

NetIQ SecureLogin 9.1 Release Notes

January 2023

NetIQ SecureLogin 9.1 enhances the product capability and resolves several previous issues. Many of these improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable input. We hope you continue to help us ensure that our products meet all your needs. You can post feedback in the [SecureLogin forum](#) on our community website that also includes product information, blogs, and links to helpful resources. You can also share your ideas for improving the product in [Ideas Portal](#).

If you have suggestions for documentation improvements, click **comment on this topic** at the bottom of any page in the HTML version of the documentation posted at the [NetIQ SecureLogin documentation](#) page.

What’s New

SecureLogin Advanced Edition on Rancher

This release supports installing SecureLogin Advanced Edition (SLAE) on Rancher.

For more information about installing SLAE on Rancher, see [Installing Advanced Edition on Rancher](#).

Enhanced sIAP Tool

With this release, the sIAP tool is enhanced to delete all applications and logins without user confirmation. It is also enhanced to delete any specific application or credential based on application and credential ID.

For more information, see [The sIAP Syntax](#).

Integration with the AutoPass License Feature

You can now integrate SecureLogin with AutoPass License Server (APLS), a Micro Focus web-based solution with SecureLogin to organize and manage your product licenses, server users, and client users.

For more information about APLS, see [AutoPass License Server](#).

For more information about how to integrate the APLS feature with SecureLogin, see [Installing and Uninstalling SecureLogin with AutoPass License Feature](#).

Support for Connection Through Non-SSL Port

With this release, SecureLogin supports connection through a non-SSL port in AD and AD LDS mode.

For more information about disabling SSL, see [Disabling SSL in SecureLogin](#).

NOTE: Configuring SecureLogin in the non-SSL mode is not recommended.

Support for Windows 11

SecureLogin now supports Windows 11 21H2.

Resolved Issues

The following issues have been resolved in SecureLogin 9.1:

ID	Module	Description
201969	Client General	SecureLogin UI does not close automatically. Now, the SecureLogin UI closes automatically after a specified period and keeps the credentials secure.
206177	Client General	SecureLogin is unable to find any cached user data if the user is not logged in to a directory.
207387	Client General	No additional details about the datastore connection are available.
208497	SSO Script	In Username and Password options, SetPrompt does not correctly display the text.
209957	Client General	SecureLogin 9.0 does not recognize special characters correctly when you type them in any language other than US English.
211309	Client General	After upgrading SecureLogin from 8.7.1 to 9.0.0.1, logging in with smart card causes SecureLogin to crash. NOTE: This defect also fixes the issue of high CPU utilization by the following preferences: <ul style="list-style-type: none">◆ Display user name on mouse over tray icon◆ Display user name on taskbar
211320	Client General	SecureLogin triggers a login attempt to eToken SafeNet Authentication Client during login.
210980	Client General	After upgrading SecureLogin from 8.8 to 9.0.1, SecureLogin start up displays Securelogin has no available datastores. Any change will not be saved.

Known Issue

The following issue is currently being researched for NetIQ SecureLogin 9.1:

SecureLogin Fails to Load on Windows 11 22H2 Machines

Issue: SecureLogin fails to load on Windows 11 22H2 machines both in upgrade and fresh install scenarios.

Workaround: No workaround is available.

Deprecation of Support

From the upcoming 9.x releases, 32-bit support will be deprecated in eDir and NDS modes.

System Requirements

For information about hardware requirements, supported operating systems, and browsers, see [NetIQ SecureLogin System Requirements](#).

Installing or Upgrading NetIQ SecureLogin 9.1

After purchasing SecureLogin 9.1, download the software and the license from the [Software License and Download \(https://sld.microfocus.com/\)](https://sld.microfocus.com/) portal. For information about how to download the product from this portal, watch the following video:

<http://www.youtube.com/watch?v=esy4PTVi4wY>

For information about how to install or upgrade, see [SecureLogin 9.1 Installation Guide](#).
