

**NetIQ Security Solutions for IBM i**

**TGAudit 3.2**

**Report Reference Guide**

Revised October 2023

## Legal Notice

THIS DOCUMENT AND THE SOFTWARE DESCRIBED IN THIS DOCUMENT ARE FURNISHED UNDER AND ARE SUBJECT TO THE TERMS OF A LICENSE AGREEMENT OR A NON-DISCLOSURE AGREEMENT. EXCEPT AS EXPRESSLY SET FORTH IN SUCH LICENSE AGREEMENT OR NON-DISCLOSURE AGREEMENT, NETIQ CORPORATION PROVIDES THIS DOCUMENT AND THE SOFTWARE DESCRIBED IN THIS DOCUMENT "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. SOME STATES DO NOT ALLOW DISCLAIMERS OF EXPRESS OR IMPLIED WARRANTIES IN CERTAIN TRANSACTIONS; THEREFORE, THIS STATEMENT MAY NOT APPLY TO YOU.

For purposes of clarity, any module, adapter or other similar material ("Module") is licensed under the terms and conditions of the End User License Agreement for the applicable version of the NetIQ product or software to which it relates or interoperates with, and by accessing, copying or using a Module you agree to be bound by such terms. If you do not agree to the terms of the End User License Agreement you are not authorized to use, access or copy a Module and you must destroy all copies of the Module and contact NetIQ for further instructions.

This document and the software described in this document may not be lent, sold, or given away without the prior written permission of NetIQ Corporation, except as otherwise permitted by law. Except as expressly set forth in such license agreement or non-disclosure agreement, no part of this document or the software described in this document may be reproduced, stored in a retrieval system, or transmitted in any form or by any means, electronic, mechanical, or otherwise, without the prior written consent of NetIQ Corporation. Some companies, names, and data in this document are used for illustration purposes and may not represent real companies, individuals, or data.

This document could include technical inaccuracies or typographical errors. Changes are periodically made to the information herein. These changes may be incorporated in new editions of this document. NetIQ Corporation may make improvements in or changes to the software described in this document at any time.

U.S. Government Restricted Rights: If the software and documentation are being acquired by or on behalf of the U.S. Government or by a U.S. Government prime contractor or subcontractor (at any tier), in accordance with 48 C.F.R. 227.7202-4 (for Department of Defense (DOD) acquisitions) and 48 C.F.R. 2.101 and 12.212 (for non-DOD acquisitions), the government's rights in the software and documentation, including its rights to use, modify, reproduce, release, perform, display or disclose the software or documentation, will be subject in all respects to the commercial license rights and restrictions provided in the license agreement.

1. TGAudit Report Reference Guide	10
1.1 What's New	11
1.2 TGAudit Report Reference Introduction	12
1.3 Authority Collection Reports	13
1.3.1 Authority Collection for Object IFS Report	14
1.3.2 Authority Collection for Object Native Report	15
1.3.3 Authority Collection for Users and IFS Report	16
1.3.4 Authority Collection for Users and Native Object Report	17
1.3.5 Authority Collection Report (*ALL)	18
1.4 Configuration Management Reports	19
1.4.1 Access Control List Changes	23
1.4.2 Actions that Affect a Job are Audited	24
1.4.3 Active Job Information	26
1.4.4 Advanced Analysis Command Configuration	27
1.4.5 Adopting Authority from a Program Owner is Audited	28
1.4.6 All Deletions of External Objects on the System are Audited	29
1.4.7 All Object Creations are Audited	31
1.4.8 All Optical Functions are Audited	33
1.4.9 All Security Functions are Audited	35
1.4.10 Alternate Subsystem Configurations	38
1.4.11 Attention Events are Audited	39
1.4.12 Auditing End Action set to Power Down System	40
1.4.13 Authority Changes to Restored Objects	41
1.4.14 Authorization Failures are Audited	42
1.4.15 Authorization List or Object Authority Changes	44
1.4.16 Basic Product Information on the System	45
1.4.17 Certificate Details	46
1.4.18 Certificates Expired	47
1.4.19 Certificates Expiring in 90 Days	48
1.4.20 Change Request Descriptor Changes	49
1.4.21 Columns with Field Procedures	50
1.4.22 Cryptographic Configuration Changes	51
1.4.23 Current Cumulative PTF Level	52
1.4.24 Current Job's Reply List Entry Information	53
1.4.25 Dependencies of Row Permissions and Column Masks	54
1.4.26 Disk Information	55
1.4.27 DRDA and DDM User Access	56
1.4.28 EIM Attribute Changes	57
1.4.29 Environment Variable Changes	58
1.4.30 Exit Point Information	59
1.4.31 Exit Program Information	60
1.4.32 Function Usage Configuration Details	61
1.4.33 Function Usage Identifiers	62
1.4.34 Group PTFs Information	63
1.4.35 IBM i Temporary Storage Pool Detail	64
1.4.36 IPv4 and IPv6 Network Connection Details	65
1.4.37 Installed Products	66
1.4.38 Job and Database Activity	67
1.4.39 Job Description Details	68
1.4.40 Job Descriptions that Contain User Profile Names were Restored	69
1.4.41 Job Descriptions – USER Parameter Changes	70
1.4.42 Job Descriptions with Logging	71
1.4.43 Job Descriptions with Request Data	72
1.4.44 Job Descriptions with Specific Initial Library Lists	73
1.4.45 Job Schedule Entry Information	74
1.4.46 Journal and Remote Journal Information	75
1.4.47 Key Ring File Changes	76
1.4.48 Limit Device Sessions Not Enabled	77
1.4.49 Line Description Details	78
1.4.50 Media Library Status Details	79

1.4.51 Memory Pool Details	80
1.4.52 Message Queue Data by Date Range	81
1.4.53 Message Queue Data for All Queues	82
1.4.54 Message Queue Data QSYSOPR	83
1.4.55 Message Queue Data Severity Greater than 30	84
1.4.56 Message Queue Details	85
1.4.57 Networking and Communications Functions are Audited	86
1.4.58 Object Auditing Attribute Changes	88
1.4.59 Object Lock Information	89
1.4.60 Object Management Tasks are Audited	90
1.4.61 OfficeVision Tasks are Audited	92
1.4.62 Operating System Product Info	94
1.4.63 Output Queue Details	95
1.4.64 Ownership Changes for Restored Objects	96
1.4.65 Partition Information	97
1.4.66 Permission or Column Mask Defined	98
1.4.67 Primary Group Changes for Restored Objects	99
1.4.68 Printing Functions are Audited	100
1.4.69 Product Information on the System	102
1.4.70 Product Registration ID Information	104
1.4.71 Products License Information	105
1.4.72 Products with Load Errors	106
1.4.73 Program Changes to Adopt Owner Authority	107
1.4.74 Program Failures are Audited	109
1.4.75 Programs Restored that Adopt Owner Authority	111
1.4.76 Programs that Adopt Authority were Executed	112
1.4.77 PTF Status for all Products	113
1.4.78 PTFs Applied to the Licensed Internal Code	114
1.4.79 PTFs for WDS	115
1.4.80 PTFs Requiring IPL	116
1.4.81 PTFs that are Loaded but not Applied	117
1.4.82 Record Lock Information	118
1.4.83 Restrict Use of Use Adopted Authority	119
1.4.84 QHST Message Information	120
1.4.85 QHST Messages with Severity Greater Than 40	121
1.4.86 Save and Restore Information is Audited	122
1.4.87 Security Auditing Level	124
1.4.88 Security Configuration Information	125
1.4.89 Security System Values	126
1.4.90 Server Security Data is Retained	129
1.4.91 Server Security User Information Actions	130
1.4.92 Service Tasks are Audited	131
1.4.93 Service Tools Actions	133
1.4.94 Software Product Information	134
1.4.95 Spooled File Functions are Audited	135
1.4.96 Spooled File in Output Queue	136
1.4.97 Storage Usage by User Profile	137
1.4.98 Strong System Security Level	138
1.4.99 Subsystem Autostart Details	139
1.4.100 Subsystem Communication Details	140
1.4.101 Subsystem Information Details	141
1.4.102 Subsystem Job Queue Details	142
1.4.103 Subsystem Pool Data Details	143
1.4.104 Subsystem Prestart Job Details	144
1.4.105 Subsystem Remote Entries	145
1.4.106 Subsystem Routing Entries	146
1.4.107 Subsystem Routing Entry Changes	147
1.4.108 Subsystem Workstation Names	148
1.4.109 Subsystem Workstation Types	149
1.4.110 Superseded PTFs	150

1.4.111 System, User, and Object Auditing Control Configuration	151
1.4.112 System Management Tasks are Audited	152
1.4.113 System Software Resources	154
1.4.114 System Value Changes	155
1.4.115 System Value Configuration Changes	156
1.4.116 System Value Configuration Details	158
1.4.117 System Value Default Changes	160
1.4.118 System Value Defaults	162
1.4.119 System Value Valid Value Changes	164
1.4.120 System Value Valid Values	166
1.4.121 Systems Management Changes	168
1.4.122 Time Adjustment Software Installed	170
1.4.123 User Profile Changes	171
1.4.124 User Profile Information	172
1.5 Databases Management Reports	173
1.5.1 Cross Reference Physical File	174
1.5.2 Data Area Changes	175
1.5.3 Database Access	176
1.5.4 Database Changes	177
1.5.5 Database Content	178
1.5.6 Database Operations	179
1.5.7 Database Operations by Journal	180
1.5.8 Field Level Authorities	181
1.5.9 Row and Column Access Control	182
1.5.10 Schedule Master File	183
1.5.11 Sensitive Database Content	184
1.6 Log Management Reports	185
1.6.1 Job Activity Details	186
1.6.2 Job Activity Summary	187
1.7 Network Management Reports	188
1.7.1 Actions to IP Rules	190
1.7.2 APPN Endpoint Filter Violations	192
1.7.3 Asynchronous Signals Processed	194
1.7.4 Cluster Operations	195
1.7.5 Connections Started, Ended, or Rejected	196
1.7.6 Controller Description Details	198
1.7.7 Controllers and Attached Devices	199
1.7.8 Database Server Initialization Report	200
1.7.9 Database Server Native DB Report	201
1.7.10 Database Server Object Info Report	202
1.7.11 Database Server SQL Requests Report	203
1.7.12 Device Description Data	204
1.7.13 Device Descriptions - *APPC	205
1.7.14 DNS Configuration Details	206
1.7.15 FTP Client Operations - Certificate data	207
1.7.16 Integrated File System Exits Installed	208
1.7.17 Internet Security Management Events	209
1.7.18 Inter-process Communication Events	211
1.7.19 Intrusion Monitor Events	212
1.7.20 NetServer Configuration	214
1.7.21 NetServer Shares	215
1.7.22 Network Attribute Details	216
1.7.23 Network Authentication Events	217
1.7.24 Network Connection Details	219
1.7.25 Network Interface Details IPv4	220
1.7.26 Network Interface Details IPv6	221
1.7.27 Network Route Details IPv4	222
1.7.28 Network Route Details IPv6	223
1.7.29 Network Server Descriptions	224
1.7.30 Network Server Encryption Status	225

1.7.31 Network Servers with Encryption Verified	226
1.7.32 Network Servers with Failed or Unknown Encryption	227
1.7.33 Object Management Changes	228
1.7.34 OfficeVision Mail Services Actions	229
1.7.35 Remote Power On and IPL	230
1.7.36 Remote Service Attribute	231
1.7.37 Remote Sign-on Control	232
1.7.38 Secure Socket Connections	233
1.7.39 Server Sessions Started or Ended	235
1.7.40 Server Share Information	236
1.7.41 Service Status Change Events	237
1.7.42 Sockets-related Exit Points Not Secured	239
1.7.43 SSL Cipher Control and Specification List	240
1.7.44 TCP_IP IPv4 Stack Attributes	242
1.7.45 TCP_IP IPv6 Stack Attributes	243
1.7.46 TELNET Server Attributes	244
1.7.47 Unsecured Remote Server Exit Points	245
1.8 Profile Management Reports	247
1.8.1 All User Profiles	249
1.8.2 Authority Failures	250
1.8.3 Authority Restored for User Profiles	252
1.8.4 Block Password Change	253
1.8.5 Changes to Service Tools Profiles	254
1.8.6 Connection Verifications	256
1.8.7 Directory Server Extensions	257
1.8.8 Disable Profile After Maximum Failed Signon Attempts	258
1.8.9 Duplicate Password Control	259
1.8.10 Enabled IBM Profiles	261
1.8.11 Exceeded Account Limit Events	262
1.8.12 Group Profile Information	264
1.8.13 Group Profiles with *ALLOBJ *SECADM or *SERVICE Special Authorities	265
1.8.14 Group Profiles with Passwords	266
1.8.15 Group Profiles with Special Authorities	267
1.8.16 IBM Profile Details Report	268
1.8.17 Identity Token Events	269
1.8.18 Inactive Job Message Queue	271
1.8.19 Inactive Job Time-out	272
1.8.20 Invalid Sign-on Attempts	273
1.8.21 Limit Adjacent Digits in Password	275
1.8.22 Limit Characters in Password	276
1.8.23 Limit Password Character Positions	277
1.8.24 Limit Repeating Characters in Password	278
1.8.25 Limit Security Officer Device Access	279
1.8.26 Maximum Password Length	280
1.8.27 Minimum Password Length	281
1.8.28 Network Attribute Changes	282
1.8.29 Network Log on and Logoff Events	283
1.8.30 Network Password Errors	285
1.8.31 Network Profile Changes	286
1.8.32 Object Authorities of User Profiles	287
1.8.33 Ownership Changes for Restored Objects0	288
1.8.34 Password Expiration Interval	289
1.8.35 Password Expiration Warning	291
1.8.36 Password Level	292
1.8.37 Password Rules	294
1.8.38 Password Validation Program	295
1.8.39 Powerful User Profiles	296
1.8.40 Profile Object Auditing Values	298
1.8.41 Profile with Password Expiration Interval not *SYSVAL	299
1.8.42 Profiles that are *DISABLED	300

