NetIQ SecureLogin 9.1.2 Release Notes

October 2023

NetIQ SecureLogin 9.1.2 enhances the product capability and resolves several previous issues. Many of these improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable input. We hope you continue to help us ensure that our products meet all your needs. You can post feedback in the SecureLogin forum on our community website that also includes product information, blogs, and links to helpful resources. You can also share your ideas for improving the product in Ideas Portal.

If you have suggestions for documentation improvements, click comment on this topic at the bottom of any page in the HTML version of the documentation posted at the NetIQ SecureLogin documentation page.

What's New?

This release includes the following enhancements:

Support for Windows 11 22H2 with 3DES Encryption and JSSO Provisioned Applications

SecureLogin now supports Windows 11 22H2 machines with 3DES encryption and JSSO provisioned applications.

Improved Single Sign-On to Web Pages In Internet Explorer

From this release, SecureLogin installer adds the `IESSOBHO` registry key and the default value set is 0. It is not required to enable the Internet Explorer Add-on as Secure Login Windows process, `SLwinsso.exe` provides Single Sign-on (SSO) capability in Internet Explorer.

NOTE: Irrespective of value set to the `IESSOBHO` registry key, Internet Explorer SSO Browser Helper Object is not installed. For more information, see "Unable to Enable or Disable the Plugin In Internet Explorer" on page 3.

Support for Internet Explorer Compatibility Mode on Microsoft Edge Browser

SecureLogin facilitates single sign-on to sites that work in Internet Explorer compatibility mode on Microsoft Edge browser.

Resolved Issues

The following issues have been resolved in SecureLogin 9.1.2:

ID	Module	Description
215171	Client General	SecureLogin crashes when using applications with embedded browser during text or checkbox or combo interaction.
224002	Client General	HTML basic authentication events are not logged in the Windows application event log.
242053	Client General	User is prompted twice for the credentials during the first login to a web application.
250033	Client General	SecureLogin with Windows Hello for Business crashes in Windows 11 22H2.
255003	Client General	SecureLogin displays different broker messages after successful authentication in Windows 11.
270003	SSO Script	The screen detection is slow during the first attempt to click `Change password`.
355032	Client General	Setting **HideAdvanced** and **DisableCancel** registry key does not have any impact.
374040	Client General	There is a delay of about 7-8 seconds while launching the second terminal.
375033	Client General	After upgrading SecureLogin 9.1.0.1, credentials are populated with additional characters.
374073	Client General	After upgrading SecureLogin to 9.1.0.1, `-121 Broker_Preference_Data_corrupt` error is displayed during startup or restarting SecureLogin.

Known Issues

The following issues are currently being researched for SecureLogin 9.1.2:

SecureLogin Does Not Support TLSv1.3

Issue: SecureLogin does not support TLSv1.3.

Workaround: Enable TLSv1.2.

Single Sign-on Assistant 3.4.1 Is Not Supported In Mozilla Firefox

Issue: The latest release of Single Sign-on Assistant 3.4.1 is not supported in Mozilla Firefox.

Workaround: Use Single Sign-On Assistant 3.3.5 or below.

Smartcard Integration Is Not Supported on Windows 11 22H2

Workaround: No workaround available.

Unable to Enable or Disable the Plugin In Internet Explorer

Issue: After upgrading from 9.x to 9.1.2, Internet Explorer SSO Add-on is not installed. This does not allow you to enable or disable the extension or plugin.

NOTE: If you are on Windows 10, `SLwinsso.exe` handles the single sign-on for the Internet Explorer web pages instead of the Internet Explorer Browser Helper Object. Therefore, the plugin cannot be enabled or disabled. This does not impact the SSO functionality.

Workaround No workaround available.

System Requirements

For information about hardware requirements, supported operating systems, and browsers, see NetIQ SecureLogin System Requirements.
