NetIQ SecureLogin CE 24.3 (v9.2) Release Notes

July 2024

NetIQ SecureLogin 9.2 enhances the product capability and resolves several previous issues. Many of these improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable input. We hope you continue to help us ensure that our products meet all your needs. You can post feedback in the SecureLogin forum on our community website that also includes product information, blogs, and links to helpful resources. You can also share your ideas for improving the product in Ideas Portal.

If you have suggestions for documentation improvements, click **comment on this topic** at the bottom of any page in the HTML version of the documentation posted at the NetIQ SecureLogin documentation page.

What's New

Support for Windows 11

NetIQ SecureLogin now supports Windows 11 23H2.

Support for SmartCard in Windows 11

NetIQ SecureLogin now supports logging in through SmartCard on Windows 11.

Support for Configuration Based on IP Filter

This release introduces new arguments for the command, `SetRestPlat`. The `SetRestPlat` command helps the user to create configuration script for a range of IP addresses. This configuration script helps to reduce the number of scripts to be maintained.

For more information about the command, see SetRestPlat.

NetIQ SecureLogin in an AWS Managed Microsoft AD Environment

With this release, NetIQ SecureLogin can be installed in an AWS Managed Microsoft AD environment.

For more information, see Installing and Configuring in an AWS Managed Microsoft Active Directory Environment.

TLS v1.3 Support

NetIQ SecureLogin now supports TLS v1.3.

Branding Updates

Micro Focus is now part of OpenText. To adhere to the OpenText brand, the name of the product, its components and user interfaces, logos, company name references, and documentation are updated. The OpenText versioning mechanism uses the CY.Q (Calendar Year.Quarter) format. Starting from the 9.2 release, NetIQ SecureLogin adheres to the OpenText versioning convention. NetIQ SecureLogin 9.2 is known as NetIQ SecureLogin 24.3 CE (v9.2).

Resolved Issues

The following issues have been resolved in NetIQ SecureLogin 9.2:

ID	Module	Description
209963	Client General	SafeNet Authentication client dialog box is displayed when NetIQ SecureLogin is launched.
210949	Client General	Smartcard security box prompt is displayed when NetIQ SecureLogin is launched.
210976	Wizard Web	**Add application** prompt cannot be disabled for basic authentication websites.
241008	Client General	Application definitions are not saved after importing XML.
250007	JSSO-API	NetIQ SecureLogin Java SSO SDK displays error when linking credentials.
252105	slmanager	`Slmanager` is not displaying the tree view in Windows 11 22H2.
368002	Web SSO	Embedded browser functionality does not work with `FourWinds Content Manager.`
607292	Client General	Unable to copy the script in application script editor.

Known Issue

The following issue is currently being researched for NetIQ SecureLogin 9.2:

SecureLogin Prompts for Password When MPR Notification Is Disabled

Issue: If MPR notification is disabled in a system by Group policy, the user needs to re-enter the credential to start NetIQ SecureLogin in the following scenarios:

- User logs in using password.
- User logs in using smartcard.
- User logs in using either Windows Hello PIN or biometrics. In this scenario, NetIQ SecureLogin prompts to enter the password instead of the Windows Hello PIN or biometrics.

  NOTE: This issue does not impact Windows Hello for Business.

Workaround: No workaround.

slManager Does Not Work When Search Base and Search Filter Options are Used

Issue: If a user searches user objects or containers in an Active Directory environment using **Search Base** and **Search Filter** options, slManager stops working.

Workaround: To workaround this issue, perform one of the following:

- Search by navigating through the UI tree.
- Search by using the complete DN on the Object field.

System Requirements

For information about hardware requirements, supported operating systems, and browsers, see NetIQ SecureLogin CE 24.3 (v9.2) System Requirements.

Installing or Upgrading SecureLogin CE 24.3 (v9.2)
