fortify Software Security Center Compatibility:** The new G2 model requires Fortify Software Security Center 23.2.0 or above. Fortify Software Security Center releases prior to version 23.2.0 require the previous G1 model.

Known issue

> Although G2 prediction policies can be created in an administrator tenant, they are not usable for predictions.

Documentation

For more information, refer to the Fortify Audit Assistant help system and the Fortify Software Security Center User Guide.
