

NetIQ SecureLogin 9.0.0 Patch 1 Release Notes

September 2021

NetIQ SecureLogin 9.0.0 Patch1 enhances the product capability and resolves several previous issues. Many of these improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable input. We hope you continue to help us ensure that our products meet all your needs. You can post feedback in the [SecureLogin forum](#) on our community website that also includes product information, blogs, and links to helpful resources. You can also share your ideas for improving the product in [Ideas Portal](#).

For more information about this release and the latest release notes, see the [NetIQ SecureLogin documentation](#) page. Note that SecureLogin 9 documentation is available on the Micro Focus domain. For SecureLogin documentation versions prior to 9, see [NetIQ Documentation](#).

If you have suggestions for documentation improvements, click **comment on this topic** at the bottom of any page in the HTML version of the documentation posted at the [NetIQ SecureLogin documentation](#) page.

Resolved Issues

The following issues have been resolved in NetIQ SecureLogin 9.0.0 Patch 1:

ID	Module	Description
379185	Client Offline	In the Microsoft Active Directory mode, when a client is logged in without the network connectivity, the client is switched to offline. When the connectivity is switched on, the client still stays offline.
383002	Auditing	While executing 'Type -raw ?syspassword' command, no audit event is raised.
383003	Auditing	When 'Text Input' command is added into the script, no audit event is raised.
379201	Auditing	NetIQ SecureLogin client does not log timezone and year as per the event created.

System Requirements

For information about hardware requirements, supported operating systems, and browsers, see [NetIQ SecureLogin System Requirements](#).

Upgrading NetIQ SecureLogin 9.0.0 with Patch 1 Update

NetIQ SecureLogin 9.0.0 Patch 1 is available to download from the [Software License and Download \(https://sld.microfocus.com/\)](https://sld.microfocus.com/) portal. For information about how to download the product from this portal, watch the following video:

 <http://www.youtube.com/watch?v=esy4PTVi4wY>

For information about how to upgrade, see [SecureLogin 9.0 Installation Guide](#).

Supported Upgrade Paths

To apply NetIQ SecureLogin 9.0.0 Patch 1, NetIQ SecureLogin 9.0.0.0 is required.

To upgrade to SecureLogin 9, you must be on one of the following versions of SecureLogin:

- ◆ 8.7
- ◆ 8.8
- ◆ 8.8.1

Upgrade or migration from SecureLogin 8.6, 8.5, 8.1, 8.0, or 7.0 might work, but it is not tested. Ensure that you test the upgrade from SecureLogin 8.6, 8.5, 8.1, 8.0, or 7.0 to SecureLogin 9.0 in your test environment before you upgrade in your production environment.

End of Support

iManager

The NetIQ iManager product is discontinued and reached end-of-life. Therefore, SecureLogin has stopped the iManager support. If eDirectory is deployed as part of OES deployment, refer to the OES support cycle of iManager.

It is recommended to use SLManager in place of iManager for administering SecureLogin.

Secret Store

In the subsequent release of SecureLogin, support for Secret Store will be discontinued. It is recommended to migrate from the LDAP + Secret Store mode to the LDAP mode. For more information about how to migrate, see “[Migrating from the SecretStore Mode to Other Modes](#)” in the *NetIQ SecureLogin 9.0 Administration Guide*.

Contacting Micro Focus

For specific product issues, contact Micro Focus Support at <https://www.microfocus.com/support-and-services/>.

Additional technical information or advice is available from several sources:

- ◆ Product documentation, Knowledge Base articles, and videos: <https://www.microfocus.com/support-and-services/>
- ◆ The Micro Focus Community pages: <https://www.microfocus.com/communities/>
