Legal Notice

THIS DOCUMENT AND THE SOFTWARE DESCRIBED IN THIS DOCUMENT ARE FURNISHED UNDER AND ARE SUBJECT TO THE TERMS OF A LICENSE AGREEMENT OR A NON-DISCLOSURE AGREEMENT. EXCEPT AS EXPRESSLY SET FORTH IN SUCH LICENSE AGREEMENT OR NON-DISCLOSURE AGREEMENT, NETIQ CORPORATION PROVIDES THIS DOCUMENT AND THE SOFTWARE DESCRIBED IN THIS DOCUMENT "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. SOME STATES DO NOT ALLOW DISCLAIMERS OF EXPRESS OR IMPLIED WARRANTIES IN CERTAIN TRANSACTIONS; THEREFORE, THIS STATEMENT MAY NOT APPLY TO YOU.

For purposes of clarity, any module, adapter or other similar material ("Module") is licensed under the terms and conditions of the End User License Agreement for the applicable version of the NetIQ product or software to which it relates or interoperates with, and by accessing, copying or using a Module you agree to be bound by such terms. If you do not agree to the terms of the End User License Agreement you are not authorized to use, access or copy a Module and you must destroy all copies of the Module and contact NetIQ for further instructions.

This document and the software described in this document may not be lent, sold, or given away without the prior written permission of NetIQ Corporation, except as otherwise permitted by law. Except as expressly set forth in such license agreement or non-disclosure agreement, no part of this document or the software described in this document may be reproduced, stored in a retrieval system, or transmitted in any form or by any means, electronic, mechanical, or otherwise, without the prior written consent of NetIQ Corporation. Some companies, names, and data in this document are used for illustration purposes and may not represent real companies, individuals, or data.

This document could include technical inaccuracies or typographical errors. Changes are periodically made to the information herein. These changes may be incorporated in new editions of this document. NetIQ Corporation may make improvements in or changes to the software described in this document at any time.

U.S. Government Restricted Rights: If the software and documentation are being acquired by or on behalf of the U.S. Government or by a U.S. Government prime contractor or subcontractor (at any tier), in accordance with 48 C.F.R. 227.7202-4 (for Department of Defense (DOD) acquisitions) and 48 C.F.R. 2.101 and 12.212 (for non-DOD acquisitions), the government's rights in the software and documentation, including its rights to use, modify, reproduce, release, perform, display or disclose the software or documentation, will be subject in all respects to the commercial license rights and restrictions provided in the license agreement.

[APPENDIX - TGSecure Report Reference Revisions](#)

TGSecure Report Reference Introduction

This reference guide provides information about built-in reports provided with TGSecure. Use this reference guide to learn why a report passed or failed.

 **Note:** Refer to the [TGSecure User Guide](#) for detailed information and concepts on how to use TGSecure.

The TGSecure reports fall into the following categories:

- [Access Escalation Reports](#)
- [Inactivity Session Lockdown Reports](#)
- [Network Security Reports](#)
- [Resource Manager Reports](#)
- [User Profile Reports](#)

Report Categories

There are three categories of TGSecure reports:

- [Access Escalation Reports](#)
- [Inactivity Session Lockdown Reports](#)
- [Network Security Reports](#)
- [Resource Manager Reports](#)
- [System Value Reports](#)
- [User Profile Reports](#)

Access Escalation Reports

This section includes descriptions of the following **Access Escalation** reports:

- [Access Escalation Usage Reports](#)
- [Access Escalation Configuration Reports](#)
- [Access Escalation Change Reports](#)

Tip: Refer to the [TGSecure User Guide](#) for more information about [Access Escalation Management](#)

See also

[TGSecure Report Reference Introduction](#)

Access Escalation Usage Reports

This section contains descriptions of the following reports:

- [Access Escalation Activity](#)
- [Access Escalation Activity Details](#)
- [Access Escalation Command Activity](#)
- [Access Escalation Db Update Activity](#)
- [Access Escalation Entitlement Usage](#)
- [Access Escalation Failures](#)
- [Access Escalation Program Activity](#)

See also

[Access Escalation Reports](#)

Access Escalation Activity

This report displays all escalation activity (system access and object update attempts).

Collector ID: ACCESS_ESCALATION_USAGE

Report ID: ACCESS_ESCAL_ACTIVITY

Including:

- Records with action status: *PASS or *FAIL.
- Records with object type: *CMD, *FILE, or *PGM

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **2** (Access Escalation Management).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Access Escalation Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **1** (Access Escalation Usage Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **1** (Activity).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Sequence Number	Order in which the remote transaction initiated communication with the target server
Type	Journal entry code for the type of transaction
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user submitting the job

Job Number	Number assigned to the job
User Profile	Name of the user submitting the transaction
System Name	Name of the system submitting the transaction
Receiver	Name of the journal receiver submitting the transaction
Receiver Library	Name of the journal receiver library submitting the transaction
Receiver ASP	Name of the journal receiver ASP submitting the transaction
Action Status	Status of transaction: *PASS - transaction accepted *FAIL - transaction rejected
User Name	Name of the user executing the job
Client IP	IP address of the client-server submitting the transaction
Device Name	Device submitting the transaction
Server IP	IP address of the target server receiving the transaction
System Name	Name of the system receiving the transaction
Object Name	Object targeted by the transaction
Object Library	Object library targeted by the transaction
Object Type	Object type targeted by the transaction
Swap User	If a transaction has a swap profile, the transaction is executed using the authority of the swap profile instead of the authority of the user profile associated with the incoming transactions.
Reason	Reason for the transaction
Command Executed	Command executed by the transaction
Usage Description	Description of the transaction

Access Escalation Activity Details

This report displays usage activity details. This allows you to audit without defining gradually rules.

Collector ID: ACCESS_ESCALATION_DETAILS

Report ID: ACCESS_ESCALATION_USAGE_DETAILS

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **2** (Access Escalation Management).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Access Escalation Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **1** (Access Escalation Usage Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **7** (Activity Details).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Sequence Number	Order in which the socket transaction initiated communication with the target server
Type	Journal entry code for the type of transaction
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user submitting the job
Job Number	Number assigned to the job
User Profile	Name of the user submitting the transaction

System Name	Name of system submitting the transaction
Receiver	Name of the journal receiver submitting the SIGNON transaction request
Receiver Library	Name of the journal receiver library submitting the SIGNON transaction request
Receiver ASP	Name of the journal receiver ASP submitting the SIGNON transaction request
RCV ASP	Count of ASP receivers
Action Status	Status of incoming transaction: * PASS - transaction accepted * FAIL - transaction rejected
User Name	Name of the user executing the job
Client IP	IP address of the client-server submitting the transaction
Device Name	Device submitting the transaction
Server IP	IP address of the target server receiving the transaction
System Name	Name of the system receiving the transaction
Object Name	Object targeted by the transaction
Object Library	Object library targeted by the transaction
Object Type	Object type targeted by the transaction
Swap User	If a transaction has a swap profile, the transaction is executed using the authority of the swap profile instead of the authority of the user profile associated with the incoming transactions.
Reason	Reason for the transaction
Command Executed	Command executed by the transaction
Usage Description	Description of transaction

Access Escalation Command Activity

This report displays command activities. Records with the object type of *CMD.

Collector ID: ACCESS_ESCALATION_USAGE

Report ID: ACCESS_ESCAL_CMD_ACTIVITY

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **2** (Access Escalation Management).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Access Escalation Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **1** (Access Escalation Usage Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **2** (Command Activity).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user submitting the job
Job Number	Number assigned to the job
User Profile	Name of the user submitting the transaction
System Name	Name of the system submitting the transaction

Action Status	Status of incoming transaction: * PASS - transaction accepted * FAIL - transaction rejected
User Name	Name of the user executing the job
Client IP	IP address of the client-server submitting the transaction
Device Name	Device submitting the transaction
Server IP	IP address of the target server receiving the transaction
System Name	Name of the system receiving the transaction
Object Name	Object targeted by the transaction
Object Library	Object library targeted by the transaction
Object Type	Object type targeted by the transaction
Swap User	If a transaction has a swap profile, the transaction is executed using the authority of the swap profile instead of the authority of the user profile associated with the incoming transactions.
Reason	Reason for the transaction
Command Executed	Command executed by the transaction

Access Escalation Db Update Activity

This report displays database file activities. Records with the object type of *FILE.

Collector ID: ACCESS_ESCALATION_USAGE

Report ID: ACCESS_ESCAL_DB_UPD_ACTIVITY

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **2** (Access Escalation Management).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Access Escalation Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **1** (Access Escalation Usage Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **4** (Database Update Activity).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user submitting the job
Job Number	Number assigned to the job
User Profile	Name of the user submitting the transaction
System Name	Name of the system submitting the transaction

Action Status	Status of incoming transaction: * PASS - transaction accepted * FAIL - transaction rejected
User Name	Name of the user executing the job
Client IP	IP address of the client-server submitting the communication
Device Name	Device submitting the transaction
Server IP	IP address of the target server receiving the transaction
System Name	Name of the system receiving the transaction
Object Name	Object targeted by the transaction
Object Library	Object library targeted by the transaction
Object Type	Object type targeted by the transaction
Swap User	If a transaction has a swap profile, the transaction is executed using the authority of the swap profile instead of the authority of the user profile associated with the incoming transactions.
Reason	Reason for the transaction
Command Executed	Command executed by the transaction

Access Escalation Entitlement Usage

This report displays successful access attempts. Records with the action status *PASS.

Collector ID: ACCESS_ESCALATION_USAGE

Report ID: ACCESS_ESCAL_ENTITLEMENT_USG

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **2** (Access Escalation Management).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Access Escalation Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **1** (Access Escalation Usage Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **5** (Entitlement Usage).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user submitting the job
Job Number	Number assigned to the job
User Profile	Name of the user submitting the transaction
System Name	Name of system submitting the transaction

Action Status	Status of incoming transaction: * PASS - transaction accepted * FAIL - transaction rejected
User Name	Name of the user executing the job
Client IP	IP address of the client-server submitting the transaction
Device Name	Device submitting the transaction
Server IP	IP address of the target server receiving the transaction
System Name	Name of the system receiving the transaction
Object Name	Object targeted by the transaction
Object Library	Object library targeted by the transaction
Object Type	Object type targeted by the transaction
Swap User	If a transaction has a swap profile, the transaction is executed using the authority of the swap profile instead of the authority of the user profile associated with the incoming transactions.
Reason	Reason for the transaction
Command Executed	Command executed by the transaction
Usage Description	Description of the transaction

Access Escalation Failures

This report displays failed access attempts. Records with action status *FAIL.