1.8.43 Profiles with Expired Passwords	301
1.8.44 Profiles with Limit Capabilities = *NO	302
1.8.45 Profiles with Multiple Groups	303
1.8.46 Profiles with Pwd = *NONE or *DISABLED	304
1.8.47 Publicly Accessible User Profiles	305
1.8.48 Require Digit in Password	306
1.8.49 Security Officer Profiles	307
1.8.50 Service Tool Security Attributes	308
1.8.51 Swap Profile Events	309
1.8.52 System Service Tools Users	311
1.8.53 User Profile = Password	313
1.8.54 User Profiles Not Used in 90 Days	314
1.8.55 Users with Job Control Special Authority	315
1.8.56 Users with Save System Special Authority	316
1.8.57 Users with Unlimited Device Sessions	317
1.9 Resource Management Reports	318
1.9.1 *PUBLIC User with *RWX Authorities -*PUBLIC with *ALL	321
1.9.2 Actions on Validation Lists	322
1.9.3 Allow Object Restore Option	324
1.9.4 Allow User Domain Objects in Libraries	325
1.9.5 ASCII Files Stored in the IFS	326
1.9.6 Attributes for QSYS.LIB	327
1.9.7 Authorization List Details	328
1.9.8 Authorization Lists with Public Access	329
1.9.9 Authorized Users via Authorization Lists	330
1.9.10 Change Request Descriptors Restored	331
1.9.11 Changed Data Files in Last 30 Days	332
1.9.12 Close Operations on Server Files	333
1.9.13 Commands Available in QSH	335
1.9.14 Commands Executed	336
1.9.15 Configuration Files	338
1.9.16 Create Operations	339
1.9.17 Damages Objects	340
1.9.18 Data Queue Entries	341
1.9.19 Database Files Larger than 100Mb	342
1.9.20 Database Files with Over 1,000,000 Read Operations	343
1.9.21 Database Files with Over 100,000 Delete Operations	344
1.9.22 Database Files with Over 100,000 Insert Operations	345
1.9.23 Database Files with 10000 Delete Records	346
1.9.24 Database Monitoring	347
1.9.25 Db2 Mirror Communication Services	348
1.9.26 Db2 Mirror Product Services	349
1.9.27 Db2 Mirror Replication Services	350
1.9.28 Db2 Mirror Replication State	351
1.9.29 Db2 Mirror Setup Tools	352
1.9.30 Delete Operations	353
1.9.31 Directory Link, Unlink, and Search Operations	355
1.9.32 Directory Search Violations	357
1.9.33 DLO Object Changes	358
1.9.34 DLO Object Reads	359
1.9.35 Dual Optical Object Accesses	360
1.9.36 Exit Point Maintenance Operations	362
1.9.37 File Statistics	364
1.9.38 File Usage Information	366
1.9.39 Files Checked Out Status	367
1.9.40 Files Not Secured by Authorization Lists	368
1.9.41 Files Not Used in the Last 30 Days	369
1.9.42 Files with RWX Authorities	370
1.9.43 HTTP Server and Web Files Status	371
1.9.44 HTTP Server File Authorities	372

1.9.45 IFS Directory Information	373
1.9.46 IFS Files Being Journalled	374
1.9.47 Integrated File System Content	375
1.9.48 Integrated File System Security	376
1.9.49 Job Changes	377
1.9.50 Job Descriptions - USER Parameter Changes	379
1.9.51 Journalled Files	380
1.9.52 Journalled Objects	381
1.9.53 Largest Files Report >100Mb	382
1.9.54 LDAP Operations	383
1.9.55 Library QGPL Database Files not Backed up in 30 Days	385
1.9.56 Library Statistics	386
1.9.57 Maximum sign-on attempts allowed is NOMAX	388
1.9.58 Network Resource Accesses	389
1.9.59 New Data Files in Last 30 Days	391
1.9.60 New Library in Last 30 Days	392
1.9.61 New Objects in the Last 30 Days	393
1.9.62 Object Authority	394
1.9.63 Object Changes	395
1.9.64 Object Details	396
1.9.65 Object Ownership Changes	397
1.9.66 Object Reads	398
1.9.67 Object Source	399
1.9.68 Object Statistics	400
1.9.69 Objects Changed in the Last 30 Days	402
1.9.70 Objects Created in the Last 30 Days	403
1.9.71 Objects Larger than 100MB	404
1.9.72 Objects Owned by QSECOFR	405
1.9.73 Objects Restored	406
1.9.74 Objects Used in the Last 30 Days	407
1.9.75 Optical Volume Accesses	408
1.9.76 Primary Group Changes	410
1.9.77 Printer Output Changes	411
1.9.78 Program Reference Details	413
1.9.79 Programs that Adopt Authority	414
1.9.80 PTF Object Changes	415
1.9.81 PTF Operations	416
1.9.82 Public Access to Commands in QSYS	417
1.9.83 Public Access to Devices	418
1.9.84 Public Access to Journal Receivers in QGPL	419
1.9.85 Public Access to Objects in QGPL	420
1.9.86 Regular Files on the IFS	421
1.9.87 Restored Objects in the Last 30 Days	422
1.9.88 Root *PUBLIC User with *RWX Authorities	423
1.9.89 Single Optical Object Accesses	424
1.9.90 Socket Descriptor Details	426
1.9.91 Source Changes in Last 30 Days	428
1.9.92 Spooled File Actions	429
1.9.93 System Directory Changes	431
1.9.94 System Security Audit Journal Exists	433
1.9.95 TGAudit Report Configuration	434
1.9.96 TGCentral Agent Configuration	436
1.9.97 Unsaved Objects in the Last 30 Days	438
1.9.98 User-defined File Systems (UDFS's)	439
1.9.99 Verify Object on Restore	440
1.10 Appendices	442
1.10.1 APPENDIX - TGAudit Report Reference Revisions	443
1.10.1.1 Version 3.0 - TGAudit Report Reference	444
1.10.1.2 Version 2.5 - TGAudit Report Reference	445
1.10.1.3 Version 2.4 - TGAudit Report Reference	446

1.10.1.4 Version 2.3 - TGAudit Report Reference .....	447
1.10.1.5 Version 2.2 - TGAudit Report Reference .....	448
1.10.1.6 Version 2.1 - TGAudit Report Reference .....	450
1.10.2 APPENDIX - TGAudit Collectors .....	452

# TGAudit Report Reference Introduction

This reference guide provides information about the built-in reports provided in TGAudit. Use this reference guide to learn why a report passed or failed in a pre-defined TGAudit Report Card, as well as learn information about report topics and recommendations on how to address existing vulnerabilities.

 **Note:** Refer to the [TGAudit User Guide](#) for detailed information and concepts on how to use TGAudit.

The TGAudit reports fall into the following categories:

- [Authority Collection Reports](#)
- [Configuration Management Reports](#)
- [Database Management Reports](#)
- [Log Management Reports](#)
- [Network Management Reports](#)
- [Profile Management Reports](#)
- [Resource Management Reports](#)

# Authority Collection Reports

This section includes descriptions of the following **Authority Collection** reports:

- [Authority Collection for Object IFS Report](#)
- [Authority Collection for Object Native Report](#)
- [Authority Collection for Users and IFS Report](#)
- [Authority Collection for Users and Native Object Report](#)
- [Authority Collection Report \(\\*ALL\)](#)

# Authority Collection for Object IFS Report

If a user is enrolled in Authority Collection through the STRAUTCOL command with DLO and file system objects selected for inclusion, then the Authority Collection data collected for IFS objects will be displayed in this report. Information about current and required authorities to applications is displayed for enrolled users.

 **Important:** This report is only available for OS 7.4 or higher.

**Collector ID:** AUTHORITY\_COL\_IFS

**Report ID:** AUTHORITY\_COL\_IFS

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **4** (Authority Collection).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **20** (Authority Collection Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **4** (Auth Collection For Objects IFS Report).
- 7) Press **Enter**.
- 9) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 10) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

## See also

[Resource Management Reports](#)

# Authority Collection for Object Native Report

If a user is enrolled in Authority Collection through the STRAUTCOL command, then the Authority Collection data collected for native (QSYS.LIB) objects will be displayed in this report. Information about current and required authorities to applications is displayed for enrolled users.

 **Important:** This report is only available for OS 7.4 or higher.

**Collector ID:** AUTHORITY\_COL\_OBJECT

**Report ID:** AUTHORITY\_COL\_OBJECT

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **4** (Authority Collection).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **20** (Authority Collection Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **3** (Auth Collection For Objects Native Report).
- 7) Press **Enter**.
- 9) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 10) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

## See also

[Resource Management Reports](#)

# Authority Collection for Users and IFS Report

If a user is enrolled in Authority Collection through the STRAUTCOL command, then the Authority Collection data collected for IFS objects will be displayed in this report and categorized by user. Information about current and required authorities to applications is displayed for enrolled users.

 **Important:** This report is only available for OS 7.3 or higher.

**Collector ID:** AUTHORITY\_COLLECTION

**Report ID:** AUTHORITY\_IFS

## To run this report

- 1) Access the TGAudit **Main** menu.
- 2) At the **Selection or command** prompt, enter **4** (Authority Collection).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Authority Collection Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **2** (Auth Collection For Users and Native Object Report).
- 7) Press **Enter**.
- 8) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see [Run Reports](#).

 **Tip:** Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.

- 9) Press **Enter**. The status of the report is displayed at the bottom of the screen.

# Authority Collection for Users and Native Object Report

If a user is enrolled in Authority Collection through the STRAUTCOL command, then the Authority Collection data collected for native (QSYS.LIB) objects will be displayed in this report and categorized by user. Information about current and required authorities to applications is displayed for enrolled users.

 **Important:** This report is only available for OS 7.3 or higher.

**Collector ID:** AUTHORITY\_COLLECTION

**Report ID:** AUTHORITY\_OBJECTS

## To run this report

- 1) Access the TGAudit **Main** menu.
- 2) At the **Selection or command** prompt, enter **4** (Authority Collection).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (Authority Collection Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **1** (Auth Collection For Users and Native Object Report).
- 7) Press **Enter**.
- 8) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see [Run Reports](#).

 **Tip:** Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.

- 9) Press **Enter**. The status of the report is displayed at the bottom of the screen.

# Authority Collection Report (\*ALL)

If a user is enrolled in Authority Collection through the STRAUTCOL command with DLO and file system objects selected for inclusion, then the Authority Collection data collected for all objects will be displayed in this report. Information about current and required authorities to applications is displayed for enrolled users.

 **Important:** This report is only available for OS 7.4 or higher.

**Collector ID:** AUTHORITY\_COL\_ALL

**Report ID:** AUTHORITY\_COL\_ALL

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **4** (Authority Collection).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **20** (Authority Collection Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **5** (Auth Collection Report \*ALL).
- 7) Press **Enter**.
- 9) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 10) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Access Control List Changes

This report displays changes to Access Control Lists. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is VA.

**Collector ID:** JOURNAL\_VA

**Report ID:** \*BASE

 **Tip:** For VA journal entries to be generated, the QAUDLVL system value must contain \*SECCFG and \*SECURITY.

PASS = VA journal entries were not found in QAUDJRN.

FAIL = VA journal entries were found in QAUDJRN.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (System Configuration Changes Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **21** (Access Control List Changes).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Actions that Affect a Job are Audited

This report displays the values of the QAUDLVL (Auditing level) or QAUDLVL2 (Auditing level extension) system value if \*JOBDDTA is specified.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QAUDLVL\_JOBDDTA

PASS = Value \*JOBDDTA is specified in the QAUDLVL or QAUDLVL2 system value.

FAIL = Value \*JOBDDTA is not specified in QAUDLVL or QAUDLVL2 system value.

Actions that affect a job are audited. (\*JOBDDTA) The following are some examples:

- Job start and stop data
- Hold, release, stop, continue, change, disconnect, end, end abnormal, PSR-attached to prestart job entries
- Changing a thread's active user profile or group profiles

**Note:** \*JOBDDTA is composed of two values to allow you to better customize your auditing. If you specify both of the values, you will get the same auditing as if you specified \*JOBDDTA. The following values make up \*JOBDDTA.

\*JOBDDAS

\*JOBDDGUSR

When you have this value set, the following security audit journal entry types are generated:

JS – A change was made to job data

SG – Asynchronous signals

VC – Connection started or ended

VN – A logon or logoff operation on the network

VS – A server session started or ended

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **2** (Security Configuration System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **2** (Actions that Affect a Job are Audited).

9) Press **Enter**.

10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

11) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Adopting Authority from a Program Owner is Audited

This report displays the values of the QAUDLVL (Auditing level) or QAUDLVL2 (Auditing level extension) system value if \*PGMADP is specified.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QAUDLVL\_PGMADP

PASS = Value \*PGMADP is specified in the QAUDLVL or QAUDLVL2 system value.

FAIL = Value \*PGMADP is not specified in QAUDLVL or QAUDLVL2 system value.

Adopting authority from a program owner is audited. (\*PGMADP)

When you have this value set, the following security audit journal entry types are generated:

AP – A change was made to program adopt

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **2** (Security Configuration System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **3** (Adopting Authority from a Program Owner is Audited).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# All Deletions of External Objects on the System are Audited

This report displays the values of the QAUDLVL (Auditing level) or QAUDLVL2 (Auditing level extension) system value if \*DELETE is specified.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QAUDLVL\_DELETE

PASS = Value \*DELETE is specified in the QAUDLVL or QAUDLVL2 system value.

FAIL = Value \* DELETE is not specified in QAUDLVL or QAUDLVL2 system value.

 **Tip:** All deletions of external objects on the system are audited. (\*DELETE) Objects deleted from library QTEMP are not audited.

When you have this value set, the following security audit journal entry types are generated:

DO – Object deleted. Pending delete committed. Pending create rolled back. Delete pending. Pending delete rolled back.

DI – Object deleted.

XD – Group names (associated with DI entry)

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **2** (Security Configuration System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **4** (All Deletions of External Objects on the System are Audited).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# All Object Creations are Audited

This report displays the values of the QAUDLVL (Auditing level) or QAUDLVL2 (Auditing level extension) system value if \*CREATE is specified.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QAUDLVL\_CREATE

PASS = Value \*CREATE is specified in the QAUDLVL or QAUDLVL2 system value.

FAIL = Value \*CREATE is not specified in QAUDLVL or QAUDLVL2 system value.

All object creations are audited. (\*CREATE) Objects created in library QTEMP are not audited. The following are some examples:

- Newly-created objects
- Objects created to replace an existing object

When you have this value set, the following security audit journal entry types are generated:

CO - Creation of a new object, except creation of objects in QTEMP library.

DI - Object created.

XD - Group names (associated with DI entry)

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **2** (Security Configuration System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **5** (All Object Creations are Audited).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

✔ **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# All Optical Functions are Audited

This report displays the values of the QAUDLVL (Auditing level) or QAUDLVL2 (Auditing level extension) system value if \*OPTICAL is specified.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QAUDLVL\_OPTICAL

PASS = Value \*OPTICAL is specified in the QAUDLVL or QAUDLVL2 system value.

FAIL = Value \* OPTICAL is not specified in QAUDLVL or QAUDLVL2 system value.

All optical functions are audited. (\*OPTICAL) The following are some examples:

- Add or remove optical cartridge
- Change the authorization list used to secure an optical volume
- Open optical file or directory
- Create or delete optical directory
- Change or retrieve optical directory attributes
- Copy, move, or rename optical file
- Copy optical directory
- Back up optical volume
- Initialize or rename optical volume
- Convert backup optical volume to a primary volume
- Save or release held optical file
- Absolute read of an optical volume

When you have this value set, the following security audit journal entry types are generated:

O1 - Single optical object access

O2- Dual optical object access

O3- Optical volume access

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **2** (Security Configuration System Values).

- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **6** (All Optical Functions are Audited).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface..

# All Security Functions are Audited

This report displays the values of the QAUDLVL (Auditing level) or QAUDLVL2 (Auditing level extension) system value if \*SECURITY is specified.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QAUDLVL\_SECURITY

PASS = Value \*SECURITY is specified in the QAUDLVL or QAUDLVL2 system value.

FAIL = Value \*SECURITY is not specified in QAUDLVL or QAUDLVL2 system value.

**Note:** \*SECURITY is composed of several values to allow you to better customize your auditing. If you specify all of the values, you will get the same auditing as if you specified \*SECURITY. The following values make up \*SECURITY.

- \*SECCFG
- \*SEC\_DIRSRV
- \*SEC\_IPC
- \*SEC\_NAS
- \*SEC\_RUN
- \*SEC\_SCKD
- \*SEC\_VFY
- \*SEC\_VLDL

All security-related functions are audited (\*SECURITY).

- Security configuration
- Changes or updates when doing directory service functions
- Changes to inter-process communications
- Network authentication service actions
- Security run time functions
- Socket descriptor
- Use of verification functions
- Changes to validation list objects

When you have this value set, the following security audit journal entry types are generated:

AD - A change was made to the auditing attribute

X1- Identity token

AU - Attribute change

CA - Changes to object authority (authorization list or object)

CP - Create, change, and restore user profiles

CV - Connection verification  
CY - Cryptographic configuration  
DI - Directory services  
DS - DST security officer password reset  
EV - Environment variable  
GR - General purpose audit record  
GS - A descriptor was given  
IP - Inter-process communication event  
JD - Changes to the USER parameter of a job description  
KF - Key ring file name  
NA - Changes to network attributes  
OW - Changes to object ownership  
PA - Changes to programs (CHGPGM) that will now adopt the owner's authority  
PG - Changes to an object's primary group  
PS - Profile swap  
SE - Changes to subsystem routing  
SO - A change was made by server security  
SV - Changes to system values  
VA - Changes to access control list  
VO - Actions on validation lists  
VU - A network profile was changed  
X0 - Network authentication

**To run this report**

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **2** (Security Configuration System Values).
- 7) Press **Enter**.

- 8) At the **Selection or command** prompt, enter the **7** (All Security Functions are Audited).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Alternate Subsystem Configurations

This report returns information about the users who have alternate subsystem configurations for some IBM i servers. When a user profile listed in this view attempts to use TCP/IP to form a connection to the server, an attempt is made to use the alternate subsystem instead of the default subsystem for that server.

**Collector ID:** QSYS2.SERVER\_SBS\_ROUTING

**Report ID:** QSYS2\_SERVER\_SBS\_ROUTING

## To run this report

- 1) Access the TGAudit **Main** menu.
- 2) At the **Selection or command** prompt, enter **30** (Work with Reports).
- 3) Press **Enter**. The **Work with Reports** interface is displayed.
- 4) Locate the desired report using the search and sort options available.
- 5) In the **Opt** field for the desired report, enter **7** (Run).
- 6) Press **Enter**.
- 7) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

# Attention Events are Audited

This report displays the values of the QAUDLVL (Auditing level) or QAUDLVL2 (Auditing level extension) system value if \*ATNEVT is specified.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QAUDLVL\_ATNEVT

PASS = Value \*ATNEVT is specified in the QAUDLVL or QAUDLVL2 system value.

FAIL = Value \*ATNEVT is not specified in QAUDLVL or QAUDLVL2 system value.

 **Tip:** Attention events are audited. (\*ATNEVT) Attention events are conditions that require further evaluation to determine the condition's security significance.

The following is an example: Intrusion monitor events need to be examined to determine whether the condition is an intrusion or a false positive

When you have this value set, it generates security audit journal entries of type IM in QAUDJRN.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **2** (Security Configuration System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **8** (Attention Events are Audited).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Auditing End Action set to Power Down System

This report displays the value of the QAUDENDACN (Auditing End Action) system value if a vulnerability is found.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QAUDENDACN

PASS = System value QRETSVRSEC is set to \*PWRDWNSYS

FAIL = System value QRETSVRSEC is set to \*NOTIFY.

The Auditing End Action system value specifies the action that should be taken by the system when audit records cannot be sent to the auditing journal because of errors that occur when the journal entry is sent.

## To run this report

- 1) Access the TGAudit **Main** menu.
- 2) At the **Selection or command** prompt, enter **30** (Work with Reports).
- 3) Press **Enter**. The **Work with Reports** interface is displayed.
- 4) Locate the desired report using the search and sort options available.
- 5) In the **Opt** field for the desired report, enter **7** (Run).
- 6) Press **Enter**.
- 7) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 8) Press **Enter**.

# Authority Changes to Restored Objects

This report displays authority changes to restored objects. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is RA.

**Collector ID:** JOURNAL\_RA

**Report ID:** \*BASE

 **Tip:** For RA journal entries to be generated, the QAUDLVL system value must contain \*SAVRST. Also, object auditing on the object must be set to \*CHANGE. To set object auditing, use the CHGOBJAUD command.

PASS = RA journal entries were not found in QAUDJRN.

FAIL = RA journal entries were found in QAUDJRN.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (System Configuration Changes Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **10** (Authority Changes to Restored Objects).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Authorization Failures are Audited

This report displays the values of the QAUDLVL (Auditing level) or QAUDLVL2 (Auditing level extension) system value if \*AUTFAIL is specified.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QAUDLVL\_AUTFAIL

PASS = Value \*AUTFAIL is specified in the QAUDLVL or QAUDLVL2 system value.

FAIL = Value \*AUTFAIL is not specified in QAUDLVL or QAUDLVL2 system value.

Authorization failures are audited (\*AUTFAIL). The following are some examples:

- All access failures (sign-on, authorization, job submission)
- Incorrect password or user ID entered from a device

When you have this value set, the following security audit journal entry types are generated:

AF - All Authority Failures

CV - Connection verification - Connection ended abnormally.

DI - Directory services - Authority failures. Password failures.

GR - General purpose audit record - Function registration operations.

KF - Key ring file name - An incorrect password was entered.

IP - Inter-process communication event - Authority failure for an IPC request.

PW - Passwords used that are not valid.

VC - A connection was rejected because of an incorrect password.

VO - Unsuccessful verification of a validation list entry.

VN - A network logon was rejected because of expired account, incorrect hours, incorrect user ID, or incorrect password.

VP - An incorrect network password was used.

X1 - Delegate of identity token failed, Get user from identity token failed, Get user from identity token failed.

XD - Group names (associated with DI entry).

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.

- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **2** (Security Configuration System Values).
- 7) Press **Enter**.

# Networking and Communications Functions are Audited

This report displays the values of the QAUDLVL (Auditing level) or QAUDLVL2 (Auditing level extension) system value if \*NETCMN is specified.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QAUDLVL\_NETCMN

PASS = Value \*NETCMN is specified in the QAUDLVL or QAUDLVL2 system value.

FAIL = Value \* NETCMN is not specified in QAUDLVL or QAUDLVL2 system value.

**Note:** \*NETCMN is composed of several values to allow you to better customize your auditing. If you specify all of the values, you will get the same auditing as if you specified \*NETCMN. The following values make up \*NETCMN.

- \*NETBAS
- \*NETCLU
- \*NETFAIL
- \*NETSCK

Networking and communications functions are audited (\*NETCMN). The following are some examples:

- Network base functions (See \*NETBAS)
- Cluster or cluster resource group operations (See \*NETCLU)
- Network failures (See \*NETFAIL)
- Sockets functions (See \*NETSCK)

When you have this value set, the following security audit journal entry types are generated:

CU - Creation of an object by the cluster control operation.

CV - Connection established. Connection ended normally.

IR - IP rules have been loaded from a file.

IS - Internet security management

ND - Directory search violations

NE - End point violations

SK - Secure sockets connection

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.

- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **2** (Security Configuration System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **12** (Networking and Communications Functions are Audited).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Object Auditing Attribute Changes

This report displays changes made to auditing attributes of objects. The data on this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is AD.

**Collector ID:** JOURNAL\_AD

**Report ID:** \*BASE

 **Tip:** For AD journal entries to be generated, the QAUDLVL system value must contain values \*SECCFG and \*SECURITY. Also, object auditing on the object must be set to \*CHANGE. To set object auditing, use the CHGOBJAUD command.

PASS = AD journal entries were not found in QAUDJRN.

FAIL = AD journal entries were found in QAUDJRN.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (System Configuration Changes Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **1** (Object Auditing Attribute Changes).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Object Management Tasks are Audited

This report displays the values of the QAUDLVL (Auditing level) or QAUDLVL2 (Auditing level extension) system value if \*OBJMGT is specified.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QAUDLVL\_OBJMGT

PASS = Value \*OBJMGT is specified in the QAUDLVL or QAUDLVL2 system value.

FAIL = Value \* OBJMGT is not specified in QAUDLVL or QAUDLVL2 system value.

Generic object tasks are audited (\*OBJMGT). The following are some examples:

- Moves of objects
- Renames of objects

When you have this value set, the following security audit journal entry types are generated:

DI - Object rename

OM - An object was moved to a different library

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **2** (Security Configuration System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **11** (Object Management Tasks are Audited).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# OfficeVision Tasks are Audited

This report displays the values of the QAUDLVL (Auditing level) or QAUDLVL2 (Auditing level extension) system value if \*OFCSRVR is specified.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QAUDLVL\_OFCSRVR

PASS = Value \*OFCSRVR is specified in the QAUDLVL or QAUDLVL2 system value.

FAIL = Value \* OFCSRVR is not specified in QAUDLVL or QAUDLVL2 system value.

OfficeVision tasks are audited (\*OFCSRVR). The following are some examples:

- Changes to the system distribution directory
- Tasks involving electronic mail

When you have this value set, the following security audit journal entry types are generated:

ML - A mail log was opened.

SD - A change was made to the system distribution directory.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).

**Collector ID:** JOURNAL\_RZ

**Report ID:** \*BASE

 **Tip:** For RZ journal entries to be generated, the QAUDLVL system value must contain \*SAVRST. Also, object auditing on the object must be set to \*CHANGE. To set object auditing, use the CHGOBJAUD command.

PASS = RZ journal entries were not found in QAUDJRN.

FAIL = RZ journal entries were found in QAUDJRN.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (System Configuration Changes Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **15** (Primary Group Changes for Restored Objects).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Printing Functions are Audited

This report displays the values of the QAUDLVL (Auditing level) or QAUDLVL2 (Auditing level extension) system value if \*PRTDTA is specified.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QSYS2\_SYSCONROLS

PASS = Value \*PRTDTA is specified in the QAUDLVL or QAUDLVL2 system value.

FAIL = Value \*PRTDTA is not specified in QAUDLVL or QAUDLVL2 system value.

Printing functions are audited (\*PRTDTA). The following are some examples:

- Printing a spooled file
- Printing with parameter SPOOL(\*NO)

When you have this value set, the following security audit journal entry types are generated:

PO - A change was made to printed output

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **2** (Security Configuration System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **14** (Printing Functions are Audited).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Product Information on the System

This report displays all the software license product information available on the system. Information is shown for products that are installed as well as for products that are not installed.

**Collector ID:** PRODUCT\_INFO

**Report ID:** PRODUCT\_INFORMATION

The list of products displayed can be in the following Load States:

- All installed products.
- All supported products.
- All defined products.
- A user-specified subset of all defined products.
- All products that are supported, installed, or both installed and supported.

 **Note:** A product can be supported and unsupported by using the Work with Supported Products (WRKSPTPRD) command. This command is part of the System Manager for i5/OS® licensed program.

A defined product is one which is known to the system. This includes all installed products, but also includes products which are known to the system without the products being installed. For example, V5R4M0 of the System Manager for i5/OS licensed program (5722SM1) is known to the system once V5R4M0 of the operating system is installed. Therefore V5R4M0 of 5722SM1 is a defined product once V5R4M0 of the operating system is installed.

A product is also a defined product when a product definition (\*PRDDFN) object exists for that product on the system.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **8** (Product Information Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **3** (Basic Product Information on the System).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

11) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Product Registration ID Information

This report displays Registration ID information for licensed products. A combination of the registration type and registration value makes up the Registration ID for a product.

**Collector ID:** PRODUCT\_INFO

**Report ID:** PRODUCT\_REGISTRATION

The registration type associated with the product could have the following values:

02	Registration type *PHONE was specified when the product load or product definition was created.
04	The registration value is the same as the registration value for i5/OS®.
08	Registration type *CUSTOMER was specified when the product load or product definition was created.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **8** (Product Information Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **6** (Product Registration ID Information).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Program Changes to Adopt Owner Authority

This report displays the program adopt details. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is PA.

**Collector ID:** JOURNAL\_PA

**Report ID:** \*BASE

 **Tip:** For PA journal entries to be generated, the QAUDLVL system value must contain \*SECCFG and \*SECURITY.

PASS = PA journal entries were not found in QAUDJRN.

FAIL = PA journal entries were found in QAUDJRN.

## Types of entries:

A - Change program to adopt owner's authority.

J - Java program adopts owner's authority.

M - Change object's SETUID, SETGID, or Restricted rename and unlink mode indicator.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **4** (Resource Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Object Activity Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **13** (Program Changes to Adopt Owner Authority).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Program Failures are Audited

This report displays the values of the QAUDLVL (Auditing level) or QAUDLVL2 (Auditing level extension) system value if \*PGMFAIL is specified.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QAUDLVL\_PGMFAIL

PASS = Value \*PGMFAIL is specified in the QAUDLVL or QAUDLVL2 system value.

FAIL = Value \*PGMFAIL is not specified in QAUDLVL or QAUDLVL2 system value.

Program failures are audited (\*PGMFAIL). The following are some examples:

- Blocked instruction
- Validation value failure
- Domain violation

When you have this value set, the following security audit journal entry types are generated:

AF - All authority failures

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).

# Restrict Use of Use Adopted Authority

This report displays the value of the QUSEADPAUT (Use Adopted Authority) system value if a vulnerability is found.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QUSEADPAUT

PASS = System value QUSEADPAUT is set to anything other than \*NONE.

FAIL = System value QUSEADPAUT is set to \*NONE.

The Use Adopted Authority system value defines which users can create programs with the use adopted authority (\*USEADPAUT(\*YES)) attribute. All users can create, change, or update programs and service programs to use adopted authority if the user has the necessary authority to the program or service program.

