# 1. Release Notes

This document provides the new features, installation and upgrade notes, known issues, and workarounds that apply to release 26.1 of OpenText™ Core SAST Aviator. This information is not available elsewhere in the product documentation. The user guides for this product are available on the Product Documentation website:

<https://www.microfocus.com/documentation/fortify-static-code/>

# 1.1. Fortify product name changes

OpenText is in the process of changing the following product names:

Previous name	New name
Fortify Static Code Analyzer	OpenText™ Static Application Security Testing (OpenText SAST)
Fortify Software Security Center	OpenText™ Application Security
Fortify WebInspect	OpenText™ Dynamic Application Security Testing (OpenText DAST)
Fortify on Demand	OpenText™ Core Application Security
Debricked	OpenText™ Core Software Composition Analysis (OpenText Core SCA)
Fortify Applications and Tools	OpenText™ Application Security Tools

The product names have changed on product splash pages, mastheads, login pages, and other places where the product is identified. The name changes are intended to clarify product functionality and to better align the Fortify Software products with OpenText. In some cases, such as on the documentation title page, the old name might temporarily be included in parenthesis. You can expect to see more changes in future product releases.

## 1.2. New features

### Language support

- All categories for JavaScript, TypeScript, Python, Go, and Kotlin are now supported with automatic suppression.

### Installation and upgrade notes

- fcli v3.14.2 or later