Collector ID: ACCESS_ESCALATION_USAGE

Report ID: ACCESS_ESCAL_FAILURES

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **2** (Access Escalation Management).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Access Escalation Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **1** (Access Escalation Usage Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **6** (Failures).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user submitting the job
Job Number	Number assigned to the job
User Profile	Name of the user submitting the transaction
System Name	Name of system submitting the transaction

Action Status	Status of incoming transaction: * PASS - transaction accepted * FAIL - transaction rejected
User Name	Name of the user executing the job
Client IP	IP address of the client-server submitting the transaction
Device Name	Device submitting the transaction
Server IP	IP address of the target server receiving the transaction
System Name	Name of the system receiving the transaction
Object Name	Object targeted by the transaction
Object Library	Object library targeted by the transaction
Object Type	Object type targeted by the transaction
Swap User	If a transaction has a swap profile, the transaction is executed using the authority of the swap profile instead of the authority of the user profile associated with the incoming transactions.
Reason	Reason for the transaction
Command Executed	Command executed by the transaction
Usage Description	Description of transaction

Access Escalation Program Activity

This report displays program activities. Records with the object type of *PGM.

Collector ID: ACCESS_ESCALATION_USAGE

Report ID: ACCESS_ESCAL_PGM_ACTIVITY

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **2** (Access Escalation Management).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Access Escalation Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **1** (Access Escalation Usage Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **3** (Program Activity).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user submitting the job
Job Number	Number assigned to the job
User Profile	Name of the user submitting the transaction
System Name	Name of system submitting the transaction

Action Status	Status of incoming transaction: * PASS - transaction accepted * FAIL - transaction rejected
User Name	Name of the user executing the job
Client IP	IP address of the client-server submitting the transaction
Device Name	Device submitting the transaction
Server IP	IP address of the target server receiving the transaction
System Name	Name of the system receiving the transaction
Object Name	Object targeted by the transaction
Object Library	Object library targeted by the transaction
Object Type	Object type targeted by the transaction
Swap User	If a transaction has a swap profile, the transaction is executed using the authority of the swap profile instead of the authority of the user profile associated with the incoming transactions.
Reason	Reason for the transaction
Command Executed	Command executed by the transaction

Access Escalation Access Controls

This report displays the access control configuration details. The users or user groups displayed in this report have been granted or denied access to the Access Escalation Management (AEM) interface. The AEM allows users to perform a task defined in an entitlement using the access privilege of a swap uses. In most cases, the swap user will have higher access privileges than the user.

Collector ID: ACCESS_ESCAL_ACC_CONTROLS

Report ID: ACCESS_CONTROLS_CONFIG

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **2** (Access Escalation Management).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Access Escalation Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **2** (Access Escalation Configuration Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **4** (Access Control).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
User	User (or user group) granted permission to access the AEM interface.
Client IP	Client IP address from which the user (or user group) has permission to access the AEM interface.

Access Escalation Defaults

This report displays default escalation settings.

Collector ID: ACCESS_ESCAL_DEFAULTS

Report ID: DEFAULTS_CONFIG

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **2** (Access Escalation Management).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Access Escalation Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **2** (Access Escalation Configuration Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **1** (Default).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Journal Name	Journal in which configuration changes are stored
Journal Library	Library in which the journal resides
Default Swap	Profile to be used in place of the user profile associated with the transactions
Time-out interval	Max amount of time allowed for the remote server to attempt to communicate with the target server
Command Execution Entry	Journal entry code for the type of transaction
Audit Configuration	Flag indicating whether auditing is enabled for configuration changes: Y - Auditing enabled (enable tracking and reporting) N - Auditing disabled (disable tracking and reporting)
Alert Message Queue	Queue in which alerts are stored

Alert Message Queue Library	Library in which the queue resides
--------------------------------	------------------------------------

Access Escalation Entitlements

This report displays the entitlement configuration details.

Collector ID: ACCESS_ESCAL_ENTITLEMENTS

Report ID: ENTITLEMENT_CONFIG

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **2** (Access Escalation Management).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Access Escalation Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **2** (Access Escalation Configuration Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **3** (Entitlement).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Entitlement Enabled?	Indicates whether the entitlement is enabled Y - Entitlement applied N - Entitlement ignored
User Name	User/User group to which the entitlement applies
Object Name	Object/Object group to which the entitlement applies
Object Library	Library in which the object resides
Object Type	Type of object: * CMD - Command * PGM - Program * FILE - File
Swap User	User/User group to which the entitlement applies when using the AEM interface
Server	Server/server group to which the entitlement applies

Calendar Name	<p>Calendar that defined when the entitlement is applicable</p> <p>Note: Calendars allow you to restrict when an entitlement is applicable.</p>
Authentication Y/N	<p>Indicates whether user authentication (password entry) is required</p> <p>Y - User must provide a password as part of the transaction request</p> <p>N - No password required as part of the transaction request</p>
Alerts Y/N	<p>Indicates whether notification alerts are submitted to the alert queue</p> <p>Y - Alerts enabled</p> <p>N - Alerts disabled</p>
Entitlement Description	Description of the entitlement

- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **4** (Access Control Changes).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
--------	-------------

Type	Journal entry code for the type of operation: DL - Record delete PT - Record add PX - Record added by RRN (a relative record number) to a physical file member UB - Record edit (before-change) UP - Record edit (after-change)
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user executing the job
Job Number	Numbered assigned to the job
Program Name	Name of the program used to perform encryption
Program Library	Name of the library in which the program resides
Object Name	Name of object changed
Library Name	Name of the library in which the object resides
Member Name	Name of member
User Profile	Profile name of user executing the change request
System Name	Name of system submitting the change request
Remote Address	IP address used to submit the change request
Access Control User	User (or user group) whose access control was modified
Target IP Address	IP address from which the user (user group) whose record was modified can access the AEM interface

Commands Allowed via Command Security

This report displays command security configuration settings.

Collector ID: CMD_SEC_COMMANDS

Report ID: CMD_SEC_CMD_EXEC

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **6** (Command Security).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Command Security Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **1** (Command Security Activity Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **1** (Commands Allowed via Command Security).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Sequence Number	Order in which the socket transaction initiated communication with the target server
Type	Journal entry code for the type of transaction
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user submitting the job
Job Number	Number assigned to the job
User Profile	Name of the user submitting the socket transaction request
System Name	Name of system submitting the socket transaction request
Receiver	Name of the journal receiver submitting the SIGNON transaction request

Receiver Library	Name of the journal receiver library submitting the SIGNON transaction request
Receiver ASP	Name of the journal receiver ASP submitting the SIGNON transaction request
RCV ASP	Count of ASP receivers
Status	Status of change * PASS - Change was successful * FAIL - Change failed
User Name	Name of the user executing the change
Client IP	IP address of the server from which the change was initiated
Command Library	Library in which command resides
Command Name	Name of command
Command String	Parameters used in conjunction with the command

Command Security Command Rules

This report displays command security parameter details.

Collector ID: CMD_SEC_RULES

Report ID: CMD_SEC_RULES

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **6** (Command Security).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Command Security Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **2** (Command Security Configuration Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **3** (Command Security Rules).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Rule Enabled	Flag indicating whether command security rules are enabled Y - Rules enabled N - Rules disabled
User Name	Name of user/user group to whom the rule applies
Command Name	Name of command to which the rule applies
Command Library	Library in which to apply the rule
Command Parmeter Restriction	Parameter value to which the rule applies
Client IP Address	IP address to which the rule applies
Calendar Name	Calendar to which the rule applies Note: Calendars allow you to restrict when a rule is applicable.

Command Audited	Flag indicating whether auditing is enabled * YES - Auditing enabled * NO - Auditing disabled Note: Auditing must be enabled to generate change reports.
Command Alerting	Flag indicating whether alerting is enabled * YES - Alerts enabled * NO - Alerts disabled Note: Alerting must be enabled to generate notifications.
Command Exit Installed	Flag indicating whether the command security exit program is installed * YES - Exit program installed * NO - Exit program not installed Note: The exit program must be installed to use the Command Security feature.
Command Action	Flag indicating whether the rule is allowing or disallowing the execution of a command * PASS - Allow execution of the command * FAIL - Disallow execution of the command
Command Description	Short description of the command rule

Inactivity Disconnect

This report displays disconnections caused by user inactivity.

Collector ID: INACTIVITY_DISCONNECTIONS

Report ID: INACTIVITY_DISCONNECTIONS

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **3** (Inactivity Session Lockdown).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Inactivity Session Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **1** (Inactivity Session Usage Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **1** (Inactivity Disconnect Report).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
InactiveJob User	Name assigned to the user
InactiveJob Name	Name assigned to the inactive job Note: A name consists of three components: A code, the user's name, and a number
Subsystem Name	Name assigned to the subsystem
Subsystem Library	Library in which the subsystem resides

Disconnect Type	<p>The type of disconnect triggered by the inactivity:</p> <p>ENDJOB - End the job (user must restart their job)</p> <p>DSCJOB - Disconnect (pause) the job and show the IBM standard disconnect message</p> <p>TGDSCJOB - Disconnect (pause) the job and show a custom disconnect message</p> <p>HLDJOB - Hold (freeze) the job (only an admin can unfreeze a job)</p> <p>SIGNOFF - End the session (user must restart their session and job)</p>
Timestamp	Time at which the user was disconnected due to inactivity

ISL Configuration Settings

This report displays the Inactivity Session Lockdown (ISL) configuration settings.