This value should be set to an authorization list that contains a list of trusted users who are authorized to create programs that can adopt authority.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).

# Save and Restore Information is Audited

This report displays the values of the QAUDLVL (Auditing level) or QAUDLVL2 (Auditing level extension) system value if \*SAVRST is specified.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QAUDLVL\_SAVRST

PASS = Value \*SAVRST is specified in the QAUDLVL or QAUDLVL2 system value.

FAIL = Value \*SAVRST is not specified in QAUDLVL or QAUDLVL2 system value.

Save and restore information is audited (\*SAVRST). The following are some examples:

- When programs that adopt their owner's user profile are restored
- When job descriptions that contain user names are restored
- When ownership and authority information changes for objects that are restored
- When the authority for user profiles is restored
- When a system state program is restored
- When a system command is restored
- When an object is restored

When you have this value set, the following security audit journal entry types are generated:

OR - Object restored

RA - Restore of objects when authority changes

RJ - Restore of job descriptions that contain user profile names

RO - Restore of objects when ownership information changes

RP - Restore of programs that adopt their owner's authority

RQ - A change request descriptor was restored

RU - Restore of authority for user profiles

RZ - The primary group for an object was changed during a restore operation

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).

- 3) Press **Enter**. The **Work with Reports** interface is displayed.
- 4) Locate the desired report using the search and sort options available.
- 5) In the **Opt** field for the desired report, enter **7** (Run).
- 6) Press **Enter**.
- 7) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 8) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

## Report Column Description

System Value	Description
QALWOBJRST	Allow object restore option
QALWUSRDMN	Allow user domain objects in libraries
QAUDCTL	Auditing control
QAUDENDACN	Auditing end action
QAUDFRCLVL	Force auditing data
QAUDLVL	Security auditing level
QAUDLVL2	Security auditing level extension
QCRTAUT	Create default public authority
QCRTOBJAUD	Create object auditing

QDSPSGNINF	Sign-on display information control
QFRCCVNRST	Force conversion on restore
QINACTIV	Inactive job time-out
QINACTMSGQ	Inactive job message queue
QLMTDEVSSN	Limit device sessions
QLMTSECOFR	Limit security officer device access
QMAXSGNACN	Action to take for failed signon attempts
QMAXSIGN	Maximum sign-on attempts allowed
QPWDCHGBLK	Block password change
QPWDEXPITV	Password expiration interval
QPWDEXPWRN	Password expiration warning
QPWDLMTAJC	Limit adjacent digits in password
QPWDLMTCHR	Limit characters in password
QPWDLMTREP	Limit repeating characters in password
QPWDLVL	Password level
QPWDMAXLEN	Maximum password length
QPWDMINLEN	Minimum password length
QPWDPOSDIF	Limit password character positions
QPWDRQDDGT	Require digit in password
QPWDRQDDIF	Duplicate password control
QPWDRULES	Password rules
QPWDVLDPGM	Password validation program
QRETSVRSEC	Retain server security data
QRMTSIGN	Remote sign-on control
QSCANFS	Scan file systems
QSCANFCTL	Scan file systems control
QSECURITY	System security level
QSHRMEMCTL	Shared memory control
QSSLCSL	Secure sockets layer cipher specification list
QSSLCSLCTL	Secure sockets layer cipher control
QSSLPCL	Secure sockets layer protocols

QUSEADPAUT	Use adopted authority
QVFYOBJRST	Verify object on restore

# Server Security Data is Retained

This report displays the value of the QRETSVRSEC (Retain Server Security Data) system value if a vulnerability is found.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QRETSVRSEC

PASS = System value QRETSVRSEC is set to 1.

FAIL = System value QRETSVRSEC is set to 0.

The Retain Server Security Data system value determines whether the security data needed by a server to authenticate a user on a target system through client-server interfaces can be retained on the host system.

It is recommended to retain server security data by setting this value to 1.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **2** (Security Configuration System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **16** (Server Security Data is Retained).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface..

# Server Security User Information Actions

This report displays actions to Server Security User Information. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is SO.

**Collector ID:** JOURNAL\_SO

**Report ID:** \*BASE

 **Tip:** For SO journal entries to be generated, the QAUDLVL system value must contain \*SECCFG and \*SECURITY.

PASS = SO journal entries were not found in QAUDJRN.

FAIL = SO journal entries were found in QAUDJRN.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (System Configuration Changes Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **18** (Server Security User Information Actions).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Service Tasks are Audited

This report displays the values of the QAUDLVL (Auditing level) or QAUDLVL2 (Auditing level extension) system value if \*SERVICE is specified.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QAUDLVL\_SERVICE

PASS = Value \*SERVICE is specified in the QAUDLVL or QAUDLVL2 system value.

FAIL = Value \*SERVICE is not specified in QAUDLVL or QAUDLVL2 system value.

All service commands are audited. (\*SERVICE)

When you have this value set, the following security audit journal entry types are generated:

ST - A change was made by system tools

VV - Service status was changed

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **2** (Security Configuration System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **10** (Service Tasks are Audited).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Spooled File in Output Queue

This report displays the values of the QAUDLVL (Auditing level) or QAUDLVL2 (Auditing level extension) system value if \*SPLFDTA is specified.

**Collector ID:** QSYS2.OUTPUT\_QUEUE\_ENTRIES

**Report ID:** QSYS2\_OUTPUT\_QUEUE\_ENTRIES

PASS = Value \*SPLFDTA is specified in the QAUDLVL or QAUDLVL2 system value.

FAIL = Value \*SPLFDTA is not specified in QAUDLVL or QAUDLVL2 system value.

Spooled file functions are audited. The following are some examples:

- Create, delete, display, copy, hold, and release a spooled file
- Get data from a spooled file (QSPGETSP)
- Change spooled file attributes (CHGSPLFA command)

When you have this value set, the following security audit journal entry types are generated:

SF - A change was made to a spooled output file

## To run this report

- 1) Access the TGAudit **Main** menu.
- 2) At the **Selection or command** prompt, enter **30** (Work with Reports).
- 3) Press **Enter**. The **Work with Reports** interface is displayed.
- 4) Locate the desired report using the search and sort options available.
- 5) In the **Opt** field for the desired report, enter **7** (Run).
- 6) Press **Enter**.
- 7) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 8) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Strong System Security Level

This report displays the value of the QSECURITY (System Security Level) system value if a vulnerability is found.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QSECURITY

PASS = System value QSECURITY is set to 40 or above.

FAIL = System value QSECURITY is less than 40.

The System Security Level system value specifies the level of security on the system.

This value should be set to at least 40.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).

# System, User, and Object Auditing Control Configuration

This report displays the value of the QAUDCTL (Auditing control) system value if \*AUDLVL and \*OBJAUD are not specified.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QAUDCTL

PASS = System value QAUDCTL has both \*AUDLVL and \*OBJAUD specified.

FAIL = System value QAUDCTL does not have both \*AUDLVL and \*OBJAUD specified.

This system value controls whether or not auditing is performed on the system. If \*AUDLVL is specified, then the system auditing configuration in system values QAUDLVL and QAUDLVL2 is activated. If \*OBJAUD is specified, then object and user auditing is enabled for configuration done through the Change Object Auditing (CHGOBJAUD) and Change User Auditing (CHGUSRAUD) commands.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **2** (Security Configuration System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **1** (System, User, and Object Auditing Control Configuration).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# System Management Tasks are Audited

This report displays the values of the QAUDLVL (Auditing level) or QAUDLVL2 (Auditing level extension) system value if \*SYSMGT is specified.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QAUDLVL\_SYSMGT

PASS = Value \*SYSMGT is specified in the QAUDLVL or QAUDLVL2 system value.

FAIL = Value \*SYSMGT is not specified in QAUDLVL or QAUDLVL2 system value.

System management tasks are audited (\*SYSMGT). The following are some examples:

- Hierarchical file system registration
- Changes for Operational Assistant functions
- Changes to the system reply list
- Changes to the DRDA relational database directory
- Network file operations

When you have this value set, the following security audit journal entry types are generated:

DI - Directory services

SM - A change was made by system management

VL - An account limit was exceeded

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.

# System Value Changes

This report displays changes made to system values. The data relating to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is SV.

**Collector ID:** JOURNAL\_SE

**Report ID:** \*BASE

 **Tip:** For SV journal entries to be generated, the QAUDLVL system value must contain \*SECCFG and \*SECURITY.

PASS = SV journal entries were not found in QAUDJRN.

FAIL = SV journal entries were found in QAUDJRN.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (System Configuration Changes Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **20** (System Values Changes).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# System Value Configuration Changes

This report displays changes to the TGSecure System Value Management configuration values.

**Collector ID:** DATABASE\_AUDITING

**Report ID:** SYS\_VAL\_CONFIG

## To run this report

- 1) Access the TGSecure main menu.
- 2) At the **Selection or command** prompt, enter **7** (System Value Management).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter **20** (System Value Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter **3** (System Value Change Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter **1** (System Value Configuration Changes).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report.

- 11) Press **Enter**.

## Report Column Description

Description	
Type	Journal entry code for the type of operation:  <b>DL</b> - Record delete <b>PT</b> - Record add <b>PX</b> - Record added by RRN (a relative record number) to a physical file member <b>UB</b> - Record edit (before-change) <b>UP</b> - Record edit (after-change)
Timestamp	Time at which the remote server attempted communication with the target server
Job Name	Name assigned to the job
User Name	Name of the user executing the job
Job Number	Numbered assigned to the job
Program Name	Name of the program used to perform encryption

Program Library	Name of the library in which the program resides
Object Name	Name of the object changed
Library Name	Name of the library in which the object resides
Member Name	Name of member
User Profile	Profile name of the user executing the change request
System Name	Name of system submitting the change request
Remote Address	IP address used to submit the change request
Audit Status	Flag indicating whether auditing is enabled <b>Y</b> - Auditing is enabled <b>N</b> - Auditing is disabled  <b>Note:</b> Auditing must be enabled to capture data for reporting purposes
Audit Journal Name	Name of audit journal
Audit Journal Library	Library in which audit journal resides
Alert Status	Flag indicating whether alerting is enabled: <b>Y</b> - Alerting is enabled <b>N</b> - Alerting is disabled
Alert Message Queue	Queue in which to store triggered alerts
Alert Message Queue Library	Library in which the message queue resides
Journal Type	Code that identifies the type of journal

# Systems Management Changes

This report displays Systems Management changes. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is SM.

**Collector ID:** JOURNAL\_SM

**Report ID:** \*BASE

 **Tip:** For SM journal entries to be generated, the QAUDLVL system value must contain \*SYSMGT.

PASS = SM journal entries were not found in QAUDJRN.

FAIL = SM journal entries were found in QAUDJRN.

The following are the types of changes:

B - Backup list changed

C - Automatic cleanup options

D - DRDA

F - HFS file system

N - Network file operation

O - Backup options changed

P - Power on/off schedule

S - System reply list

T - Access path recovery times changed

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (System Configuration Changes Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **17** (Systems Management Changes).
- 9) Press **Enter**.

10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

11) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Actions to IP Rules

This report displays actions to IP Rules. The data relating to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is IR.

**Collector ID:** JOURNAL\_IR

**Report ID:** \*BASE

 **Tip:** For IR journal entries to be generated, the QAUDLVL system value must contain \*NETBAS and \*NETCMN.

PASS = IR journal entries were not found in QAUDJRN.

FAIL = IR journal entries were found in QAUDJRN.

## Types of entries

L - IP rules have been loaded from a file.

N - IP rules have been unloaded for an IP Security connection.

P - IP rules have been loaded for an IP Security connection.

R - IP rules have been read and copied to a file.

U - IP rules have been unloaded (removed).

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **3** (Network Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Network Activity Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **9** (Actions to IP Rules).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively**, you can search for any report using the **Work with Reports** (TGWRKRPT) interface.

# APPN Endpoint Filter Violations

This report displays information about APPN Endpoint Filter Violations. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is NE.

**Collector ID:** JOURNAL\_NE

**Report ID:** \*BASE

 **Tip:** For NE journal entries to be generated, the QAUDLVL system value must contain \*NETBAS and \*NETCMN.

PASS = NE journal entries were not found in QAUDJRN.

FAIL = NE journal entries were found in QAUDJRN.

## Types of entries

A - Change to network attribute

T - Change to TCP/IP attribute

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **3** (Network Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Network Activity Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **13** (APPN Endpoint Filter Violations).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively**, you can search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Asynchronous Signals Processed

This report displays information about Asynchronous Signals Processed. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is SG.

**Collector ID:** JOURNAL\_SG

**Report ID:** \*BASE

 **Tip:** For SG journal entries to be generated, the QAUDLVL system value must contain \*JOBDTA.

PASS = SG journal entries were not found in QAUDJRN.

FAIL = SG journal entries were found in QAUDJRN.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **3** (Network Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Network Activity Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **14** (Asynchronous Signals Processed).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively**, you can search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Cluster Operations

This report displays Cluster Operations. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is CU.

**Collector ID:** JOURNAL\_CU

**Report ID:** \*BASE

 **Tip:** For CU journal entries to be generated, the QAUDLVL system value must contain \*NETCLU and \*NETCMN.

PASS = CU journal entries were not found in QAUDJRN.

FAIL = CU journal entries were found in QAUDJRN.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **3** (Network Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Network Activity Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **5** (Cluster Operations).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you can search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Connections Started, Ended, or Rejected

This report displays information for connections that were started, ended, or rejected on the system. The data relating to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is VC.

**Collector ID:** JOURNAL\_VC

**Report ID:** \*BASE

 **Tip:** For VC journal entries to be generated, the QAUDLVL system value must contain \*AUTFAIL and \*JOBDDTA.

PASS = VC journal entries were not found in QAUDJRN.

FAIL = VC journal entries were found in QAUDJRN.

## Types of entries

S - Start

E - End

R - Reject

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **3** (Network Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Network Activity Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **16** (Connections Started, Ended, or Rejected).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

# Intrusion Monitor Events

This report displays information about Intrusion Monitor Events. The data relating to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is IM.

**Collector ID:** JOURNAL\_IM

**Report ID:** \*BASE

 **Tip:** For IM journal entries to be generated, the QAUDLVL system value must contain \*ATNEVT.

PASS = IM journal entries were not found in QAUDJRN.

FAIL = IM journal entries were found in QAUDJRN.

The following are the types of intrusions monitored:

ACKSTORM - TCP ACK storm

ADRPOISN - Address poisoning

FLOOD - Flood event

FRAGGLE - Fraggle attack

ICMPRED - ICMP (Internet Control Message Protocol) redirect

IPFRAG - IP fragment

MALFPKT - Malformed packet

OUTRAW - Outbound Raw

PERPECH - Perpetual echo

PNGDEATH - Ping of death

RESTOPT - Restricted IP options

RESTPROT - Restricted IP protocol

SMURF - Smurf attack

# Network Authentication Events

This report displays information about Network Authentication Events. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is X0.

