

NetIQ SecureLogin 9.1.2 Patch 1 Release Notes

March 2024

NetIQ SecureLogin 9.1.2 Patch 1 enhances the product capability and resolves previous issues. These improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable input. We hope you continue to help us ensure that our products meet all your needs. You can post feedback in the [SecureLogin forum](#) on our community website that also includes product information, blogs, and links to helpful resources. You can also share your ideas for improving the product in [Ideas Portal](#).

If you have suggestions for documentation improvements, click **comment on this topic** at the bottom of any page in the HTML version of the documentation posted at the [NetIQ SecureLogin documentation](#) page.

Resolved Issues

The following issues have been resolved in SecureLogin 9.1.2 Patch 1:

ID	Module	Description
493024	SSO Terminal	When SecureLogin inputs a password that contains T into the terminal application, the application printer setting screen is triggered and the operation is interrupted.
480020	Client General	When UPN is used to log in for the first time, SecureLogin displays an error message <code>NSL encountered an error while trying to authenticate.</code>

System Requirements

For information about hardware requirements, supported operating systems, and browsers, see [NetIQ SecureLogin System Requirements](#).

Installing or Upgrading NetIQ SecureLogin 9.1.2 Patch 1

After purchasing SecureLogin 9.1, download the software and the license from the [Software License and Download \(https://sld.microfocus.com/\)](https://sld.microfocus.com/) portal.

For information about how to install or upgrade, see [SecureLogin 9.1 Installation Guide](#).