Collector ID: ISL_CONFIGURATION_SETTINGS

Report ID: ISL_CONFIGURATION

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **3** (Inactivity Session Lockdown).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Inactivity Session Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **2** (Inactivity Session Configuration Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **1** (Inactivity Session Configuration Settings).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Audit Status	Flag indicating whether auditing is enabled: Y - Auditing enabled (enable tracking and reporting) N - Auditing disabled (disable tracking and reporting)
Audit Journal Name	Journal in which to store ISL audit data Note: The default audit journal for TG products is TGJRN . The default journal resides in the TGDATA library.
Audit Journal Library	Library in which the journal resides
Alert Status	Flag indicating whether notification alerts are submitted to the alert queue Y - Alerts enabled N - Alerts disabled

Audit Configuration Change	Flag indicating whether auditing is enabled for configuration changes Y - Auditing enabled N - Auditing disabled
Alert Message Queue Name	Queue in which ISL alerts are stored Note: The default audit journal for TG products is TGMSGQ . The default journal resides in the TGD ATA library.
Alert Message Queue Library	Library in which the queue resides
Check Interval	How often the system checks for inactive sessions
Disconnect Screen Message	Warning message user receives regarding an upcoming disconnect action
Disconnect Screen Title	Title of the dialog box that warns the user of an upcoming disconnect
Send Warning?	Flag indicating whether alerts are sent to warn the user of an impending disconnect *YES - Warning alert enabled *NO - Warning alert disabled
Warning Interval	When to send the user a warning message (seconds before disconnect)
Revoke Authority	Flag indicating whether to revoke a user's authority when they are locked or their session is ended *YES - The user's session is locked or ended, and the user's authority is revoked *NO - The user's session is locked or ended, but the user's authority is maintained Note: When a user's authority is revoked, the user is prohibited from performing tasks in any concurrent sessions. In other words, the lockdown is not limited to one session; it impacts all sessions associated with a specific user ID. Warning: Consider the workflow consequences thoroughly before enabling this feature.
Journal Entry Type	The type of journal entry created by the disconnect action

ISL Disconnect Options

This report displays disconnection options.

Collector ID: ISL_DISCONNECT_OPTIONS

Report ID: ISL_DISCONNECT

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **3** (Inactivity Session Lockdown).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Inactivity Session Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **2** (Inactivity Session Configuration Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **2** (Inactivity Session Disconnect Options).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Disconnect Option	Name assigned to the disconnect option Note: * Default represent the default disconnect option defined for all object.
Disconnect Time Limit (Minutes)	Amount of time the system must remain inactive to trigger a disconnect
Disconnect Type	The type of disconnect: ENDJOB - End the job (user must restart their job) DSCJOB - Disconnect (pause) the job and show the IBM standard disconnect message TGDSCJOB - Disconnect (pause) the job and show a custom disconnect message HLDJOB - Hold (freeze) the job (only an admin can unfreeze a job) SIGNOFF - End the session (user must restart their session and job)

- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **3** (Inactivity Session Inclusion Exclusion Rules).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Rule Type	The type of rule: * PGM - Rule that affects a program * WRKSTN - Rule that affects a workstation * SBSD - Rule that affects a subsystem (e.g., country, region, department) * CTL - Rule that affects a controller
Object Name	Name assigned to the object
Object Library	Library in which the object resides
Calendar	Calendar to which the rule applies Note: Calendars allow you to restrict when a rule is applicable.

Disconnect Option	<p>The type of disconnect:</p> <p>ENDJOB - End the job (user must restart their job)</p> <p>DSCJOB - Disconnect (pause) the job and show the IBM standard disconnect message</p> <p>TGDSCJOB - Disconnect (pause) the job and show a custom disconnect message</p> <p>HLDJOB - Hold (freeze) the job (only an admin can unfreeze a job)</p> <p>SIGNOFF - End the session (user must restart their session and job)</p>
Rule Acton	<p>Flag indicating whether the rule includes or excludes</p> <p>*INCLUDE - Who and what is affected by a rule</p> <p>*EXCLUDE - Who and what is not affected by a rule</p>
Rule Description	Description of the rule
Change Time Stamp	Date on which the rule was last updated

- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
--------	-------------

Type	Journal entry code for the type of operation: DL - Record delete PT - Record add PX - Record added by RRN (a relative record number) to a physical file member UB - Record edit (before-change) UP - Record edit (after-change)
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user executing the job
Job Number	Numbered assigned to the job
Program Name	Name of the program used to perform encryption
Program Library	Name of the library in which the program resides
Object Name	Name of object changed
Library Name	Name of the library in which the object resides
Member Name	Name of member
User Profile	Profile name of user executing the change request
System Name	Name of system submitting the change request
Remote Address	IP address used to submit the change request
Audit Status	Flag indicating whether auditing is enabled: Y - Auditing enabled (enable tracking and reporting) N - Auditing disabled (disable tracking and reporting)
Audit Journal Name	Journal in which audit data is stored
Audit Journal Library	Library in which the journal resides
Alert Status	Flag identifying whether alerts are enabled (stored in the alert queue): *YES - Enable alerts (create admin alert) *NO - Disable alerts
Audit Configuration Change	Change made to configuration setting
Alert Message Queue Name	Queue in which alerts message are stored
Alert Message Queue Library	Library in which the queue resides
Check Interval	How often the system check for inactivity (in seconds)
Disconnect Screen Message	Warning message user receives before disconnect action
Disconnect Screen Title	Title that appears in the header of the disconnect message dialog box

Send Warning?	Flag identifying whether a warning message appears: * YES - Disconnect message enabled * NO - Disconnect message disabled
Warning Interval	How much time before the disconnect occurs should a warning message appear
Revoke Authority	Flag identifying whether a user's authority is revoked after the disconnect action: * YES - Enable revoke * NO - Disable revoke
Journal Entry Type	Type of journal entry created. In the case of an ISL entry, the value should appear as IL.

ISL Disconnect Option Changes

This report displays changes to ISL disconnect options.

Collector ID: DATABASE_AUDITING

Report ID: ISL_DISCONNECT_OPTIONS

To enable this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **3** (Inactivity Session Lockdown).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **10** (ISL Defaults).
- 5) Press **Enter**.
- 6) Enter **Y** as the **Audit Configuration Changes** flag.

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **3** (Inactivity Session Lockdown).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Inactivity Session Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **3** (Inactivity Session Change Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **2** (Inactivity Session Disconnect Option Changes).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
--------	-------------

Type	Journal entry code for the type of operation: DL - Record delete PT - Record add PX - Record added by RRN (a relative record number) to a physical file member UB - Record edit (before-change) UP - Record edit (after-change)
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user executing the job
Job Number	Numbered assigned to the job
Program Name	Name of the program used to perform encryption
Program Library	Name of the library in which the program resides
Object Name	Name of object changed
Library Name	Name of the library in which the object resides
Member Name	Name of member
User Profile	Profile name of user executing the change request
System Name	Name of system submitting the change request
Remote Address	IP address used to submit the change request
Disconnect Option	Name assigned to the disconnect option
Disconnect Time Limit	Time limit defined for the disconnect option
Disconnect Type	Type of disconnect option: ENDJOB - End the job (user must start the job over) DSCJOB - Disconnect (pause) the job and show the IBM standard disconnect message TGDSCJOB - Disconnect (pause) the job and show a custom disconnect message HLDJOB - Hold (freeze) the job (only an admin can unfreeze a job) SIGNOFF - Signoff from the server

- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **10** (Central Server Transactions Report).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
--------	-------------

Sequence Number	Order in which the remote CENTRAL sever transaction initiated communication with the target server
Type	Journal entry code for the type of transaction
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user submitting the job
Job Number	Number assigned to the job
User Profile	Name of the user submitting the CENTRAL transaction request
System Name	Name of system submitting the CENTRAL transaction request
Receiver	Name of the journal receiver submitting the CENTRAL transaction request
Receiver Library	Name of the journal receiver library submitting the CENTRAL transaction request
Receiver ASP	Name of the journal receiver ASP submitting the CENTRAL transaction request
Action Status	Status of incoming transactions: * PASS - transaction accepted * FAIL - transaction rejected
User Name	Name of the user executing the job. If a transaction has a swap profile, the transaction is executed using the authority of the swap profile instead of the authority of the profile associated with the incoming transactions.
Server Name	Server used to execute the CENTRAL transactions. This report should display only CENTRAL transactions. Note: See the Network Transactions report for all server type transactions.
Function Name	Function used to execute the CENTRAL transaction
Command Name	Command used to execute the CENTRAL transaction
IP Address	IP address from which the CENTRAL transaction originated
Object Name	Object targeted by the CENTRAL transaction

Object Library	Object library targeted by the CENTRAL transaction
Object Type	Object type targeted by the CENTRAL transaction
Request Details	Information about the requestor

Database Server Transactions

This report lists attempts to access the database server.

Collector ID: NETWORK_TRANS_DATABASE, NETWORK_TRANSACTIONS_DATABASE

Report ID: DATABASE_SERVER_TRANS_REPORT

Associated exit points

- QIBM_QZDA_INIT
- QIBM_QZDA_NDB1
- QIBM_QZDA_ROI1
- QIBM_QZDA_SQL1

To enable this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **1** (Network Security).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **10** (Exit Point Configuration).
- 5) Press **Enter**.
- 6) In the **Opt** column for the network server labeled ***DATABASE**, enter **2** (Edit).
- 7) Enter ***YES** in the **Audit Status** field.

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **1** (Network Security).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Network Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **1** (Transaction Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **7** (Database Server Transactions Report).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

11) Press **Enter**.

Report Column Description

Column	Description
Sequence Number	Order in which the remote DB sever transaction initiated communication with target server
Type	Journal entry code for the type of transaction
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user submitting the job
Job Number	Number assigned to the job
User Profile	Name of the user submitting the DB transaction request
System Name	Name of system submitting the DB transaction request
Receiver	Name of the journal receiver submitting the DB transaction request
Receiver Library	Name of the journal receiver library submitting the DB transaction request
Receiver ASP	Name of the journal receiver ASP submitting the DB transaction request
Action Status	Status of incoming transactions: * PASS - transaction accepted * FAIL - transaction rejected
User Name	Name of the user executing the job. If a transaction has a swap profile, the transaction is executed using the authority of the swap profile instead of the authority of the profile associated with the incoming transactions.
Server Name	Server used to execute the DB transactions. This report displays only DB server transactions. Valid values included: DBINIT - Perform server initiation DBNDB - Perform native database request DBSQL - Perform SQL requests DBROI - Retrieve object information and catalog function Note: See the Network Transactions report for all server type transactions.

Function Name	Function used to execute the DB transaction
Command Name	Command used to execute the DB transaction
IP Address	IP address from which the DB transaction originated
Object Name	Object targeted by the DB transaction
Object Library	Object library targeted by the DB transaction
Object Type	Object type targeted by the DB transaction
Request Details	Information about the requestor

Data Queue Transactions

This report lists attempts to access the data queue server.