**Collector ID:** JOURNAL\_X0

**Provider ID:** \*BASE

 **Tip:** For X0 journal entries to be generated, the QAUDLVL system value must contain \*SECNAS and \*SECURITY.

PASS = X0 journal entries were not found in QAUDJRN.

FAIL = X0 Journal entries were found in QAUDJRN.

## Types of entries:

- 1 - Service ticket valid
- 2 - Service principals do not match
- 3 - Client principals do not match
- 4 - Ticket IP address mismatch
- 5 - Decryption of the ticket failed
- 6 - Decryption of authenticator failed
- 7 - Realm is not within client local realms
- 8 - Ticket is a replay attempt
- 9 - Ticket not yet valid
- A - Decrypt of KRB\_AP\_PRIV or KRB\_AP\_SAFE checksum error
- B - Remote IP address mismatch
- C - Local IP address mismatch
- D - KRB\_AP\_PRIV or KRB\_AP\_SAFE timestamp error
- E - KRB\_AP\_PRIV or KRB\_AP\_SAFE replay error
- F - KRB\_AP\_PRIV or KRB\_AP\_SAFE sequence order error
- K - GSS accept — expired credential
- L - GSS accept — checksum error
- M - GSS accept — channel bindings
- N - GSS unwrap or GSS verify expired context

O - GSS unwrap or GSS verify decrypt/decode

P - GSS unwrap or GSS verify checksum error

Q - GSS unwrap or GSS verify sequence error

### To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **3** (Network Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Network Activity Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **19** (Network Authentication Events).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively**, you can search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Object Management Changes

This report displays object management changes. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is OM.

**Collector ID:** JOURNAL\_OM

**Report ID:** \*BASE

 **Tip:** For OM journal entries to be generated, the QAUDLVL system value must contain \*OBJMGT.

PASS = OM journal entries were not found in QAUDJRN.

FAIL = OM journal entries were found in QAUDJRN.

## Types of entries:

M - Object moved to a different library.

R - Object renamed.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **4** (Resource Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Object Activity Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **7** (Object Management Changes).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively**, you can search for any report using the **Work with Reports** (TGWRKRPT) interface.

# OfficeVision Mail Services Actions

This report displays information about mail actions in OfficeVision. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is ML.

**Collector ID:** JOURNAL\_ML

**Report ID:** \*BASE

 **Tip:** For ML journal entries to be generated, the QAUDLVL system value must contain \*OFCSRV.

PASS = ML Journal entries were not found in QAUDJRN.

FAIL = ML Journal entries were found in QAUDJRN.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **3** (Network Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Network Activity Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **11** (OfficeVision Mail Services Actions).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

# Remote Power On and IPL

This report displays the value of the QRMTIPL (Remote Power On and IPL) system value if a vulnerability is found.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QRMTIPL

PASS = System value QRMTIPL is set to 0.

FAIL = System value QRMTIPL is to 1.

The Remote Power On system value defines whether or not turning on power to the system can be done from a remote location.

The recommended value is 0.

## To run this report

- 1) Access the TGAudit **Main** menu.
- 2) At the **Selection or command** prompt, enter **30** (Work with Reports).
- 3) Press **Enter**. The **Work with Reports** interface is displayed.
- 4) Locate the desired report using the search and sort options available.
- 5) In the **Opt** field for the desired report, enter **7** (Run).
- 6) Press **Enter**.
- 7) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 8) Press **Enter**.

# Remote Service Attribute

This report displays the value of the QRMTSRVATR (Remote Service Attribute) system value if a vulnerability is found.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QRMTSRVATR

PASS = System value QRMTSRVATR is set to 0.

FAIL = System value QRMTSRVATR is to 1.

The Remote service attribute system value specifies if service attributes can be changed from a remote location.

The recommended value is 0.

## To run this report

- 1) Access the TGAudit **Main** menu.
- 2) At the **Selection or command** prompt, enter **30** (Work with Reports).
- 3) Press **Enter**. The **Work with Reports** interface is displayed.
- 4) Locate the desired report using the search and sort options available.
- 5) In the **Opt** field for the desired report, enter **7** (Run).
- 6) Press **Enter**.
- 7) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 8) Press **Enter**.

# Remote Sign-on Control

This report displays the value of the QRMTSIGN (Remote Sign-on Control) system value if a vulnerability is found.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QRMTSIGN

PASS = System value QRMTSIGN is set to 1.

FAIL = System value QRMTSIGN is to 0.

The Remote Sign-on Control system value specifies how the system handles remote sign-on requests.

The recommended value is 1.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **3** (Network Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **2** (Network Settings Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **1** (Remote Sign-on Control).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively**, you can search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Secure Socket Connections

This report displays information about Secure Socket Connections. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is SK.

**Collector ID:** JOURNAL\_SK

**Report ID:** \*BASE

 **Tip:** For SK journal entries to be generated, the QAUDLVL system value must contain \*NETCMN, \*NETFAIL, and \*NETSCK.

PASS = SK journal entries were not found in QAUDJRN.

FAIL = SK journal entries were found in QAUDJRN.

## Types of entries:

A - Accept

C - Connect

D - DHCP address assigned

F - Filtered mail

P - Port unavailable

R - Reject mail

U - DHCP address not assigned

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **3** (Network Reports).

# Sockets-related Exit Points Not Secured

This report evaluates whether or not exit programs are installed on the sockets-related exit points.

**Collector ID:** EXIT\_POINTS

**Report ID:** SOCKET\_EXITS

PASS = Exit point programs are installed on sockets-related exit points or server is i5/OS release less than 7.1.

FAIL = No exit point programs are installed on socket-related exit points.

Clients for newer remote servers, such as Secure File Transfer Protocol (SFTP) and Secure Shell (SSH), communicate with i5/OS through sockets instead of the more well-known remote server exit points. There are also many applications that connect directly to the IBM i through proprietary protocols using socket communication. Since i5/OS 7.1, there are socket-related exit points available to help monitor and secure network traffic through sockets on your system.

At a minimum, exit point programs should be installed on socket-related exit points so you can monitor who is accessing the data on your system.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **3** (Network Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **2** (Network Settings Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **3** (Sockets-related Exit Points Not Secured).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you can search for any report using the **Work with Reports** (TGWRKRPT) interface.

## See also

[Network Management Reports](#)

# SSL Cipher Control and Specification List

This report displays the values of the QSSLCSL (SSL Cipher Specification List) and QSSLCSLCTL (SSL Specification List) system values if a vulnerability is found.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** SECURE\_SOCKET

PASS = System value QSSLCSL is \*OPSYS and QSSLCSLCTL is \*OPSYS.

FAIL = System value QSSLCSL is not \*OPSYS and system value QSSLCSLCTL is not \*OPSYS.

The Secure Sockets Layer (SSL) cipher specification list specifies the list of cipher suites that are supported by System SSL. The shipped value is \*RSA\_AES\_128\_CBC\_SHA, \*RSA\_RC4\_128\_SHA, \*RSA\_RC4\_128\_MD5, \*RSA\_AES\_256\_CBC\_SHA, \*RSA\_3DES\_EDE\_CBC\_SHA, \*RSA\_DES\_CBC\_SHA, \*RSA\_EXPORT\_RC4\_40\_MD5, \*RSA\_EXPORT\_RC2\_CBC\_40\_MD5, \*RSA\_NULL\_SHA, and \*RSA\_NULL\_MD5.

You must have \*IOSYSCFG, \*ALLOBJ, and \*SECADM special authorities to change this system value.

System SSL uses the sequence of the values in QSSLCSL to order the System SSL default cipher specification list. The default cipher specification list entries are system defined and can change on release boundaries. A default cipher removed from QSSLCSL results in the cipher's removal from the default list. The default cipher is added back to the default cipher specification list when it is added back into QSSLCSL. It is not possible to add other ciphers to the default list beyond the system-defined set for the release.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.

# Unsecured Remote Server Exit Points

This report evaluates whether or not exit programs are installed on remote server exit points.

**Collector ID:** EXIT\_POINTS

**Report ID:** UNSECURED\_REMOTE\_EXITS

PASS = Exit programs are installed on remote server exit points.

FAIL = Exit programs are NOT installed on all remote server exit points.

Communication for ODBC, FTP, and TELNET transactions, along with transactions for numerous other remote servers such as RMTCMD, DDM, etc., pass through remote server exit points. Exit programs can be installed on remote server exit points to monitor and secure transactions. It is important to know who is accessing the data on your system so you can verify if the access is authorized or not.

While it is best to implement object-level and Integrated File System (IFS) security to protect your system, sometimes, due to application limitations, it may not be possible to implement this type of security effectively and an application may break if object-level security is implemented. In a situation like this, it is recommended you monitor all your remote connections and the data access. Remote server exit points are your only option in these scenarios.

At a minimum, it is recommended to have exit point programs monitoring remote server exit points so you can review who is accessing your data.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **3** (Network Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **2** (Network Settings Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **4** (Unsecured Remote Server Exit Points).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you can search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Profile Management Reports

This section includes descriptions of the following **Profile Management** reports:

- All User Profiles
- Authority Failures
- Authority Restored for User Profiles
- Block Password Change
- Changes to Service Tools Profiles
- Connection Verifications
- Directory Server Extensions
- Disable Profile After Maximum Failed Signon Attempts
- Duplicate Password Control
- Enabled IBM Profiles
- Exceeded Account Limit Events
- Group Profile Information
- Group Profiles with \*ALLOBJ \*SECADM or \*SERVICE Special Authorities
- Group Profiles with Passwords
- Group Profiles with Special Authorities
- IBM Profile Details Report
- Identity Token Events
- Inactive Job Message Queue
- Inactive Job Time-out
- Invalid Sign-on Attempts
- Limit Adjacent Digits in Password
- Limit Characters in Password
- Limit Password Character Positions
- Limit Repeating Characters in Password
- Limit Security Officer Device Access
- Maximum Password Length
- Minimum Password Length
- Network Attribute Changes
- Network Log on and Logoff Events
- Network Password Errors
- Network Profile Changes
- Object Authorities of User Profiles
- Ownership Changes for Restored Objects0
- Password Expiration Interval
- Password Expiration Warning
- Password Level

# All User Profiles

This report displays a list of all the user profiles that exist on the system and their associated settings.

**Collector ID:** USER\_PROFILES

**Report ID:** AllUSERS

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Profile Configuration Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **5** (All User Profiles).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Authority Failures

This report displays information about restoring user profiles. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is AF.

**Collector ID:** JOURNAL\_AF

**Report ID:** \*BASE

**Tip:** For AF journal entries to be generated, the QAUDLVL system value must contain \*AUTFAIL and \*PGMFAIL.

PASS = AF journal entries were not found in QAUDJRN.

FAIL = AF journal entries were found in QAUDJRN.

## Types of failures

A - Not authorized to object

B - Restricted instruction

C - Validation failure

D - Use of unsupported interface, object domain failure

E - Hardware storage protection error, program constant space violation

F - ICAPI authorization error

G - ICAPI authentication error

H - Scan exit program

I - System Java inheritance not allowed

J - Submit job profile error

K - Special authority violation

N - Profile token not a regenerable token

O - Optical Object Authority Failure

P - Profile swap error

R - Hardware protection error

S - Default sign-on attempt

T - Not authorized to TCP/IP port

U - User permission request not valid

V - Profile token not valid for generating new profile token

W - Profile token not valid for swap

X - System violation

Y - Not authorized to the current JUID field during a clear JUID operation.

Z - Not authorized to the current JUID field during a set JUID operation

### To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **3** (Network Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Network Activity Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **4** (All Authority Failures).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Authority Restored for User Profiles

This report displays information about restoring authority to user profiles. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is RU. These entries are generated by using the RSTAUT command.

**Collector ID:** JOURNAL\_RU

**Report ID:** \*BASE

 **Tip:** For RU journal entries to be generated, the QAUDLVL system value must contain \*SAVRST.

PASS = RU journal entries were not found in QAUDJRN.

FAIL = RU journal entries were found in QAUDJRN.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Profile Activity Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **5** (Authority Restored for User Profiles).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

[Profile Management Reports](#)

# Block Password Change

This report displays the value of the QPWDCHGBLK (Block Password Change) system value if a vulnerability is found.

**Collector ID:** JOURNAL\_CA

**Report ID:** \*BASE

PASS = System value QPWDCHGBLK is set to a value other than \*NONE

FAIL = System value QPWDCHGBLK is set to \*NONE.

The Block Password Change system value specifies the time period during which a password is blocked from being changed following the prior successful password change operation. This system value does not restrict password changes made by the Change User Profile (CHGUSRPRF) command.

Consider changing this value from 1-99 to specify the number of hours before the next password change can be made after a successful password change.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **3** (Password-related System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **1** (Block Password Change).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Changes to Service Tools Profiles

This report displays changes to Service Tools profiles. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is DS.

**Collector ID:** JOURNAL\_DS

**Report ID:** \*BASE

 **Tip:** For DS journal entries to be generated, the QAUDLVL system value must contain \*SECCFG and \*SECURITY.

PASS = DS journal entries were not found in QAUDJRN.

FAIL = DS journal entries were found in QAUDJRN.

## Types of entries

A - Reset of a service tools user ID password

C - Change to a service tools user ID

P - Service tools user ID password was changed

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Profile Activity Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **2** (Changes to Service Tools Profiles).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Connection Verifications

This report displays information about Connection Verification events. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is CV.

**Collector ID:** JOURNAL\_CV

**Report ID:** \*BASE

 **Tip:** For CV journal entries to be generated, the QAUDLVL system value must contain \*AUTFAIL, \*NETBAS, \*NETCMN, and \*SECURITY.

PASS = CV journal entries were not found in QAUDJRN.

FAIL = CV journal entries were found in QAUDJRN.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **3** (Network Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Network Activity Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **6** (Connection Verifications).
- 9) Press **Enter**.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Directory Server Extensions

This report displays changes to Directory Server Extensions. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is XD.

**Collector ID:** JOURNAL\_XD

**Report ID:** \*BASE

 **Tip:** For XD journal entries to be generated, the QAUDLVL system value must contain \*AUTFAIL, \*CREATE, and \*DELETE.

PASS = XD journal entries were not found in QAUDJRN.

FAIL = XD journal entries were found in QAUDJRN.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **1** (Configuration Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (System Configuration Changes Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **22** (Directory Server Extensions).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

[Profile Management Reports](#)

# Disable Profile After Maximum Failed Signon Attempts

This report displays the value of the QMAXSGNACN (Action to Take for Failed Sign-on Attempts) system value if the value is 1 (Disable Device Only).

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QMAXSGNACN

PASS = System value QMAXSGNACN is set to 2 or 3.

FAIL = System value QMAXSGNACN is not set to 1.

