

## **Abstract**

TGSecure 3.0 contains the following:

**Note:** You can upgrade from any previous release of TGSecure.

## **Enhancements**

### System Value Management

- Allow support for IBM i 7.5 System value

### Profile Manager

- Support IBM i 7.5 Support
- Support for \*ANY allowed parameters

## **Bug Fixes**

### Resource Manager

- Running multiple resource manager schemas concurrently will cause reporting and enforcement errors.
- Workstation rules using object groups cause Inactive monitor job to fails with a message wait (MSGW) condition

### Profile Management

- Profile Inactivity report and enforcement incorrectly calculates inactive days if the user profile has a last used date of blank.