Collector ID: NETWORK_TRANS_DATAQ, NETWORK_TRANSACTION_DATAQ

Report ID: DATA_QUEUE_TRANSACTIONS_REPORT

Associated exit point

QIBM_Q2HQ_DATA_QUEUE

To enable this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **1** (Network Security).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **10** (Exit Point Configuration).
- 5) Press **Enter**.
- 6) In the **Opt** column for the network server labeled ***DTAQ**, enter **2** (Edit).
- 7) Enter ***YES** in the **Audit Status** field.

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **1** (Network Security).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Network Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **1** (Transaction Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **8** (Database Queue Transactions Report).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Sequence Number	Order in which the remote DTAQ sever transaction initiated communication with target server
Type	Journal entry code for the type of transaction
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user submitting the job
Job Number	Number assigned to the job
User Profile	Name of the user submitting the DTAQ transaction request
System Name	Name of system submitting the DTAQ transaction request
Receiver	Name of the journal receiver submitting the DTAQ transaction request
Receiver Library	Name of the journal receiver library submitting the DTAQ transaction request
Receiver ASP	Name of the journal receiver ASP submitting the DTAQ transaction request
Action Status	Status of incoming transactions: * PASS - transaction accepted * FAIL - transaction rejected
User Name	Name of the user executing the job. If a transaction has a swap profile, the transaction is executed using the authority of the swap profile instead of the authority of the profile associated with the incoming transactions.
Server Name	Server used to execute the DTAQ transactions. This report should display only DTAQ transactions. Note: See the Network Transactions report for all server type transactions.
Function Name	Function used to execute the DTAQ transaction
Command Name	Command used to execute the DTAQ transaction
IP Address	IP address from which the DTAQ transaction originated

Object Name	Object targeted by the DTAQ transaction
Object Library	Object library targeted by the DTAQ transaction
Object Type	Object type targeted by the DTAQ transaction
Request Details	Information about the requestor

Incoming Transactions

This report lists all incoming transactions, including socket (*SOC) and exit point (*TRN) transactions.

Collector ID: INCOMING_TRANSACTIONS

Report ID: INCOMING_TRANSACTION_REPORT

To display the audit status

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **1** (Network Security).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **10** (Exit Point Configuration).
- 5) Press **Enter**.
- 6) Refer to the **Audit Status** column.

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **1** (Network Security).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Network Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **1** (Transaction Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **1** (Incoming Transactions Report).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Col umn	Description
------------	-------------

Remote Transaction Type	Valid values include: * SOC - Incoming transaction from socket * TRN - Incoming transaction from exit point program
Remote User	User initiating the incoming transaction
Remote Server ID	Remote server initiating the incoming transaction
Remote Function ID	Function initiated by the incoming transaction
Remote Command ID	Command initiated by the incoming transaction
Remote IP Address	IP address of the remote server initiating the incoming transaction
Object Name	Object targeted by the incoming transaction
Object Library	Object library targeted by the incoming transaction
Object Type	Object type targeted by the incoming transaction
IFS Object	Integrated File System objects targeted by the incoming transaction

Server Name	Server targeted by the incoming transaction
Action	Status of incoming transactions: * PASS - transaction accepted * FAIL - transaction rejected
Remote Time Stamp	Time at which the remote server attempted communication with the target server.
Remote Transactions Count	Repeat entries are suppressed in this report, but a total count is tracked. For example, if a user attempts 5 SIGNON transactions on a single day, only one row will appear in this report for that user, on that day, for that transaction type. However, each transaction is counted and that count appears in the Remote Transactions Count column. In this example with the SIGNON transactions, the count would appear as 5.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user submitting the job
Job Number	Number assigned to the job
User Profile	Name of the user submitting the REXEC transaction request
System Name	Name of system submitting the REXEC transaction request
Action Status	Status of incoming transactions: * PASS - transaction accepted * FAIL - transaction rejected
User Name	Name of the user executing the job. If a transaction has a swap profile, the transaction is executed using the authority of the swap profile instead of the authority of the profile associated with the incoming transactions.
Server Name	Server used to execute the REXEC transactions. This report should display only REXEC transactions. Note: See the Network Transactions report for all server type transactions.
Function Name	Function used to execute the REXEC transaction
Command Name	Command used to execute the REXEC transaction
IP Address	IP address from which the REXEC transaction originated
Object Name	Object targeted by the REXEC transaction
Object Library	Object library targeted by the REXEC transaction
Object Type	Object type targeted by the REXEC transaction
Request Details	Information about the requestor

Network Transactions

This report list all attempts to access the network via any server type (e.g., FTP, Telnet, etc.)

Collector ID: NETWORK_TRANSACTIONS

Report ID: NETWORK_TRANSACTIONS_REPORT

To enable this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **1** (Network Security).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **10** (Exit Point Configuration).
- 5) Press **Enter**.
- 6) In the **Opt** column for the desired network, enter **2** (Edit).
- 7) Enter ***YES** in the **Audit Status** field.

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **1** (Network Security).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Network Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **1** (Transaction Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **3** (Network Transactions Report).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
--------	-------------

Time stamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user submitting the job
Job Number	Number assigned to the job
User Profile	Name of the user submitting the network transaction request
System Name	Name of system submitting the network transaction request
Action Status	Status of incoming transactions: * PASS - transaction accepted * FAIL - transaction rejected
User Name	Name of the user executing the job. If a transaction has a swap profile, the transaction is executed using the authority of the swap profile instead of the authority of the profile associated with the incoming transactions.
Server Name	Identifies the server type. Valid values include: CENTRAL - Central server DB* - Database server DDM - Distributed data management server DTAQ - Data queue server FILE - File server FTP - File transfer protocol server REXEC - Remote execution server RMTCMD - Remote command server SIGNON - TCP signon server TELNET - Telnet server
Function Name	Function executed by the network transaction
Command Name	Command executed by the network transaction
IP Address	IP address from which the network transaction originated
Object Name	Object targeted by the network transaction
Object Library	Object library targeted by the network transaction

Object Type	Object type targeted by the network transaction
Request Details	Information about the requestor

Network Transaction Showcase

This report returns transactions associated with the Showcase exit program.

Collector ID: NETWORK_TRANS_SHOWCASE

Report ID: NETWORK_TRANS_SHOWCASE

To enable this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **1** (Network Security).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **10** (Exit Point Configuration).
- 5) Press **Enter**.
- 6) In the **Opt** column for the network server labeled ***SHOWCASE**, enter **2** (Edit).

 **Note:** Some server types have multiple exit points.

- 7) Enter ***YES** in the **Audit Status** field.

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **1** (Network Security).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Network Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **1** (Transaction Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **15** (Showcase Transactions Report).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Sequence Number	Order in which the remote network transaction initiated communication with the target server
Type	Journal entry code for the type of transaction
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user submitting the job
Job Number	Number assigned to the job
User Profile	Name of the user submitting the network transaction request
System Name	Name of system submitting the network transaction request
Receiver	Name of the journal receiver submitting the network transaction request
Receiver Library	Name of the journal receiver library submitting the network transaction request
Receiver ASP	Name of the journal receiver ASP submitting the network transaction request
Action Status	Status of incoming transactions: * PASS - transaction accepted * FAIL - transaction rejected
User Name	Name of the user executing the job. If a transaction has a swap profile, the transaction is executed using the authority of the swap profile instead of the authority of the profile associated with the incoming transactions.
Server Name	Identifies the server type. Valid values include: CENTRAL - Central server DB* - Database server DDM - Distributed data management server DTAQ - Data queue server FILE - File server FTP - File transfer protocol server REXEC - Remote execution server RMTCMD - Remote command server SIGNON - TCP signon server TELNET - Telnet server
Function Name	Function executed by the network transaction

Comm and Name	Command executed by the network transaction
IP Address	IP address from which the network transaction originated
Object Name	Object targeted by the network transaction
Object Library	Object library targeted by the network transaction
Object Type	Object type targeted by the network transaction
Reques t Details	Information about the requestor

Report Column Description

Column	Description
--------	-------------

Sequence Number	Order in which the socket transaction initiated communication with the target server
Type	Journal entry code for the type of transaction
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user submitting the job
Job Number	Number assigned to the job
User Profile	Name of the user submitting the socket transaction request
System Name	Name of system submitting the socket transaction request
Receiver	Name of the journal receiver submitting the SIGNON transaction request
Receiver Library	Name of the journal receiver library submitting the SIGNON transaction request
Receiver ASP	Name of the journal receiver ASP submitting the SIGNON transaction request
Current User	Name of the user executing the job. If a transaction has a swap profile, the transaction is executed using the authority of the swap profile instead of the authority of the profile associated with the incoming transactions.
Remote IP Address	IP address of the remote server from which the socket transaction initiated
Port Number	Port number from which the socket transaction initiated
Operation Name	Name of operation number from which the socket transaction initiated
Subsystem Name	Name of the subsystem impacted by the socket transaction
Subsystem Library	Library in which the subsystem resides
Action	Status of socket transactions: * PASS - transaction accepted * FAIL - transaction rejected

- 9) Press **Enter**.

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **1** (Network Security).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Network Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **4** (Configuration Changes).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **3** (Exit Point Configuration Changes).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Type	Journal entry code for the type of operation: DL - Record delete PT - Record add PX - Record added by RRN (a relative record number) to a physical file member UB - Record edit (before-change) UP - Record edit (after-change)
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user executing the job
Job Number	Numbered assigned to the job
Program Name	Name of the program used to perform encryption
Program Library	Name of the library in which the program resides
Object Name	Name of object changed
Library Name	Name of the library in which the object resides
Member Name	Name of member
User Profile	Profile name of user executing the change request
System Name	Name of system submitting the change request
Remote Address	IP address used to submit the change request
Server Name	Type of server
Exit Point	Name of Exit point
Exit Format	Exit format
Exit Point Description	Description of exit point
Exit Program	Name of associated exit program
Exit Program Library	Library location of exit program
Exit Program Journal	Type of journal
Collection Status	Is collector enabled
Audit On?	Flag indicating whether auditing is enabled: *YES - Auditing is enabled, so transactions are tracked *NO - Auditing is disabled, so transactions are not tracked
Security On?	Flag indicating whether exit point security is enabled: *YES - Security monitoring is enabled, so rules are applied *NO - Security monitoring is disabled, so rules are not applied

Authority Collection for IFS Objects

This report displays authority data collected for Integrated File System (IFS) file systems.

