NetIQ SecureLogin CE 24.3 (v9.2) System Requirements

July 2024

NetIQ Corporation recommends the fully tested and certified platforms described in this page. Issues that can be reproduced on the certified and the supported platforms will be prioritized and fixed according to standard defect-handling policies. For more information about support polices, see Support Policies.

For more information about SecureLogin, see *NetIQ SecureLogin CE 24.3 (v9.2) Overview Guide*.

This document provides the minimum requirements to install SecureLogin. Ensure that you review these requirements before installation, particularly those related to the operating system.

IMPORTANT: In the preceding table, **Certified** includes the versions that are tested and supported. Whereas, **Supported** includes the versions that are not tested but are expected to work.
