What’s New

- ♦ [“iPrint Client for Windows” on page 1](#)
- ♦ [“iPrint Client for Mac” on page 1](#)
- ♦ [“Mac Client Compatibility Update” on page 1](#)

iPrint Client for Windows

Upgraded the iPrint Client for Windows to version 6.28.10 to resolve defects.

iPrint Client for Mac

Upgraded the iPrint Client for Mac to version 6.24 to resolve defects.

Mac Client Compatibility Update

Apache has released a security patch that removes TLS upgrade support. Previously, Windows and Mac clients used TLS upgrade on port 631 for secure communication.

Now, secure communication occurs directly over port 443.

This change requires mandatory version pairing between the Mac client and the OES iPrint Advanced server to ensure secure communication.

Table 1 Compatibility matrix

Mac client Version	Compatible iPrint Advanced versions
6.24.00 or later	24.3.4 or later
6.23.00 or earlier	24.3.3 or earlier

Supported OES Update Paths

The following table lists the update path supported in this release:

Source	Supported Methods	Additional Information
OES 23.4, OES 24.1, OES 24.2, OES 24.3, OES 24.3.2, or OES 24.3.3	Patch update SUSE Manager	To update, you must register to NCC, SMT, or SUSE Manager.
