

NetIQ SecureLogin 9.1.0 Patch 1 Release Notes

June 2023

NetIQ SecureLogin 9.1.0 Patch 1 enhances the product capability and resolves several previous issues. Many of these improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable input. We hope you continue to help us ensure that our products meet all your needs. You can post feedback in the [NetIQ SecureLogin forum](#) on our community website that also includes product information, blogs, and links to helpful resources. You can also share your ideas for improving the product in [Ideas Portal](#).

If you have suggestions for documentation improvements, click **comment on this topic** at the bottom of any page in the HTML version of the documentation posted at the [NetIQ SecureLogin documentation](#) page.

What’s New

Support for Windows 11 22 H2

NetIQ SecureLogin now supports Windows 11 22H2.

Support for Additional Parameter with SendEvent Command

`SendEvent` command is enhanced to use an optional argument.

For more information, see [SendEvent](#) in the [NetIQ SecureLogin 9.1 Application Definition Guide](#).

Resolved Issues

The following issues have been resolved in NetIQ SecureLogin 9.1.0 Patch 1:

ID	Module	Description
336034	Client General	After upgrading NetIQ SecureLogin to 9.1, the <code>?sysuser</code> variable displays the entire FQDN.
254109	Client General	When NetIQ SecureLogin is configured with Disable SSL/TLS regkey and the client is logged without the network connectivity, NetIQ SecureLogin switches to offline mode. Even after the network connectivity is restored, the client remains offline.
261077	Client General	NetIQ SecureLogin Dialog box moves behind the Lotus notes login screen.
273002	Client General	NetIQ SecureLogin 9.1 randomly crashes on <code>slwinssso.exe</code> .
302004	Client General	NetIQ SecureLogin does not prompt the Credential Dialog to the users to specify the credentials after the selection of default wizard option.
313014	Client General	After upgrading NetIQ SecureLogin to 9.1, <code>SendEvent</code> command is causing <code>BROKER_ARG_NUM(-217)</code> error.
324018	Client General	After upgrading NetIQ SecureLogin from 8.8 to 9.1, client is unable to load and displays the following error message: <code>The encryption type selected is not supported on this platform. Please contact your system administrator.</code>
278019	Client General	NetIQ SecureLogin takes time to load during the start up on Windows 11 22H2 machines.

Known Issue

The following issue is currently being researched for NetIQ SecureLogin 9.1.0 Patch 1:

NetIQ SecureLogin Displays Error Messages and Fails to Load on Windows 11 22H2 Machines with 3DES Encryption and JSSO Provisioned Applications

Issue: NetIQ SecureLogin displays error messages and fails to load when the user uses 3DES encryption and has applications provisioned through JSSO API on windows 11 22H2 machines.

Workaround: No workaround is available.

System Requirements

For information about hardware requirements, supported operating systems, and browsers, see [NetIQ SecureLogin System Requirements](#).