Note: IFS is a newer file management structure that supports stream input/output and is similar to the structure used by personal computers and UNIX operating systems.

For more information about IBM file systems, refer to the [IBM Knowledge Center](#).

Collector ID: AUTHORITY_COLLECTION

Report ID: AUTHORITY_IFS

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **4** (Resource Manager).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Resource Manager Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **1** (Resource Manager Usage Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **2** (Authority Collection Report IFS).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Authorization Name	Authority collection name
Check Timestamp	Time at which the change took place
Path Name	IFS path

System Object Type	Type of system object *BLKSF - Block files *CHRSF - Character files *DIR - Directories *FIFO - First-in-first-out special files *SOCKET - Socket files *STMF - Steam files *SYMLNK - Symbolic links
Authorization List	Name of the authority list Note: An authority list identifies the users who have authority to a specific object.
Authority Check Successful	Flag indicating whether the check was successful
Detailed Required Authority	Minimum object access authority level: *OBJALTER - Object alter *OBJEXIT - Object exists *OBJMGT - Object management *OBJOPR - Object operation *OBJREF - Object reference Minimum data access authority level: *ADD - Add *DLT - Delete *EXECUTE - Execute *READ - Read For more information about IBM object authorities, refer to the IBM Knowledge Center .
Detailed Current Authority	Authority level currently defined for the user
Authority Source	User and objects evaluated
Most Recent Program Invoked	Last program invoked by the user
Most Recent Program Schema	Schema used to conduct the authority level check
Job Name	Name of the job (code + number)
Job User	Name of job user
Job Number	Number assigned to job

Authority Collection for Native Objects

This report displays authority data collected for QSYS.Lib (tradition) file types.

Note: QSYS the traditional file management structure used to control the storing and accessing of traditional file objects (*FILE objects in the QSYS.LIB library).

For more information about IBM file systems, refer to the [IBM Knowledge Center](#).

Collector ID: AUTHORITY_COLLECTION

Report ID: AUTHORITY_OBJECTS

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **4** (Resource Manager).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Resource Manager Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **1** (Resource Manager Usage Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **3** (Authority Collection Report QSYS).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Authorization Name	Authority collection name
Check Timestamp	Time at which the check took place
Path Name	IFS path
System Object Type	Type of system object

ASP Name	Name of the ASP (Auxiliary Storage Pool) or *SYSBAS Note: If *SYSBAS appear, then the system ASP and all basic user ASPs are searched to locate the object.
Authorization List	Name of the authority list Note: An authority list identifies the users who have authority to a specific object.
Authority Check Successful	Identifies whether the check was successful
Detailed Required Authority	Minimum object access authority level: *OBJALTER - Object alter *OBJEXIT - Object exists *OBJMGT - Object management *OBJOPR - Object operation *OBJREF - Object reference Minimum data access authority level: *ADD - Add *DLT - Delete *EXECUTE - Execute *READ - Read For more information about IBM object authorities, refer to the IBM Knowledge Center .
Detailed Current Authority	Authority level currently defined for the user
Most Recent Program Invoked	Last program invoked by the user
Most Recent Program Schema	Schema used to conduct the authority level check
Job Name	Name of the job (code + number)
Job User	Name of job user
Job Number	Number assigned to the job

Authority Compliance Report

This report displays compliance details.

Collector ID: AUTHORITY_COMPLIANCE

Report ID: AUTHORITY_COMPLIANCE_REPORT

To start (enable) authority collection

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **4** (Resource Manager).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **2** (Authority Collection Configuration).
- 5) Press **Enter**.
- 7) Press the **F6** (Start Collection) function key on your keyboard.
- 8) Complete the fields as necessary.

To run authority compliance for a single schemas

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **4** (Resource Manager).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **1** (Authority Schema Configuration).
- 5) Press **Enter**.
- 6) In the **OPT** column for the desired schema, enter **22** (Run Compliance Report).
- 7) Press **Enter**.
- 8) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 9) Press **Enter**.

To run authority compliance for all schemas

 **Note:** Running authority compliance for all reports might take a lot time and system resources.

- 1) Access the **Main** menu.
- 2) At the **Selection or command** prompt, enter **4** (Resource Manager).

- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Resource Manager Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **1** (Resource Manager Usage Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **1** (Authority Compliance Report).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.
- 11) Press **Enter**.

Report Column Description

Column	Description
Schema ID	Name assigned to the schema
File System	File system type: *SYS - QSYS.Lib (tradition) file types *IFS - IFS (Integrated File System) file types *NONE - No file system defined Note: For more information about IBM file systems, refer to the IBM Knowledge Center
IFS Path	Path to the IFS system (if applicable)
Auxiliary Storage Pool	ASP to which this authority schema applies or enter *SYSBAS (if applicable) Note: If *SYSBAS appears, then the system ASP and all basic user ASPs are searched to locate the object.
Library Name	Name of the specific library or *ALL to indicate all libraries
Object Name	Name of the object or *ALL to indicate all objects
Object Type	Name of object type or *ALL to indicate all types
Authority List	Name of the authority list Note: An authority list identifies the users who have authority to a specific object.
Schema Authority List	Authority list recommended by schema
Program Adopt	Program adopt status for the current state
Schema Program Adopt	Program adopt status recommended by schema
Program Adopt Users	Program adopt user for the current state

Schema Program Adopt Users	Program adopt user recommended by schema
Object Owner	Object owner for the current state
Schema Object Owner	Object owner recommended by schema
User Inheritance Group	User Inheritance group for the current state
Schema User Inheritance Group	User Inheritance group recommended by schema
User Name	User name for the current state
Schema User Name	User name f recommended by schema
Object Authority	Object authority for the current state
Schema Object Authority	Object authority recommended by schema
Data Read	<p>If an X appears in this cell, it indicates a feature enabled in the current state</p> <p>Note: Read (*READ) authority provides the authority needed to get the contents of an entry in an object or to run a program.</p>
Schema Data Read	If an X appears in this cell, it indicates a recommended feature
Data Add	<p>If an X appears in this cell, it indicates a feature enabled in the current state</p> <p>Note: Add (*ADD) authority provides the authority to add entries to an object (for example, job entries to a queue or records to a file).</p>
Schema Data Add	If an X appears in this cell, it indicates a recommended feature
Data Update	<p>If an X appears in this cell, it indicates a feature enabled in the current state</p> <p>Note: Update (*UPDATE) authority provides the authority to change the entries in an object.</p>
Schema Data Update	If an X appears in this cell, it indicates a recommended feature
Data Delete	<p>If an X appears in this cell, it indicates a feature enabled in the current state</p> <p>Note: Delete (*DELETE) authority provides the authority to remove entries from an object.</p>
Schema Data Delete	If an X appears in this cell, it indicates a recommended feature

Data Execute	<p>If an X appears in this cell, it indicates a feature enabled in the current state</p> <p>Note: Execute (*EXECUTE) authority provides the authority needed to run a program or locate an object in a library.</p>
Schema Data Execute	<p>If an X appears in this cell, it indicates a recommended feature</p>
Object Operation	<p>If an X appears in this cell, it indicates a feature enabled in the current state</p> <p>Note: Object operational (*OBJOPR) provides the authority to look at the description of an object and use the object as determined by the data authority that the user has to the object.</p>
Schema Object Operation	<p>If an X appears in this cell, it indicates a recommended feature</p>
Object Management	<p>If an X appears in this cell, it indicates a feature enabled in the current state</p> <p>Note: Object management (*OBJMGT) provides the authority to move or rename the object and add members to database files.</p>
Schema Object Management	<p>If an X appears in this cell, it indicates a recommended feature</p>
Object Exists	<p>If an X appears in this cell, it indicates a feature enabled in the current state</p> <p>Note: Object existence (*OBJEXIST) provides the authority to control the object's existence and ownership.</p>
Schema Object Exists	<p>If an X appears in this cell, it indicates a recommended feature</p>
Object Alter	<p>If an X appears in this cell, it indicates a feature enabled in the current state</p> <p>Note: Object alter (*OBJALTER) authority provides the authority needed to alter the attributes of an object.</p>
Schema Object Alter	<p>If an X appears in this cell, it indicates a recommended feature</p>
Object Reference	<p>If an X appears in this cell, it indicates a feature enabled in the current state</p> <p>Note: Object reference (*OBJREF) authority provides the authority needed to reference an object from another object.</p>
Schema Object Reference	<p>If an X appears in this cell, it indicates a recommended feature</p>
Row Column Access Control	<p>For informational use only. This level (granularity) of user access is not currently addressed by schemas</p>
Field Procedure	<p>For informational use only. This level (granularity) of user access is not currently addressed by schemas</p>

Out of Compliance Reason	<p>First reason the system encountered in which the current state does not align with the recommended state</p> <p>Note: Review the report for a complete understanding of the misalignment of the current state with the recommended state.</p>
--------------------------	---

Resource Manager out of Compliance Data

This report displays the authorities that are out of compliance (do not align with a defined schema).

Collector ID: RSC_MGR_COMPLIANCE_DATA

Report ID: RSC_MGR_COMPLIANCE_DATA

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **4** (Resource Manager).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Resource Manager Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **2** (Resource Manager Configuration Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **4** (Resource Manager out of Compliance Data).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Schema ID	Name assigned to the schema
File System	File system type: * SYS - QSYS.Lib (tradition, single-library structure) * IFS - Integrated File System (newer, multi-node structure) * NONE - No file system defined Note: For more information about IBM file systems, refer to the IBM Knowledge Center
IFS Path	Path to the IFS system (if applicable)
Auxiliary Storage Pool	ASP to which this authority schema applies or enter * SYSBAS (if applicable) Note: If * SYSBAS appears, then the system ASP and all basic user ASPs are searched to locate the object.

