Documentation updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for updated documentation, visit <https://www.microfocus.com/support-and-services/documentation/>.

Support

Visit the [MySupport portal](#) to access contact information and details about the products, services, and support that Micro Focus offers.

This portal also provides customer self-solve capabilities. It gives you a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the MySupport portal to:

- Search for knowledge documents of interest
- Access product documentation
- View software vulnerability alerts
- Enter into discussions with other software customers
- Download software patches
- Manage software licenses, downloads, and support contracts
- Submit and track service requests
- Contact customer support
- View information about all services that Support offers

Many areas of the portal require you to sign in. If you need an account, you can create one when prompted to sign in. To learn about the different access levels the portal uses, see the [Access Levels descriptions](#).

New in this Release	4
Resolved Issues	5
Supported Operating System Platforms	6
Documentation	7

New in this Release

The following new features were released in OneDrive Connector version 12.5.0.

- In NiFi Ingest, when you configure the GetOneDrive processor, you can choose the items to synchronize through a graphical interface on the advanced configuration page.
- The connector can obtain details about your HTTP proxy from the system. Instead of setting ProxyHost, ProxyPort, ProxyUsername, and ProxyPassword, you can set the new configuration parameter UseSystemProxy to TRUE.

Resolved Issues

The following issues were resolved in OneDrive Connector version 12.5.0.

- The connector could terminate unexpectedly when retrieving group information.
- The connector could generate Access Control Lists that contained no users or groups.
- In some cases OAuth authentication failed because the OAuth configuration tool did not URL-encode some values.

Supported Operating System Platforms

OneDrive Connector 12.5.0 is supported on the following platforms.

Windows (x86-64)

- Windows Server 2019
- Windows Server 2016
- Windows Server 2012

Linux (x86-64)

The minimum supported versions of particular distributions are:

- Red Hat Enterprise Linux (RHEL) 6
- CentOS 6
- SuSE Linux Enterprise Server (SLES) 12
- Ubuntu 14.04
- Debian 8

Solaris (x86-64 and SPARC 64)

- Solaris 11
- Solaris 10

Documentation

The following documentation was updated for OneDrive Connector version 12.5.0.

- *OneDrive Connector Administration Guide*
- *OneDrive Connector Reference*
