

OpenText iPrint Appliance CE 25.3.1 Release Notes

August 2025

OpenText iPrint Appliance is a virtual solution that enables cross-platform, self-service printing for enterprises. It supports printing from desktops, laptops, and mobile devices while integrating with NetIQ eDirectory, Active Directory, and Microsoft Identity for user authentication. Designed to scale for organizations of any size, it provides a unified printing management system across multiple locations.

The appliance operates as a virtual machine within various virtualization environments, including VMware, Windows Hyper-V, Citrix Xen Server, and Xen on SUSE Linux Enterprise Server (SLES).

OpenText iPrint Appliance CE 25.3.1 is an update to iPrint Appliance 25.3 that introduces enhancements, improves usability, and resolves previous issues.