Library Name	Name of the specific library or *ALL to indicate all libraries
Object Name	Name of the object or *ALL to indicate all objects
Object Type	Name of object type or *ALL to indicate all types
Authority List	Name of the authority list Note: An authority list identifies the users who have authority to a specific object.
Program Adopt	Program adopt status for the current state
Program Adopt User	Program adopt status recommended by schema
Object Owner	Object owner for the current state
Object Primary Group	Primary group to which the object is assigned
User Name	Name of the user whose authority was changed
User Inheritance Group	<p>Folders (and objects in the folders) can inherit user and group permissions, or the administrator can break the inheritance and make all the permissions/authorities manually set.</p> <p>Note: This field is only valid for *IFS file systems because *SYS file systems have a single-library structure; whereas IFS file systems can have a multi-level node structure. Therefore permission inheritance might be useful.</p>
Object Authority	<p>Authority level:</p> <p>*ALL - All authorities (i.e., change, exclude, use, etc.)</p> <p>*CHANGE - Change authority</p> <p>*EXCLUDE - Prohibit public users from performing operations on the object</p> <p>*USE - Grant access to the object attributes and allow public users to use of the object (but not change the object)</p> <p>*AUTL - Grant public users the default level of authority specified for the authority list</p>
Data Read	<p>If an X appears in this cell, it indicates an enabled feature</p> <p>Note: Read (*READ) authority provides the authority needed to get the contents of an entry in an object or to run a program.</p>

Resource Manager Schema Details

This report displays the Resource Manager schema details.

Collector ID: RSC_MGR_SCHEMA_DETAILS

Report ID: RSC_MGR_SCHEMA_DETAILS

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **4** (Resource Manager).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Resource Manager Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **2** (Resource Manager Configuration Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **2** (Resource Manager Schema Details).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Schema ID	Name assigned to the schema
Schema Defaults	Flag identifying this is the default schema * YES - This entry is an exception * NO - This entry is a default (base rule)
File System	File system type: * SYS - QSYS.Lib (tradition) file types * IFS - IFS (Integrated File System) file types * NONE - No file system defined Note: For more information about IBM file systems, refer to the IBM Knowledge Center
IFS System	Path to the IFS system (if applicable)

Auxiliary Storage Pool	<p>ASP to which this authority schema applies or enter *SYSBAS (if applicable)</p> <p>Note: If you enter *SYSBAS the system ASP and all basic user ASPs will be searched to locate the object. No independent ASPs will be searched, even if the job has an ASP group.</p>
Library Name	Name of the specific library or *ALL to indicate all libraries
Object Name	Name of the object or *ALL to indicate all objects
Object Type	Name of object type or *ALL to indicate all types
User Name	Name of the user
Object Operation	<p>If an X appears in this cell, it indicates enabled object authority</p> <p>Note: Object operational (*OBJOPR) authority provides authority to look at the description of an object and use the object as determined by the data authority that the user has to the object.</p>
Object Management	<p>If an X appears in this cell, it indicates enabled object authority</p> <p>Note: Object management (*OBJMGT) authority provides the authority to move or rename the object and add members to database files.</p>
Object Exists	<p>If an X appears in this cell, it indicates enabled object authority</p> <p>Note: Object existence (*OBJEXIST) authority provides the authority to control the object's existence and ownership.</p>
Object Alter	<p>If an X appears in this cell, it indicates enabled object authority</p> <p>Note: Object alter (*OBJALTER) authority provides the authority needed to alter the attributes of an object.</p>
Object Reference	<p>If an X appears in this cell, it indicates enabled object authority</p> <p>Note: Object reference (*OBJREF) authority provides the authority needed to reference an object from another object.</p>

Resource Manager Schema Header

This report displays Resource Manager schema header details.

Collector ID: RSC_MGR_SCHEMA_HEADER

Report ID: RSC_MGR_SCHEMA_HEADER

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **4** (Resource Manager).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Resource Manager Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **2** (Resource Manager Configuration Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **3** (Resource Manager Schema Header).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Schema ID	Name assigned to the schema
Schema Description	Description assigned to the schema
Compliance Status	Flag indicating whether current authority levels defined in the system align with the schema * FAIL - There are discrepancies * PASS - There are no discrepancies (authority levels and schema align)
Alerting Status	Flag indicating whether alerting is enabled: Y - Alerting is enabled N - Alerting is disabled
Last Enforcement Date and Time	Timestamp of last enforcement check

Last Compliance Date and Time	Timestamp of last compliance check
-------------------------------	------------------------------------

Rsc Manager out of Compliance Data Changes

This report displays changes made to data found to be out of compliance.

Collector ID: DATABASE_AUDITING

Report ID: RSC_MGR_COMPLIANCE_DATA_CHANGE

To enable this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **4** (Resource Manager).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **4** (Resource Manager Defaults).
- 5) Press **Enter**.
- 6) Enter **Y** as the **Audit Configuration Changes** flag.

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **4** (Resource Manager).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Resource Manager Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **3** (Resource Manager Change Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **4** (Resource Manager out of Compliance Data Changes).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.
- 11) Press **Enter**.

Report Column Description

Column	Description
Schema ID	Name assigned to the schema

File System	<p>File system type:</p> <ul style="list-style-type: none"> *SYS - QSYS.Lib (tradition) file types *IFS - IFS (Integrated File System) file types *NONE - No file system defined <p>Note: For more information about IBM file systems, refer to the IBM Knowledge Center</p>
IFS Path	Path to the IFS system (if applicable)
Auxiliary Storage Pool	<p>ASP to which this authority schema applies or enter *SYSBAS (if applicable)</p> <p>Note: If *SYSBAS appears, then the system ASP and all basic user ASPs are searched to locate the object.</p>
Library Name	Name of the specific library or * ALL to indicate all libraries
Object Name	Name of the object or * ALL to indicate all objects
Object Type	Name of object type or * ALL to indicate all types
Authority List	<p>Name of the authority list</p> <p>Note: An authority list identifies the users who have authority to a specific object.</p>
Program Adopt	Program adopt status for the current state
Program Adopt User	Program adopt status recommended by schema
Object Owner	Object owner for the current state
Object Primary Group	Primary group to which the object is assigned
User Name	Name of the user whose authority was changed
User Inheritance Group	Name of inheritance group
Object Authority	<p>Authority level:</p> <ul style="list-style-type: none"> *ALL - All authorities (i.e., change, exclude, use, etc.) *CHANGE - Change authority *EXCLUDE - Prohibit public users from performing operations on the object *USE - Grant access to the object attributes and allow public users to use of the object (but not change the object) *AUTL - Grant public users the default level of authority specified for the authority list
Data Read	<p>If an X appears in this cell, it indicates an enabled feature</p> <p>Note: Read (*READ) authority provides the authority needed to get the contents of an entry in an object or to run a program.</p>

Rsc Manager Schema Details Changes

This report displays changes made to the schema details.

Collector ID: DATABASE_AUDITING

Report ID: RSC_MGR_SCHEMA_DETAILS_CHANGES

To enable this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **4** (Resource Manager).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **4** (Resource Manager Defaults).
- 5) Press **Enter**.
- 6) Enter **Y** as the **Audit Configuration Changes** flag.
- 7) Press **Enter**.

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **4** (Resource Manager).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Resource Manager Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **3** (Resource Manager Change Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **2** (Resource Manager Schema Details Changes).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
--------	-------------

Type	Journal entry code for the type of operation: DL - Record delete PT - Record add PX - Record added by RRN (a relative record number) to a physical file member UB - Record edit (before-change) UP - Record edit (after-change)
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user executing the job
Job Number	Numbered assigned to the job
Program Name	Name of the program used to perform encryption
Program Library	Name of the library in which the program resides
Object Name	Name of object changed
Library Name	Name of the library in which the object resides
Member Name	Name of member
User Profile	Profile name of user executing the change request
System Name	Name of system submitting the change request
Remote Address	IP address used to submit the change request
Schema ID	Name assigned to the schema
Schema Defaults	Flag identifying this is the default schema * YES - This entry is an exception * NO - This entry is a default (base rule)
File System	File system type * SYS - QSYS.Lib (tradition) file types * IFS - IFS (Integrated File System) file types Note: For more information about IBM file systems, refer to the IBM Knowledge Center
IFS Path	Path to the IFS system (if applicable)
Auxiliary Storage Pool	Enter the ASP to which this authority schema applies or enter * SYSBAS (if applicable)
Library Name	Name of the library or * ALL for all libraries
Object Name	Name of the object or * ALL for all objects
Object Type	Name of the object type or * ALL for all object types

Authority List	<p>Name of the authority list or *NONE</p> <p>Note: An authority list identifies the users who have authority to specific objects.</p>
Program Adopt	<p>Flag identifying whether the program is allowed to adopt user authorities</p> <p>*YES - Enable the program to adopt the authorities from the previous program</p> <p>*NO - Disable the program from adopting the authorities from the previous programs</p>
Program Adopt Users	Name of the user whose authorities the program should adopt (if applicable)
Object Owner	Name of the object owner
Object Primary Group	Primary group to which the object is assigned
User Name	Name of the user whose authority was changed
User Inheritance Group	Name of user inheritance group
Object Authority	<p>Authority level:</p> <p>*ALL - All authorities (i.e., change, exclude, use, etc.)</p> <p>*CHANGE - Change authority</p> <p>*EXCLUDE - Prohibit public users from performing operations on the object</p> <p>*USE - Grant access to the object attributes and allow public users to use of the object (but not change the object)</p> <p>*AUTL - Grant public users the default level of authority specified for the authority list</p>
Data Read	<p>If an X appears in this cell, it indicates an enabled feature</p> <p>Note: Read (*READ) authority provides the authority needed to get the contents of an entry in an object or to run a program.</p>
Data Add	<p>If an X appears in this cell, it indicates an enabled feature</p> <p>Note: Add (*ADD) authority provides the authority to add entries to an object (for example, job entries to a queue or records to a file).</p>
Data Update	<p>If an X appears in this cell, it indicates an enabled feature</p> <p>Note: Update (*UPDATE) authority provides the authority to change the entries in an object.</p>
Data Delete	<p>If an X appears in this cell, it indicates an enabled feature</p> <p>Note: Delete (*DELETE) authority provides the authority to remove entries from an object.</p>
Data Execute	<p>If an X appears in this cell, it indicates an enabled feature</p> <p>Note: Execute (*EXECUTE) authority provides the authority needed to run a program or locate an object in a library.</p>
Object Operation	<p>If an X appears in this cell, it indicates enabled object authority</p> <p>Note: Object operational (*OBJOPR) authority provides the authority to look at the description of an object and use the object as determined by the data authority that the user has to the object.</p>

Object Management	<p>If an X appears in this cell, it indicates enabled object authority</p> <p>Note: Object management (*OBJMGT) authority provides the authority to move or rename the object and add members to database files.</p>
Object Exits	<p>If an X appears in this cell, it indicates enabled object authority</p> <p>Note: Object existence (*OBJEXIST) authority provides the authority to control the object's existence and ownership.</p>
Object Alter	<p>If an X appears in this cell, it indicates enabled object authority</p> <p>Note: Object alter (*OBJALTER) authority provides the authority needed to alter the attributes of an object.</p>
Object Reference	<p>If an X appears in this cell, it indicates enabled object authority</p> <p>Note: Object reference (*OBJREF) authority provides the authority needed to reference an object from another object.</p>
Row Column Access Control	For informational use only. This level of user access is not currently addressed by schemas
Field Procedure	For informational use only. This level of user access is not currently addressed by schemas

Rsc Manager Schema Header Changes

This report displays changes made to the schema header (title/name).