The Action to Take for Failed Sign-on Attempts system value specifies how the system reacts when the maximum number of consecutive, incorrect, sign-on attempts (see system value QMAXSIGN) is reached. A change to this system value takes effect the next time someone attempts to sign on the system.

## To run this report

- 1) Access the TGAudit **Main** menu.
- 2) At the **Selection or command** prompt, enter **30** (Work with Reports).
- 3) Press **Enter**. The **Work with Reports** interface is displayed.
- 4) Locate the desired report using the search and sort options available.
- 5) In the **Opt** field for the desired report, enter **7** (Run).
- 6) Press **Enter**.
- 7) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 8) Press **Enter**.

[Profile Management Reports](#)

# Duplicate Password Control

This report displays the value of the QPWDRQDDIF (Duplicate Password Control) system value if the value is 0 or is greater than 4.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QPWDRQDDIF

PASS = System value QPWDRQDDIF is set to 1, 2, or 3.

FAIL = System value QPWDRQDDIF is set to 0 or a value greater than 4.

The Duplicate Password Control system value limits how often a user can repeat the use of a password.

0 = Can be the same as old passwords

1 = Cannot be the same as last 32

2 = Cannot be the same as last 24

3 = Cannot be the same as last 18

4 = Cannot be the same as last 12

5 = Cannot be the same as last 10

6 = Cannot be the same as last 8

7 = Cannot be the same as last 6

8 = Cannot be the same as last 4

It is recommended to set this system value to 1, 2, or 3 to increase password security on your system.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **3** (Password-related System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **12** (Duplicate Password Control).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

11) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Exceeded Account Limit Events

This report displays information about Account Limit Exceeded events. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is VL.

(\*Obsolete in 7.2.)

**Collect ID:** JOURNAL\_VL

**Report ID:** \*BASE

 **Tip:** For VL journal entries to be generated, the QAUDLVL system value must contain \*SYSMGT.

PASS = VL journal entries were not found in QAUDJRN.

FAIL = VL journal entries were found in QAUDJRN.

## Types of entries

A - Account expired

D - Account disabled

L - Logon hours exceeded

U - Unknown or unavailable

W - Workstation not valid

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).

# Identity Token Events

This report displays Identity Token events. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is X1.

**Collector ID:** JOURNAL\_X1

**Report ID:** \*BASE

 **Tip:** For X1 journal entries to be generated, the QAUDLVL system value must contain \*AUTFAIL, \*SECURITY, and \*SECVFY.

PASS = X1 journal entries were not found in QAUDJRN.

FAIL = X1 journal entries were found in QAUDJRN.

## Types of entries

D - Delegate of identity token was successful

F - Delegate of identity token failed

G - Get user from identity token was successful

U - Get user from identity token failed

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Profile Activity Reports).
- 7) Press **Enter**.

[Profile Management Reports](#)

# Inactive Job Message Queue

This report displays the value of the QINACTMSGQ (Inactive Job Message Queue) system value if a vulnerability is found.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QINACTMSGQ

PASS = System value QINACTMSGQ is \*ENDJOB or \*DSCJOB.

FAIL = System value QINACTMSGQ is set to a message queue.

The Inactive Message Queue system value specifies the action the system takes when an interactive job has been inactive for an interval of time (the time interval is specified by the system value QINACTITV). The interactive job can be ended, disconnected, or message CPI1126 can be sent to the message queue you specify. The message queue must exist in the system auxiliary storage pool (ASP) or in a basic user ASP.

If the specified message queue does not exist or is damaged when the inactive time-out interval is reached, the messages are sent to the QSYSOPR message queue.

All of the messages in the specified message queue are cleared during an IPL. If you assign a user's message queue to be QINACTMSGQ, the user loses all messages that are in the user's message queue during each IPL.

A change to this system value takes effect immediately. The shipped value is \*ENDJOB.

## To run this report

- 1) Access the TGAudit **Main** menu.
- 2) At the **Selection or command** prompt, enter **30** (Work with Reports).
- 3) Press **Enter**. The **Work with Reports** interface is displayed.
- 4) Locate the desired report using the search and sort options available.
- 5) In the **Opt** field for the desired report, enter **7** (Run).
- 6) Press **Enter**.
- 7) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 8) Press **Enter**.

# Inactive Job Time-out

This report displays the value of the QINACTITV (Inactive Job Time-out) system value if the value is \*NONE.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QINACTITV

PASS = System value QINACTITV is not \*NONE.

FAIL = System value QINACTITV is \*NONE.

The Inactive Job Time-out system value specifies when the system takes action on inactive interactive jobs. The system value QINACTMSGQ determines the action the system takes. Local jobs that are currently signed-on to a remote system are excluded. For example, a work station is directly attached to system A, and system A has QINACTITV set on. If display station pass-through or TELNET is used to sign on to system B, this work station is not affected by the QINACTITV value set on system A.

 **Note:** A change to this system value takes effect immediately.

## To run this report

- 1) Access the TGAudit **Main** menu.
- 2) At the **Selection or command** prompt, enter **30** (Work with Reports).
- 3) Press **Enter**. The **Work with Reports** interface is displayed.
- 4) Locate the desired report using the search and sort options available.
- 5) In the **Opt** field for the desired report, enter **7** (Run).
- 6) Press **Enter**.
- 7) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 8) Press **Enter**.

# Invalid Sign-on Attempts

This report displays password validation failures. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is PW.

**Collector ID:** JOURNAL\_PW

**Report ID:** \*BASE

 **Tip:** For PW journal entries to be generated, the QAUDLVL system value must contain \*AUTFAIL.

PASS = PW Journal entries were not found in QAUDJRN.

FAIL = PW Journal entries were found in QAUDJRN.

## Types of entries

A - APPC bind failure.

C - User authentication with the CHKPWD command failed.

D - Service tools user ID name not valid.

E - Service tools user ID password not valid.

P - Password not valid.

Q - Attempted sign-on (user authentication) failed because the user profile is disabled.

R - Attempted sign-on (user authentication) failed because the password was expired. This audit record might not occur for some user authentication mechanisms. Some authentication mechanisms do not check for expired passwords.

S - SQL Decryption password is not valid.

U - User name not valid.

X - Service tools user ID is disabled.

Y - Service tools user ID not valid.

Z - Service tools user ID password not valid.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Profile Activity Reports).

- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **4** (Invalid Sign-on Attempts).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Limit Adjacent Digits in Password

This report displays the value of the QPWDLMTAJC (Limit Adjacent Digits in Password) system value if a vulnerability is found.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QPWDLMTCHR

PASS = System value QPWDLMTAJC is set to 1 or higher.

FAIL = System value QPWDLMTAJC is set to 0.

The Limit Adjacent Digits in Password system value specifies whether adjacent numbers are allowed in passwords. This makes it difficult to guess passwords by preventing the use of dates or social security numbers as passwords.

Consider setting the value to limit adjacent digits in passwords to 1 or more, according to your password policy. Be sure to balance complexity and usability in your password policy.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **3** (Password-related System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **4** (Limit Adjacent Digits in Password).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Limit Characters in Password

This report displays the value of the QPWDLMTCHR (Limit Characters in Password) system value if a vulnerability is found.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QPWDLMTCHR

PASS = System value QPWDLMTCHR is set to a value other than \*NONE.

FAIL = System value QPWDLMTCHR is set to \*NONE.

The Limit Characters in a Password system value provides password security by preventing certain characters (vowels, for example) from being in a password. This makes it difficult to guess passwords by preventing the use of common words or names as passwords.

Consider setting the value to limit characters in passwords to 1 or more, according to your password policy. Be sure to balance complexity and usability in your password policy.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **3** (Password-related System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **5** (Limit Characters in Password).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Limit Password Character Positions

This report displays the value of the QPWDPOSDIF (Limit Password Character Positions) system value if a vulnerability is found.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QPWDPOSDIF

PASS = System value QPWDPOSDIF is not set to 0.

FAIL = System value QPWDPOSDIF is set to 0.

The Limit Password Character Positions system value controls the position of characters in a new password. This prevents the user from specifying the same character in a password corresponding to the same position in the previous password. For example, new password DJS2 could not be used if the previous password was DJS1 (the D, J, and S are in the same positions).

 **Tip:** Consider setting this system value to limit 1 or more password character positions. Be sure to balance complexity and usability in your password policy.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **3** (Password-related System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **10** (Limit Password Character Positions).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Limit Repeating Characters in Password

This report displays the value of the QPWDLMTREP (Limit Repeating Characters in Password) system value if a vulnerability is found.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QPWDLMTREP

PASS = System value QPWDLMTREP is not set to 0.

FAIL = System value QPWDLMTREP is set to 0.

The Limit Repeating Characters in Password system value prevents a user from using the same character more than once in the same password. (For example, AAAA.)

 **Tip:** Consider limiting repeating characters in passwords and set this value to a value higher than 0, according to your password policy. Be sure to balance complexity and usability in your password policy.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **3** (Password-related System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **6** (Limit repeating Characters in Password).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Maximum Password Length

This report displays the value of the QPWDMAXLEN (Maximum Password Length) system value if a vulnerability is found.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QPWDMAXLEN

PASS = System value QPWDMAXLEN is set to 10 or higher.

FAIL = System value QPWDMAXLEN is set less than 10.

The Maximum Password Length system value specifies the maximum number of characters in a password.

 **Tip:** It is recommended to set this value to a minimum of 10.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.

# Minimum Password Length

This report displays the value of the QPWDMINLEN (Minimum Password Length) system value if the value is less than 7.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QPWDMINLEN

PASS = System value QPWDMINLEN is set to 7 or higher.

FAIL = System value QPWDMINLEN is set less than 7.

The Minimum Password Length system value specifies the minimum number of characters in a password.

 **Tip:** It is recommended to set this value at 7 or higher.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.

# Password Expiration Interval

This report displays the value of the QPWDEXPITV (Password Expiration Interval) system value if the value is \*NOMAX or greater than 90.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QPWDEXPITV

PASS = System value QPWDEXPITV is set to 90 or less.

FAIL = System value QPWDEXPITV is set to \*NOMAX or a value greater than 90.

The Password Expiration Interval system value specifies the number of days for which passwords are valid. This provides password security by requiring users to change their passwords after a specified number of days. If the password is not changed within the specified number of days, the user cannot sign-on until the password is changed.

Seven days before the password ends, you are warned at sign-on time, even if you are not displaying sign-on information (see system value QDSPSGNINF).

 **Tip:** 90 days is a good standard for the password expiration interval.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **3** (Password-related System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **2** (Password Expiration Interval).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Password Expiration Warning

This report displays the value of the QPWDEXPWRN (Password Expiration Warning) system value if the value is less than 14.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QPWDEXPWRN

PASS = System value QPWDEXPWRN is 14 or greater.

FAIL = System value QPWDEXPWRN is set to less than 14.

The Password Expiration Warning system value controls the number of days prior to a password expiring to begin displaying password expiration warning messages on the Sign-on Information display.

 **Tip:** It is recommended to set this value to 14 days or more.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **3** (Password-related System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **3** (Password Expiration Warning).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

[Profile Management Reports](#)

# Password Level

This report displays the value of the QPWDLVL (Password Level) system value if the value is set to 0.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QPWDLVL

PASS = System value QPWDLVL is not set to 0.

FAIL = System value QPWDLVL is set to 0.

The Password Level system value specifies the level of password support on the system. The password level of the system can be set to allow user profile passwords of 1-10 characters or to allow user profile passwords of 1-128 characters.

The password level can be set to allow a 'passphrase' as the password value. The term 'passphrase' is sometimes used in the computer industry to describe a password value which can be very long and has few, if any, restrictions on the characters used in the password value. Blanks can be used between letters in a passphrase, which allows you to have a password value that is a sentence or sentence fragment.

Changing the password level of the system from 1-10 character passwords or 1-128 character passwords requires careful consideration. If your system communicates with other systems in a network, then all systems must be able to handle the longer passwords.

A change to this system value takes effect at the next IPL. To see the current and pending password level values, use the CL command Display Security Attributes (DSPSECA). The shipped value is 0.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **3** (Password-related System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **7** (Password Level).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Password Rules

This report displays the value of the QPWDRULES (Password Rules) system value if the value is not \*PWDSYSVAL.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QPWDRULES

PASS = System value QPWDRULES is set to \*PWDSYSVAL.

FAIL = System value QPWDRULES is not set to \*PWDSYSVAL.

The Password Rules system value specifies the rules used to check whether a password is formed correctly.

 **Note:** Changes made to this system value take effect the next time a password is changed. The shipped value is \*PWDSYSVAL.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **3** (Password-related System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **13** (Password Rules).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

[Profile Management Reports](#)

# Password Validation Program

This report displays the value of the QPWDVLDPGM (Password Validation Program) system value if the value is not \*NONE.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QPWDVLDPGM

PASS = System value QPWDVLDPGM is set to \*NONE.

FAIL = System value QPWDVLDPGM is not set to \*NONE.

The Password Validation Program system value provides the ability for a user-written program to do additional validation on passwords. The program must exist in the system auxiliary storage pool (ASP) or in a basic user ASP.

Since a password validation program receives passwords in clear text, there is a risk of the program capturing and storing passwords. These programs should be used with extreme caution.

 **Tip:** It is recommended to set this value to \*NONE. If a password validation program must exist, ensure it is designed securely and is from a trusted source.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **3** (Password-related System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **14** (Password Validation Program).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Powerful User Profiles

This report displays information about the user profiles on your system that have \*SECOFR user class or have \*ALLOBJ or \*SECADM special authorities.

**Collector ID:** USER\_PROFILES

**Report ID:** POWER\_USERS

PASS = 3 or fewer user profiles with \*SECOFR user class or \*ALLOBJ or \*SECADM special authorities were found on your system.

FAIL = More than three user profiles with \*SECOFR user class or \*ALLOBJ or \*SECADM special authorities were found on your system.

Special authorities determine the level of access a user profile has on the system.

## Types of Special Authorities

\*ALLOBJ – All object authority

\*SECADM – Security administrator authority

\*JOBCTL – Job control authority

\*SPLCTL – Spool control authority

\*SAVSYS – Save system authority

\*SERVICE – Service authority

\*AUDIT – Audit authority

\*IOSYSCFG – System configuration authority

**Tip:** It is recommended to minimize the number of user profiles with special authorities on your system. Assign the minimum authority necessary when creating user profiles. Also, periodically review user profiles to ensure assigned special authorities are still required.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Profile Configuration Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **1** (Powerful User Profiles).

9) Press **Enter**.

10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

11) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Profiles that are \*DISABLED

This report displays user profiles that have a status of \*DISABLED. These users cannot sign on to the system. Disabled users should be evaluated to determine if they should be deleted from the system due to inactivity. They should also be evaluated to check for instances of hacking attempts since typical system configuration is to disable users after 3 invalid sign-on attempts.

