Documentation updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for updated documentation, visit <https://www.microfocus.com/support-and-services/documentation/>.

Support

Visit the [MySupport portal](#) to access contact information and details about the products, services, and support that Micro Focus offers.

This portal also provides customer self-solve capabilities. It gives you a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the MySupport portal to:

- Search for knowledge documents of interest
- Access product documentation
- View software vulnerability alerts
- Enter into discussions with other software customers
- Download software patches
- Manage software licenses, downloads, and support contracts
- Submit and track service requests
- Contact customer support
- View information about all services that Support offers

Many areas of the portal require you to sign in. If you need an account, you can create one when prompted to sign in. To learn about the different access levels the portal uses, see the [Access Levels descriptions](#).

Documentation	8

New in this Release

The following new features were released in Lithium Connector version 12.5.0.

- The connector retrieves information from Lithium through the Lithium version 2.0 REST API. The connector can now retrieve additional metadata for messages, including information about associated attachments.
- The connector can obtain details about your HTTP proxy from the system. Instead of setting ProxyHost, ProxyPort, ProxyUsername, and ProxyPassword, you can set the new configuration parameter UseSystemProxy to TRUE.

Resolved Issues

The following issues were resolved in Lithium Connector version 12.5.0.

- The connector failed to re-authenticate when the session expired, when Lithium authentication was used.

Supported Operating System Platforms

Lithium Connector 12.5.0 is supported on the following platforms.

Windows (x86-64)

- Windows Server 2019
- Windows Server 2016
- Windows Server 2012

Linux (x86-64)

The minimum supported versions of particular distributions are:

- Red Hat Enterprise Linux (RHEL) 6
- CentOS 6
- SuSE Linux Enterprise Server (SLES) 12
- Ubuntu 14.04
- Debian 8

Solaris (x86-64 and SPARC 64)

- Solaris 11
- Solaris 10

Notes

This section contains information that is important if you are upgrading from an earlier version of Lithium Connector.

- The connector now retrieves information using the Lithium version 2.0 REST API, resulting in the following changes:
 - Document references for messages are now in the format `/messages/XXXXXX` rather than `messages/id/XXXXXX`.
 - Document references for attachments are now in the format `/messages/XXXXXX/attachments/XXX` rather than `messages/id/XXXXXX/upload/attachments/XXX`.
 - There are significant changes to the format of document metadata, when compared to previous versions of the connector.
 - In the response of the `identifiers` fetch action, the identifier type "Thread" has been removed. The root message of a topic now has the type "Message".

Documentation

The following documentation was updated for Lithium Connector version 12.5.0.

- *Lithium Connector Administration Guide*
- *Lithium Connector Reference*