Collector ID: DATABASE_AUDITING

Report ID: RSC_MGR_SCHEMA_HEADERS_CHANGES

To enable this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **4** (Resource Manager).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **4** (Resource Manager Defaults).
- 5) Press **Enter**.
- 6) Enter **Y** as the **Audit Configuration Changes** flag.
- 7) Press **Enter**.

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **4** (Resource Manager).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Resource Manager Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **3** (Resource Manager Change Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **3** (Resource Manager Schema Header Changes).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
--------	-------------

Type	Journal entry code for the type of operation: DL - Record delete PT - Record add PX - Record added by RRN (a relative record number) to a physical file member UB - Record edit (before-change) UP - Record edit (after-change)
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user executing the job
Job Number	Numbered assigned to the job
Program Name	Name of the program used to perform encryption
Program Library	Name of the library in which the program resides
Object Name	Name of object changed
Library Name	Name of the library in which the object resides
Member Name	Name of member
User Profile	Profile name of user executing the change request
System Name	Name of system submitting the change request
Remote Address	IP address used to submit the change request
Schema ID	Name assigned to the schema
Schema Description	Description assigned to the schema
Compliance Status	Flag indicating whether current authority levels defined in the system align with the schema *FAIL - There are discrepancies *PASS - Authority levels and schema align
Alerting Status	Flag indicating whether alerting is enabled: *YES - Alerting is enabled *NO - Alerting is disabled
Last Enforcement Date and Time	Timestamp of last enforcement check
Last Compliance Date and Time	Timestamp of last compliance check

System Value Changes

This report displays changes made to system values. The data relating to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is SV.

Collector ID: JOURNAL_SV

Report ID: *BASE

Tip: For SV journal entries to be generated, the QAUDLVL system value must contain *SECCFG and *SECURITY.

PASS = SV journal entries were not found in QAUDJRN.

FAIL = SV journal entries were found in QAUDJRN.

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **7** (System Value Management).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (System Value Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **1** (System Value Activity Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **1** (System Value Changes).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user executing the job
Job Number	Numbered assigned to the job
Program Name	Name of the program used to perform encryption

Program Library	Name of the library in which the program resides
User Profile	Profile name of the user executing the change request
System Name	Name of system submitting the change request
Remote Address	IP address used to submit the change request
Entry Type	System value type
System Value	Default value
New Value	The value you want to use moving forward
Old Value	The value originally entered

Report Column Description

Description	
Type	Journal entry code for the type of operation: DL - Record delete PT - Record add PX - Record added by RRN (a relative record number) to a physical file member UB - Record edit (before-change) UP - Record edit (after-change)
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user executing the job
Job Number	Numbered assigned to the job
Program Name	Name of the program used to perform encryption

Program Library	Name of the library in which the program resides
Object Name	Name of the object changed
Library Name	Name of the library in which the object resides
Member Name	Name of member
User Profile	Profile name of the user executing the change request
System Name	Name of system submitting the change request
Remote Address	IP address used to submit the change request
Audit Status	Flag indicating whether auditing is enabled Y - Auditing is enabled N - Auditing is disabled Note: Auditing must be enabled to capture data for reporting purposes
Audit Journal Name	Name of audit journal
Audit Journal Library	Library in which audit journal resides
Alert Status	Flag indicating whether alerting is enabled: Y - Alerting is enabled N - Alerting is disabled
Alert Message Queue	Queue in which to store triggered alerts
Alert Message Queue Library	Library in which the message queue resides
Journal Type	Code that identifies the type of journal

Authority Failures

This report displays authority failures that have occurred in the system. The data displayed in this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with these events is AF.

Collector ID: JOURNAL_AF

Report ID: *BASE

Tip: For AF journal entries to be generated, the QAUDLVL system value must contain *AUTFAIL and *PGMFAIL.

PASS = AF journal entries were not found in QAUDJRN.

FAIL = AF journal entries were found in QAUDJRN.

Types of failures:

- A - Not authorized to object
- B - Restricted instruction
- C - Validation failure
- D - Use of unsupported interface, object domain failure
- E - Hardware storage protection error, program constant space violation
- F - ICAPAPI authorization error
- G - ICAPAPI authentication error
- H - Scan exit program
- I - System Java inheritance not allowed
- J - Submit job profile error
- K - Special authority violation
- N - Profile token not a regenerable token
- O - Optical Object Authority Failure
- P - Profile swap error
- R - Hardware protection error
- S - Default sign-on attempt
- T - Not authorized to TCP/IP port
- U - User permission request not valid
- V - Profile token not valid for generating new profile token
- W - Profile token not valid for swap

X - System violation

Y - Not authorized to the current JUID field during a clear JUID operation.

Z - Not authorized to the current JUID field during a set JUID operation

To run this report

- 1) Access the **Main** menu.
- 2) At the **Selection or command** prompt, enter **5** (User Profile Management).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (User Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **1** (User Profile Usage Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **7** (All Authority Failures).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Invalid Sign-on Attempts

This report displays password validation failures. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is PW.

Collector ID: JOURNAL_PW

Report ID: *BASE

Tip: For PW journal entries to be generated, the QAUDLVL system value must contain *AUTFAIL.

PASS = PW Journal entries were not found in QAUDJRN.

FAIL = PW Journal entries were found in QAUDJRN.

Types of failures:

A - APPC bind failure.

C - User authentication with the CHKPWD command failed.

D - Service tools user ID name not valid.

E - Service tools user ID password not valid.

P - Password not valid.

Q - Attempted sign-on (user authentication) failed because the user profile is disabled.

R - Attempted sign-on (user authentication) failed because the password was expired. This audit record might not occur for some user authentication mechanisms. Some authentication mechanisms do not check for expired passwords.

S - SQL Decryption password is not valid.

U - User name not valid.

X - Service tools user ID is disabled.

Y - Service tools user ID not valid.

Z - Service tools user ID password not valid.

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **5** (User Profile Management).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (User Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **1** (User Profile Usage Reports).

- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **5** (Invalid Sign-on Attempts).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Blueprint Id	ID assigned to the blueprint

User Group	Name of user group assigned to blueprint master Note: Modifications made to the blueprint impact this user group.
Blueprint Description	Description of blueprint
Profile Parameters?	Flag indicating whether profile parameters are defined
Profile Authorities?	Flag indicating whether profile authorities are defined
Authority List?	Flag indicating whether profile authorities are defined
3rd Party Integration?	Flag indicating whether 3rd party scripts are defined
Blueprint Alert?	Flag indicating whether alerts are enabled
Inactive Override?	Flag indicating whether inactivity overrides are defined
Inactive Profiles?	Flag indicating whether inactive profiles were identified
Compliance Date	Date on which the blueprint came into effect
Compliance Status	Flag indicating whether all profiles associated with the blueprint are in compliance
Inactivity before Disabled	Number of days the profile was inactive before it was disabled
Inactivity before Delete	Number of days the profile was inactive before it was deleted
Object owner for deleted profiles	Name of the user to whom object ownership was transferred upon deletion of the profile

Blueprint Non-Compliance Changes

This report displays changes made to user profiles that do not comply with the blueprint.

Collector ID: DATABASE_AUDITING

Report ID: BLUEPRINT_NON_COMPLIANCE_CHG

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **5** (User Profile Management).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (User Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **3** (User Profile Change Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **6** (Blueprint Non-Compliance User Profiles).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

Report Column Description

Column	Description
Type	Journal entry code for the type of operation: DL - Record delete PT - Record add PX - Record added by RRN (a relative record number) to a physical file member UB - Record edit (before-change) UP - Record edit (after-change)
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user executing the job
Job Number	Numbered assigned to the job
Program Name	Name of the program used to perform encryption

Program Library	Name of the library in which the program resides
Object Name	Name of object changed
Library Name	Name of the library in which the object resides
Member Name	Name of member
User Profile	Profile name of user executing the change request
System Name	Name of system submitting the change request
Remote Address	IP address used to submit the change request
Blueprint Id	ID assigned to the blueprint
User Name	Name of user
Violation Category	Type of violation
Violation Keyword	Keyword associated with the profile parameter
Violation Description	Description associated with the profile parameter
Current Value	Parameter value defined in the user's profile
Blueprint Value	Parameter value defined in the blueprint
Non-Compliance Reason	Description of violation

Blueprint Object Authority Changes

This report displays changes to object authorities associated with blueprints.

Collector ID: DATABASE_AUDITING

Report ID: BLUEPRINT_OBJECT_AUTH_CHG

To enable this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **5** (User Profile Management).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **7** (User Profile Manager Defaults).
- 5) Press **Enter**.
- 6) Enter **Y** as the **Audit Configuration Changes** flag.
- 7) Press **Enter**.