**Collector ID:** USER\_PROFILES

**Report ID:** PROFILES\_DISABLED

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Profile Configuration Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **13** (Profiles that are \*DISABLED).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

# Require Digit in Password

This report displays the value of the QPWDRQDDGT (Require digit in password) system value if the value is set to 0.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QPWDRQDDGT

 **Note:** The Require Digit in Password system value specifies whether a digit is required in a new password. This prevents the user from only using alphabetic characters.

PASS = System value QPWDRQDDGT is not set to 0.

FAIL = System value QPWDRQDDGT is set to 0.

 **Tip:** It is recommended to require at least 1 digit in passwords. Be sure to balance complexity and usability in your password policy.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **3** (Password-related System Values).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **11** (Require Digit in Password).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

# Security Officer Profiles

This report displays user profile information about user profiles with the security officer (\*SECOFR) user class.

**Collector ID:** USER\_PROFILES

**Report ID:** SECURITY\_OFFICER

 **Note:** User profiles with security officer class authority typically have all object authority and have little to no restrictions on the system.

PASS = Three or fewer user profiles with \*SECOFR user class exist on the system.

FAIL = More than three user profiles with \*SECOFR user class exist on the system.

 **Tip:** The number of user-profiles with security officer privileges should be very minimal and reserved only for authorized administrators in your organization.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Profile Configuration Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **2** (Security Officer Profiles).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Swap Profile Events

This report displays information about any time a profile swap occurs on the system. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is PS.

**Collector ID:** JOURNAL\_PS

**Report ID:** \*BASE

 **Note:** For PS journal entries to be generated, the QAUDLVL system value must contain \*SECURITY and \*SECVFY.

PASS = PS journal entries were not found in QAUDJRN.

FAIL = PS journal entries were found in QAUDJRN.

## Types of entries

A - Profile swap during pass-through

E - End work on behalf of relationship

H - Profile handle generated by the QSYGETPH API

I - All profile tokens were invalidated

M - Maximum number of profile tokens have been generated

P - Profile token generated for user

R - All profile tokens for a user have been removed

S - Start work on behalf of relationship

V - User profile authenticated

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Profile Activity Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **3** (Swap Profile Events).
- 9) Press **Enter**.

10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

11) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

[Profile Management Reports](#)

# System Service Tools Users

This report lists detailed information, including status and privileges, of System Service Tools (SST) users that are not system-supplied.

SST allows you to work with system-level tools. Tasks such as adding or removing disk units can be done through SST.

**Collector ID:** SYSTEM\_TOOL\_USERS

**Report ID:** SYSTEM\_TOOL\_USERS

PASS = One additional SST user exists on the system.

FAIL = Many additional SST users exist on the system.

## Privileges for SST users:

- Disk units - operations
- Disk units - administration
- Disk units - read only
- System partitions - operations
- System partitions - administration
- Partition remote panel key
- Operator panel functions
- Operating system initial program load (IPL)
- Install
- Performance data collector
- Hardware service manager
- Display/Alter/Dump
- Main storage dump
- Product activity log
- Licensed Internal Code log
- Licensed Internal Code fixes
- Trace
- Dedicated service tools (DST) environment
- Remote service support
- Service tools security
- Service tools save and restore
- Debug
- System capacity - operations
- System capacity - administrator
- System security
- Start service tools
- Take over console

It is recommended to restrict SST access as much as possible since system availability and data integrity can be severely jeopardized through accidental or malicious use of these tools.

### To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Profile Configuration Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **4** (System Service Tools Users).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

### See also

[Profile Management Reports](#)

# User Profile = Password

This report displays user profiles whose password matches their user profile name. This is a critical security vulnerability since it is the most easily guessed password available. Best practice is to use a different default password other than the user profile name when creating new users and set any passwords to expire if they are the same as the profile name. Expiring the password forces the user to change it at the time of their next sign-on.

**Collector ID:** USER\_PROFILES

**Report ID:** PROFILES\_SAME\_PWD

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Profile Configuration Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **20** (User Profile = Password ).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

[Profile Management Reports](#)

# User Profiles Not Used in 90 Days

This report displays user profile information for users on your system that have not been used in 90 days.

**Collector ID:** USER\_PROFILES

**Report ID:** NOT\_USED\_90\_DAYS

PASS = No users exist that have not been used in 90 days.

FAIL = Users exist on your system that have not been used in 90 days.

User profiles that have not been used in three months are typically no longer necessary on the system and are often leftover from employees that are no longer with the organization. The more of these unnecessary profiles that exist on your system, the higher the risk of someone exploiting access to your system.

 **Tip:** It is recommended to disable and eventually delete user profiles not being used.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Profile Configuration Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **3** (User Profiles Not Used in 90 Days).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Users with Job Control Special Authority

This report displays user profile information for users with Job Control (\*JOBCTL) special authority.

**Collector ID:** USER\_PROFILES

**Report ID:** USERS\_JOBCTL

PASS = Three or fewer user profiles with \*JOBCTL special authority.

FAIL = More than three user profiles with \*JOBCTL special authority.

User profiles with \*JOBCTL special authority can change, display, hold, release, cancel, and clear all jobs that are running on the system or that are on a job queue or output queue that has OPRCTL (\*YES) specified. The user also has the authority to start writers and stop active subsystems.

 **Tip:** The number of user profiles with Job Control special authority should be very minimal and reserved only for authorized administrators in your organization.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Profile Configuration Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **9** (Users with Job Control Special Authority).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

[Profile Management Reports](#)

# Users with Save System Special Authority

This report displays user profile information for users that have the Save System (\*SAVSYS) special authority.

**Collector ID:** USER\_PROFILES

**Report ID:** USERS\_SAVSYS

PASS = Three or fewer user profiles with \*SAVSYS special authority.

FAIL = More than three user profiles with \*SAVSYS special authority.

User profiles with \*SAVSYS authority have the authority to save, restore, and free storage for all objects on the system, with or without object management authority.

 **Tip:** The number of user profiles with Save System special authority should be very minimal and reserved only for authorized administrators in your organization.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Profile Configuration Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **10** (Users with Save System Special Authority).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

[Profile Management Reports](#)

# Users with Unlimited Device Sessions

This report displays user profile information for users on your system that have the Limit Device Sessions (LMTDEVSSN) parameter set to \*NO.

**Collector ID:** USER\_PROFILES

**Report ID:** USERS\_LIMIT\_DEVICE

PASS = All users have the Limit Device Sessions parameter set to a value other than \*NO.

FAIL = Users exist on your system that have the Limit Device Sessions parameter set to \*NO.

Setting the Limit Device Sessions parameter to \*NO is considered bad practice since it enables profiles to be shared more easily. If sessions are not limited, the same user profile can sign on at any number of device sessions.

 **Tip:** It is recommended to set the Limit Device Sessions parameter to \*YES or \*SYSVAL.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **2** (Profile Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Profile Configuration Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **7** (Users with Unlimited Device Sessions).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

## **\*PUBLIC User with \*RWX Authorities -\*PUBLIC with \*ALL**

This report displays the public and private authorities associated with the objects that have the User Data Authority attribute set to \*RWX for the \*PUBLIC user. In the QSYS.LIB file system, this is the equivalent of having object authorities set to \*ALL for \*PUBLIC.

**Collector ID:** IFS\_AUTHORITIES

**Report ID:** PUBLIC\_USER\_AUTH\_FILES

### **To run this report**

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **4** (Resource Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **3** (Integrated File System Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **19** (\*PUBLIC User with RWX Authorities - \*PUBLIC with \*ALL).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Actions on Validation Lists

This report displays actions on validation lists. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is VO.

**Collector ID:** JOURNAL\_VO

**Report ID:** \*BASE

 **Tip:** For VO journal entries to be generated, the QAUDLVL system value must contain \*AUTFAIL, \*SECURITY, and \*SECVLDDL.

PASS = VO journal entries were not found in QAUDJRN.

FAIL = VO journal entries were found in QAUDJRN.

## Types of entries

A - Add validation list entry

C -Change validation list entry

F -Find validation list entry

R -Remove validation list entry

U -Unsuccessful verify of a validation list entry

V -Successful verify of a validation list entry

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **4** (Resource Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Object Activity Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **18** (Actions on Validation Lists).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

[Resource Management Reports](#)

# Allow Object Restore Option

This report displays the value of the QALWOBJRST (Allow Object Restore Option) system value if a vulnerability is found.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QALWOBJRST

PASS = System value QALWOBJRST is set to \*NONE.

FAIL = System value QALWOBJRST is not set to \*NONE.

The QALWOBJRST system value controls how the system handles attempts to restore objects with security-sensitive attributes. The value can be set to \*ALL, \*NONE, or a list of values. If \*ALL is specified, any object can be restored to the system. If \*NONE is specified, no objects with security-sensitive attributes can be restored.

 **Tip:** It is recommended to set this value to \*NONE so objects with security-sensitive attributes cannot be unknowingly restored on your system. If there is a legitimate need for a security-sensitive object to be restored on your system, you will need to change this system value to allow the restore and then change it back to \*NONE. This will prevent instances such as potentially harmful programs that inherit security officer authorities from being restored to your system without your knowledge. Always ensure security-sensitive objects are from trusted sources and designed correctly to avoid creating system vulnerabilities such as basic users being able to access the command line with security officer authorities.

## To run this report

- 1) Access the TGAudit **Main** menu.
- 2) At the **Selection or command** prompt, enter **30** (Work with Reports).
- 3) Press **Enter**. The **Work with Reports** interface is displayed.
- 4) Locate the desired report using the search and sort options available.
- 5) In the **Opt** field for the desired report, enter **7** (Run).
- 6) Press **Enter**.
- 7) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 8) Press **Enter**.

# Allow User Domain Objects in Libraries

This report displays the value of the QALWUSRDMN (Allow User Domain Objects in Libraries) system value if a vulnerability is found.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QALWUSRDMN

PASS = System value QALWUSRDMN is not set to \*ALL.

FAIL = System value QALWUSRDMN is set to \*ALL.

This system value controls which libraries may contain user domain user (\*USRxxx) objects. You can specify up to 50 individual libraries or all libraries on the system.

 **Tip:** It is recommended you specify a list of libraries which is allowed to store object types such as user indexes (\*USRIDX) and user spaces (\*USRSPC).

## To run this report

- 1) Access the TGAudit **Main** menu.
- 2) At the **Selection or command** prompt, enter **30** (Work with Reports).
- 3) Press **Enter**. The **Work with Reports** interface is displayed.
- 4) Locate the desired report using the search and sort options available.
- 5) In the **Opt** field for the desired report, enter **7** (Run).
- 6) Press **Enter**.
- 7) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 8) Press **Enter**.

# Authorization List Details

This report displays all authorization lists that exist on the system.

**Collector ID:** AUTHORITIES\_LIST

**Report ID:** AUTHORITIES\_LIST\_DETAILS

 **Tip:** Unnecessary authorization lists should be deleted. Verify the necessary authorization lists are used to secure sensitive data.

PASS = N/A

FAIL = N/A

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **4** (Resource Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **2** (Object Information Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **4** (Authorization List Details).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Authorization Lists with Public Access

This report displays authorization lists that do not have \*PUBLIC authority set to \*EXCLUDE.

**Collector ID:** AUTHORITIES\_LIST

**Report ID:** AUTHORITY\_LIST\_PUBLIC

PASS = \*PUBLIC authority for authorization lists is set to \*EXCLUDE.

FAIL = \*PUBLIC authority for authorization lists is not set to \*EXCLUDE.

 **Tip:** \*PUBLIC represents all the users on the system. Allowing \*PUBLIC access to authorization lists can be a security risk. If an individual user or group of users require access to objects secured by an authorization list, add the user or group to the authorization list.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **4** (Resource Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **2** (Object Information Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **5** (Authorization Lists with Public Access).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Delete Operations

This report displays all delete operations. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is DO.

**Collector ID:** JOURNAL\_DO

**Report ID:** \*BASE

 **Tip:** For DO journal entries to be generated, the QAUDLVL system value must contain \*DELETE, \*SECCFG, and \*SECURITY.

PASS = DO journal entries were not found in QAUDJRN.

FAIL = DO journal entries were found in QAUDJRN.

## Types of entries:

A - Object was deleted not under commitment control)

C - A pending object delete was committed

D - A pending object create was rolled back

I - Initialize environment variable space

P - The object delete is pending (the delete was performed under commitment control)

R - A pending object delete was rolled back

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **4** (Resource Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Object Activity Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **3** (Delete Operations).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Directory Link, Unlink, and Search Operations

This report displays the event link, unlink, and search directory operations. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is LD.

**Collector ID:** JOURNAL\_LD

**Report ID:** \*BASE

 **Tip:** For LD journal entries to be generated, object auditing must be turned on for directories by using the CHGAUD command.

PASS = LD journal entries were not found in QAUDJRN.

FAIL = LD journal entries were found in QAUDJRN.

## Types of entries:

L - Link directory

U - Unlink directory

K - Search directory

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **4** (Resource Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **3** (Integrated File System Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **3** (Directory Link, Unlink, and Search Operations).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

# File Usage Information

This report displays file usage information for files stored in the IFS. Fields returned indicate how often an object is used. Usage has different meanings according to the specific file system and according to the individual object types supported within a file system. Usage count is updated for operations such as opening and closing of a file or can refer to adding links, renaming, restoring, or checking out an object.

**Collector ID:** IFS\_ATTRIBUTES

**Report ID:** FILE\_USAGE\_INFORMATION

## The attributes returned include

- Days used count: The number of days an object has been used.
- Date object was most recently used: The date the object was last used.
- Date Days\_used\_cnt was Reset: The date the days used count was the last reset to zero (0).

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **4** (Resource Reports).

# Files with RWX Authorities

This report displays the public and private authorities associated with the IFS files that have User Data Authority set to \*RWX. The User Data Authority attribute defines what permissions the user has to the file.

\*RWX - Allows all operations on the object except those that are limited to the owner or controlled by the object rights

**Collector ID:** IFS\_AUTHORITIES

**Report ID:** FILES\_RWX\_ENABLED

IFS uses the following to grant rights:

\*R - Read

\*W - Write

\*X - Execute rights respectively.

**Tip:** Read, write, and execute rights can be used in combined, so \*RWX gives the equivalent of \*ALL authority.

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **4** (Resource Reports).

# Job Changes

This report displays job change events. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is JS.

**Collector ID:** JOURNAL\_JS

**Report ID:** \*BASE

 **Tip:** For JS journal entries to be generated, the QAUDLVL system value must contain \*JOBBAS, \*JOBCHGUSR, and \*JOBDTA.

PASS = JS journal entries were not found in QAUDJRN.

FAIL = JS journal entries were found in QAUDJRN.