To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **5** (User Profile Management).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (User Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **3** (User Profile Changes Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **4** (Blueprint Object Authority File).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

NETWORK_ATTRIBUTES	Network Attribute Information	Network	IBMi
NETWORK_CONNECTIONS	Network Connections Ipv4 and Ipv6	Network	IBMi
NETWORK_EXIT_CONFIG	Exit Point Configuration Report	Network	IBMi
NETWORK_INTERFACE_IPV4	Network Interface Data Ipv4	Network	IBMi
NETWORK_INTERFACE_IPV6	Network Interface Data Ipv6	Network	IBMi
NETWORK_ROUTE_IPV4	Network Route Data Ipv4	Network	IBMi
NETWORK_ROUTE_IPV6	Network Route Data Ipv6	Network	IBMi
NETWORK_SERVER_DESCRIPTIONS	Network Server Description Data	Network	IBMi
NETWORK_SVR_ENCRYPT_STATUS	Network Server Encryption Status	Network	IBMi
NETWORK_TCPIP_IPV4	TCP/IP Ipv4 Stack Attributes/Remote Exit Rule	Network	IBMi
NETWORK_TCPIP_IPV6	TCP/IP Ipv6 Stack Attributes/Remote Exit Rule	Network	IBMi
NETWORK_TRANS_CENTRAL	Central Server Transactions	Network	IBMi
NETWORK_TRANS_COMMAND	Remote Command Transactions	Network	IBMi
NETWORK_TRANS_DATABASE	Remote Exit Rules	Network	IBMi
NETWORK_TRANS_DATAQ	Remote Exit Rules	Network	IBMi
NETWORK_TRANS_DDM	Remote Exit Rules	Network	IBMi
NETWORK_TRANS_FILE	Remote Exit Rules	Network	IBMi
NETWORK_TRANS_FTP_REXEC	Remote Exit Rules	Network	IBMi
NETWORK_TRANS_PRINTER	Remote Exit Rules	Network	IBMi

NETWORK_TRANS_SHOWCASE	Network Trans Showcase	Network	IBMi
NETWORK_TRANS_SIGNON	Remote Exit Rules	Network	IBMi
NETWORK_TRANS_TELNET	Remote Exit Rules	Network	IBMi
OBJECT_AUTHORITY	Display Object Authority	Resource	IBMi
OBJECT_DETAILS	Display Object Details	Resource	IBMi
OBJECT_STAT	Object/File Statistics	Resource	IBMi
OUTPUT_QUEUE	Output Queue Information	Configuration	IBMi
PRODUCT_INFO	Basic Information about a software product	Configuration	IBMi
PROFILE_COMPLIANCE	Profile Compliance Data	Profile	IBMi
PROFILE_INACTIVITY_SETTINGS	Profile Inactivity Settings	Profile	IBMi
PROFILE_MANAGER_DEFAULTS	Profile Manager Defaults	Profile	IBMi
PROGRAM_ADOPT	Programs that Adopt Authority	Resource	IBMi
PROGRAM_REFERENCE_DATA	Program Reference Data	Resource	IBMi
PTF_DATA	Program Temporary Fix Data	Configuration	IBMi
QHST_MSG_INFO	QHST History Log Information	Configuration	IBMi
QSYS2.ACTIVE_JOB_INFO	Active job information	Configuration	IBMi
QSYS2.DATA_QUEUE_ENTRIES	Data Queue Entries	Resource	IBMi
QSYS2.DRDA_AUTHENTICATION	DRDA and DDM User access	Configuration	IBMi
QSYS2.EXIT_POINT_INFO	Exit Point Information	Configuration	IBMi
QSYS2.EXIT_PROGRAM_INFO	Exit Program Information	Configuration	IBMi
QSYS2.FUNCTION_INFO	Function usage identifiers	Configuration	IBMi
QSYS2.FUNCTION_USAGE	Function usage configuration details.	Configuration	IBMi
QSYS2.GROUP_PTF_INFO	Group PTFs Information	Configuration	IBMi
QSYS2.JOURNAL_INFO	Journal and remote journal information	Configuration	IBMi
QSYS2.JOURNALED_OBJECTS	Journal object information	Resource	IBMi
QSYS2.LICENSE_INFO	Products license information.	Configuration	IBMi
QSYS2.MEDIA_LIBRARY_INFO	Media Library Status details	Configuration	IBMi

QSYS2.MEMORY_POOL	Memory pool details	Configuration	IBMi
QSYS2.MEMORY_POOL_INFO	Active memory pools	Configuration	IBMi
QSYS2.MESSAGE_QUEUE_INFO	Message Queue	Configuration	IBMi
QSYS2.NETSTAT_JOB_INFO	IPv4 and IPv6 network connection details.	Configuration	IBMi
QSYS2.OBJECT_LOCK_INFO	Object lock information	Configuration	IBMi
QSYS2.OUTPUT_QUEUE_ENTRIES	Spoiled file in output queue	Configuration	IBMi
QSYS2.RECORD_LOCK_INFO	Record lock information	Configuration	IBMi
QSYS2.REPLY_LIST_INFO	Current job's reply list entry information	Configuration	IBMi
QSYS2.SCHEDULED_JOB_INFO	Job Schedule Entry information	Configuration	IBMi
QSYS2.SECURITY_CONFIG	Security Configuration Information	Configuration	IBMi
QSYS2.SERVER_SBS_ROUTING	Alternate subsystem configurations	Configuration	IBMi
QSYS2.SERVER_SHARE_INFO	Server Share Information	Configuration	IBMi
QSYS2.SOFTWARE_PRODUCT	Server Software Product information	Configuration	IBMi
QSYS2.SYSCONTROLS	Permissions or column mask defined	Configuration	IBMi
QSYS2.SYSCONTROLSDEP	Dependencies of row permissions and column masks	Configuration	IBMi
QSYS2.SYSDISKSTAT	Disk Information	Configuration	IBMi
QSYS2.SYSTEM_STATUS_INFO	Partition information	Configuration	IBMi
QSYS2.SYSTMPSTG	IBM i temporary storage pool detail	Configuration	IBMi
QSYS2.TELNET_ATTRIB	TELNET Server Attributes	Network	IBMi
QSYS2.USER_INFO	User Profile Information	Configuration	IBMi
QSYS2.USER_STORAGE	Storage usage by user profile	Configuration	IBMi
REMOTE_TRAN_SUMMARY_BY_SERVER	Remote Summary Server	Network	IBMi
REMOTE_TRAN_SUMMARY_BY_USER	Remote Summary User	Network	IBMi
RSC_MGR_COMPLIANCE_DATA	Resource Manager Authority Out of compliance data	Network	IBMi
RSC_MGR_CONFIG	Resource Manager Configuration	Network	IBMi
RSC_MGR_SCHEMA_DETAILS	Resource Manager Authority Schema Details	Network	IBMi

RSC_MGR_SCHEMA_HEADER	Resource Manager Authority Schema Header	Network	IBMi
SENSITIVE_DATABASE_CONTENT	Sensitive Database Content	Profile	IBMi
SERVICE_TOOL_SECURITY_ATTR	Service Tool Security Attributes	Profile	IBMi
SERVICE_TOOL_USERS	Service Tool User Data	Profile	IBMi
SOCKET_SUMMARY_BY_SERVER	Socket Summary by Server	Network	IBMi
SOCKET_SUMMARY_BY_USER	Socket Summary by User	Network	IBMi
SOCKET_TRAN_RULES	Socket Rules	Network	IBMi
SOCKET_TRANSACTIONS	Socket Transactions	Network	IBMi
SOFTWARE_RESOURCES	Installed Software Resources Data	Configuration	IBMi
SUBSYSTEM_AUTOSTART	Subsystem Autostart Jobs	Configuration	IBMi
SUBSYSTEM_COMMUNICATIONS	Subsystem Communication Entries	Configuration	IBMi
SUBSYSTEM_INFORMATION	Subsystem Information Details	Configuration	IBMi
SUBSYSTEM_JOB_QUEUE	Subsystem Job Queue	Configuration	IBMi
SUBSYSTEM_POOL_DATA	Subsystem Pool Data	Configuration	IBMi
SUBSYSTEM_PRESTART	Subsystem Prestart Jobs	Configuration	IBMi
SUBSYSTEM_REMOTE	Subsystem Remote Entries	Configuration	IBMi
SUBSYSTEM_ROUTING	Subsystem Routing Entries	Configuration	IBMi
SUBSYSTEM_WORKSTATION_NAMES	Subsystem Workstation Names	Configuration	IBMi
SUBSYSTEM_WORKSTATION_TYPES	Subsystem Workstation Types	Configuration	IBMi
SYS_VAL_CONFIG	System Value Configuration	Configuration	IBMi
SYS_VAL_DEFAULT	System Value Default	Configuration	IBMi
SYS_VAL_VALID	System Value Default	Configuration	IBMi
SYSCOLAUTH	Privileges Granted on a Column	Configuration	IBMi
SYSCONTROLS	Permission or Column Mask Defined	Configuration	IBMi
SYSCONTROLSDEP	Dependencies of Row Permissions and Column Masks	Configuration	IBMi
SYSCONTROLSDEP	Privileges Granted on a Row	Configuration	IBMi
SYSFIELDS	Columns with Field Procedures	Configuration	IBMi
SYSPACKAGEAUTH	Privileges Granted on a Package	Configuration	IBMi

SYSPROGRAMSTAT	Program, Service Program, and Module with SQL Statements	Configuration	IBMi
SYSROUTINEAUTH	Privileges Granted on a Routine	Configuration	IBMi
SYSSCHEMAAUTH	Privileges Granted on a Schema	Configuration	IBMi
SYSSEQUENCEAUTH	Privileges Granted on a Sequence	Configuration	IBMi
SYSTABAUTH	Privileges Granted on a Table or View	Configuration	IBMi
SYSTABLESTAT	Table Statistics Include all Partitions and Members	Configuration	IBMi
SYSTEM_VALUES	Display System Value Data	System	IBMi
SYSTOOLS. GROUP_PTF_CURRENCY	PTF Groups Installed per IBM Recommendations	Configuration	IBMi
SYSTOOLS. GROUP_PTF_DETAILS	PTFs within PTF Groups Installed per IBM Recommendations	Configuration	IBMi
SYSUDTAUTH	Privileges Granted on a Type	Configuration	IBMi
SYSVARIABLEAUTH	Privileges Granted on a Global Variable	Configuration	IBMi
SYSXSROBJECTAUTH	Privileges Granted on an XML Schema	Configuration	IBMi
TGMOBJINF	Object Information	Resource	IBMi
TG_NETWORK_GROUPS	TG Network Groups	Network	IBMi
TG_OBJECT_GROUPS	TG Object Groups	Network	IBMi
TG_OPERATION_GROUPS	TG Operation Groups	Network	IBMi
TG_USER_GROUPS	TG User Groups	Network	IBMi
USER_OBJECT_AUTHORITIES	User Profile Object Authorities	Profile	IBMi
USER_PRF_VIA_BLUEPRINT	User Profile via Blueprint	Profile	IBMi
USER_PROFILE_ACTIVITY	User Profile Activity	Profile	IBMi
USER_PROFILE_ARCHIVE	User Profile Archive	Profile	IBMi
USER_PROFILE_EXCLUSIONS	User Profile Exclusions	Profile	IBMi
USER_PROFILES	Display User Profile Data	Profile	IBMi