## Types of entries

A - ENDJOBABN command

B - Submit

C - Change

E - End

H - Hold

I - Disconnect

J - The current job is attempting to interrupt another job

K - The current job is about to be interrupted

L - The interruption of the current job has completed

M - Change profile or group profile

N - ENDJOB command

P - Attach prestart or batch immediate job

Q - Change query attributes

R - Release

S - Start

T - Change profile or group profile using a profile token.

U - CHGUSRTRC

V - Virtual device changed by QWSACCD5 API

## To run this report

1) Access the TGAudit main menu.

- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **4** (Resource Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Object Activity Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **6** (Job Changes).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# LDAP Operations

This report displays the Lightweight Directory Access Protocol (LDAP) operations. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is DI.

**Collector ID:** JOURNAL\_DI

**Report ID:** \*BASE

 **Tip:** Object Auditing should also be enabled by using the CHGOBJAUD command.

PASS = DI journal entries were not found in QAUDJRN.

FAIL = DI journal entries were found in QAUDJRN.

For DI journal entries to be generated, the QAUDLVL system value must contain:

- \*AUTFAIL
- \*CREATE
- \*DELETE
- \*OBJMGT
- \*SECDIRSRV
- \*SECURITY
- \*SYSMGT

## Types of LDAP operations

CI - Create an instance

CO - Object creation

CP - Password change

DI - Delete instance

DO - Object delete

EX - LDAP directory export

IM - LDAP directory import

OM - Object management (rename)

OW - Ownership change

PO - Policy change

PW - Password fail

RM - Replication management

UB - Successful unbind

ZC - Object change

ZR - Object read

### To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **4** (Resource Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **3** (Integrated File System Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **2** (LDAP Operations).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Maximum sign-on attempts allowed is NOMAX

This report displays the value of the QMAXSIGN (Maximum Sign-on Attempts Allowed) system value if a vulnerability is found.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QMAXSIGN

 **Tip:** The Maximum Sign-on Attempts Allowed system value controls the number of times a user can incorrectly attempt to sign on to the system. This value should be set to a reasonably low number to guard against unauthorized access attempts to your system.

PASS = System value QMAXSIGN is set to a value other than \*NOMAX.

FAIL = System value QMAXSIGN is set to \*NOMAX.

## To run this report

- 1) Access the TGAudit **Main** menu.
- 2) At the **Selection or command** prompt, enter **30** (Work with Reports).
- 3) Press **Enter**. The **Work with Reports** interface is displayed.
- 4) Locate the desired report using the search and sort options available.
- 5) In the **Opt** field for the desired report, enter **7** (Run).
- 6) Press **Enter**.
- 7) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 8) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Optical Volume Accesses

This report displays optical volume access details. The data related to this report is retrieved from the system security audit journal (QAUDJRN). The journal entry type associated with this event is O3.

**Collector ID:** JOURNAL\_03

**Report ID:** \*BASE

 **Tip:** For O3 journal entries to be generated, the QAUDLVL system value must contain \*OPTICAL.

PASS = O3 journal entries were not found in QAUDJRN.

FAIL = O3 journal entries were found in QAUDJRN.

## Types of entries

A - Change Volume Attributes

B - Backup Volume

C - Convert Backup Volume to Primary

E - Export

I - Initialize

K - Check Volume

L - Change Authorization List

M - Import

N - Rename

R - Absolute Read

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **4** (Resource Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **1** (Object Activity Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **12** (Optical Volume Accesses).
- 9) Press **Enter**.

10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

11) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Programs that Adopt Authority

This report contains the list of programs that adopted authority from previous call levels. Adopt Authority allows a user to run programs with higher privileges; therefore, ensure that all programs listed are known programs. If you see any unknown programs in the list, you might want to investigate and remove the adoption capability for those programs. You can perform this by running the Change Program Command (CHGPGM) and setting the Use Adopted Authority (USEADPAUT) option to \*NO.

**Collector ID:** PROGRAM\_ADOPT

**Report ID:** PROGRAMS\_ADOPT\_AUTHORITY

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **4** (Resource Reports).

- 4) At the **Selection or command** prompt, enter the **4** (Resource Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **3** (Integrated File System Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **27** (TGAudit Report Configuration).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

## Report Column Description

Column	Description
Home	Home path to TG product installation
Headings	Number of headings
Label	Label type
Encode	Encode status
Schema	Schema status
Field Delimiter	Field delimiter type
Output CCSID	Coded character set identifier

# TGCentral Agent Configuration

This report returns the TG Central configuration details.

**Collector ID:** IFS\_CONTENT

**Report ID:** IFS\_TGCENTRAL\_AGENT

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **4** (Resource Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **3** (Integrated File System Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **28** (TGCentral Report Configuration).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

## Report Column Description

Column	Description
TGcentral_IP1	IP address for TGCentral
TGCenral_Name1	Name of TGCentral instance
TGCentral_Port1	Port used for TGCentral Integration
SSL	Secure socket layer certificate indicator
Poll_Time_Get	Ping value for get
Poll_Time_Set	Ping value for set
Page_Size	Page size

Debug_Level	Level at which to debug
JSONConv	JSON settings
LogFileAgtPath	Path to agent log file
LogFileSetPath	Path to set log file
LogFileGetPath	Path to get log file
LogFileJamPath	Path to Jam log file
LogFileSize	Log file size
LogArchiveFiles	Number of archive files
SendIncTrx	TRX indicator
BufferTriggers	Path to buffer t rigger file
PollTime	Ping value for poll time trigger
LogFileTgrPath	Path to trigger log file
SendDetAlr	Send TGDetect alert indicator
PollTimeGet	Ping value for get
PollTimeSet	Ping value for set

# Unsaved Objects in the Last 30 Days

Use this report to list objects that have not been saved in the last 30 days. It is recommended that you regularly backup your mission-critical data.

**Collector ID:** OBJECT\_DETAILS

**Report ID:** UNSAVED OBJECT\_30

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **4** (Resource Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **5** (Object Detail Reports).
- 7) Press **Enter**.
- 9) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 10) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# User-defined File Systems (UDFS's)

This report displays details about user-defined file systems (UDFS's). A user-defined file system \*TYPE2 has high-performance file access. It has a minimum object size of 4096 bytes and a maximum object size of approximately one terabyte in the "root" QOpenSys and user-defined file systems. Otherwise, the maximum is approximately 256 gigabytes. A \*TYPE2 \*STMF is capable of memory mapping as well as the ability to specify an attribute to optimize disk storage allocation.

 **Note:** This report returns IFS attributes of objects that are \*TYPE2 format.

**Collector ID:** IFS\_ATTRIBUTES

**Report ID:** USER\_DEFINED\_FILE\_SYSTEM

## To run this report

- 1) Access the TGAudit main menu.
- 2) At the **Selection or command** prompt, enter the **1** (Security and Configuration Reports).
- 3) Press **Enter**.
- 4) At the **Selection or command** prompt, enter the **4** (Resource Reports).
- 5) Press **Enter**.
- 6) At the **Selection or command** prompt, enter the **3** (Integrated File System Reports).
- 7) Press **Enter**.
- 8) At the **Selection or command** prompt, enter the **15** (User-defined File Systems (UDFS's)).
- 9) Press **Enter**.
- 10) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 11) Press **Enter**.

 **Alternatively**, you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# Verify Object on Restore

This report displays the value of the QVfyOBJRST (Verify Object on Restore) system value if a vulnerability is found.

**Collector ID:** SYSTEM\_VALUES

**Report ID:** QVfyOBJRST

PASS = System value is set to 3 or higher.

FAIL = System value is set to 1 or 2.

This system value specifies the policy to be used for object signature verification during a restore operation.

These values apply to objects of types:

\*CMD

\*PGM

\*SRVPGM

\*SQLPKG

\*MODULE

It also applies to \*STMF objects which contain Java programs. This value also specifies the policy for PTFs applied to the system, including Licensed Internal Code fixes.

If Digital Certificate Manager is not installed on the system, all objects are treated as unsigned when determining the effects of this system value on those objects during a restore operation.

Program, service program and module objects that are created on a system with a release prior to V6R1 will be treated as unsigned when they are restored to a V6R1 or later system. Likewise, program, service program and module objects created or converted on a V6R1 or later release will be treated as unsigned when they are restored to a release previous to V6R1.

When an attempt is made to restore an object onto the system, three system values work together as filters to determine if the object is allowed to be restored, or if it is converted during the restore. The first filter is the verify object on restore (QVfyOBJRST) system value. It is used to control the restore of some objects that can be digitally signed. The second filter is the force conversion on restore QFRCCVNRST system value. This system value allows you to specify whether or not to convert programs, service programs, SQL packages, and module objects during the restore. It can also prevent some objects from being restored. Only objects that can get past the first two filters are processed by the third filter. The third filter is the allow object on restore QALWOBJRST system value. It specifies whether or not objects with security-sensitive attributes can be restored.

 **Tip:** It is recommended to set this system value to 3 or higher.

## To run this report

- 1) Access the TGAudit **Main** menu.
- 2) At the **Selection or command** prompt, enter **30** (Work with Reports).
- 3) Press **Enter**. The **Work with Reports** interface is displayed.

- 4) Locate the desired report using the search and sort options available.
- 5) In the **Opt** field for the desired report, enter **7** (Run).
- 6) Press **Enter**.
- 7) Modify the run criteria as necessary.

 **Note:** The criteria allow you to limit the data returned in the report and choose the desired output format.

- 8) Press **Enter**.

 **Alternatively,** you search for any report using the **Work with Reports** (TGWRKRPT) interface.

# APPENDIX - TGAudit Report Reference Revisions

This section includes enhancement by version.

- [Version 3.0 - TGAudit Report Reference](#)
- [Version 2.5 - TGAudit Report Reference](#)
- [Version 2.4 - TGAudit Report Reference](#)
- [Version 2.3 - TGAudit Report Reference](#)
- [Version 2.2 - TGAudit Report Reference](#)
- [Version 2.1 - TGAudit Report Reference](#)

# Version 3.0 - TGAudit Report Reference

This release includes the following:

## Enhancements

### Collectors

Added the following [collectors](#):

- System Activity Information
- QSYS2.TELNET\_ATTRIB (TELNET Server Attributes)
- QSYS2.SECURITY\_CONFIG (Security Configuration Information)
- JOURNAL\_C3 (Advanced Analysis Command Configuration)
- JOURNAL\_FT (FTP Client Operations - Certificate data)

### Reports

Added the following [reports](#):

- [TELNET Server Attributes](#) (IBM i 7.5)
- [Security Configuration Information](#) (IBM i 7.5)
- [Advanced Analysis Command Configuration](#) - TLS configuration (IBM i 7.5)
- [FTP Client Operations - Certificate data](#)
- [Group Profile Passwords](#)
- [Root \\*PUBLiC User with RWX Authorities](#)

# Version 2.5 - TGAudit Report Reference

This release includes the following:

## Enhancements

### Collectors

The following new [collectors](#) are now available:

- DATABASE\_MONITOR
- JOB\_DATABASE\_ACTIVITY

### Reports

The following new [reports](#) are available:

- [Database Monitor Activity](#) report
- [Job and Database Activity](#) report

# Version 2.4 - TGAudit Report Reference

This release includes the following:

## Enhancements

### Collectors

The following new [collectors](#) are now available:

- [SYS\\_VAL\\_CONFIG](#)
- [SYS\\_VAL\\_DEFAULT](#)
- [SYS\\_VAL\\_VALID](#)
- [NETSERVER\\_CONFIG](#)
- [NETSERVER\\_SHARES](#)
- [QSYS2.DATA\\_QUEUE\\_ENTRIES](#)
- [QSYS2.EXIT\\_POINT\\_INFO](#)
- [QSYS2.EXIT\\_PROGRAM\\_INFO](#)
- [QSYS2.JOURNALED\\_OBJECTS](#)
- [QSYS2.SERVER\\_SHARE\\_INFO](#)
- [QSYS2.SOFTWARE\\_PRODUCT](#)

## Reports

### Configuration Reports

The following new **Configuration** reports are now available:

- [Exit Point Information](#)
- [Exit Program Information](#)
- [Software Product Information](#)
- [System Value Configuration Changes](#)
- [System Value Configuration Details](#)
- [System Value Default Changes](#)
- [System Value Defaults](#)
- [System Value Valid Value Changes](#)
- [System Value Valid Values](#)

### Network Reports

- [NetServer Shares](#)
- [NetServer Configuration](#)
- [Server Share Information](#)

### Resource Reports

- [Data Queue Entries](#)
- [Journaled Objects](#)

# Version 2.3 - TGAudit Report Reference

This release includes the following:

## Enhancements

### Collectors

The following new [collectors](#) are available:

- [DATABASE\\_FIELD\\_ACTIVITY](#)
- [ENCRYPT\\_DATABASE\\_FIELD](#)
- [ENCRYPT\\_DATABASE\\_FILE](#)
- [ENCRYPT\\_DATABASE\\_FILTER](#)
- [ENCRYPT\\_DATABASE\\_RULES](#)
- [ENCRYPTION\\_DEFAULTS](#)
- [QHST.MSG\\_INFO](#)
- [QSYS2.MESSAGE\\_QUEUE\\_INFO](#)

### Reports

The following new [reports](#) are available:

- [QHST Message Information](#)
- [QHST Messages with Severity Greater than 40](#)
- [Message Queue Data by Date Range](#)
- [Columns with Field Procedures](#)

# Version 2.2 - TGAudit Report Reference

This release includes the following:

## Enhancements

### Collectors

The following new [collectors](#) are now available for use:

- [AUTHORITY\\_COL\\_ALI](#)
- [AUTHORITY\\_COL\\_IFS](#)
- [AUTHORITY\\_COL\\_OBJECT](#)
- [DATABASE\\_ACCESS](#)
- [DATABASE\\_OPERATIONS](#)
- [DTBASE\\_OPERATIONS\\_JRN](#)
- [QHST\\_MSG\\_INFO](#)
- [SENSITIVE\\_DATABASE\\_CONTENT](#)

### Authority Collection Reports

The following new reports are now available for use:

- [Authority Collection for Object IFS Report](#)
- [Authority Collection for Object Native Report](#)
- [Authority Collection Report \(\\*ALL\)](#)

### Configuration Reports

The following new reports are now available for use:

- [QHST Message Information](#)
- [QHST Messages with Severity Greater Than 40](#)

### Data Level Reports

The following new reports are now available for use:

- [Database Access](#)
- [Database Operations](#)
- [Database Operations by Journal](#)
- [Sensitive Database Content](#)

### Resource Reports

The following new reports are now available for use:

- [Changed Data Files in Last 30 Days](#)
- [Damages Objects](#)
- [Files Not Used in the Last 30 Days](#)
- [Journaled Files](#)
- [New Data Files in Last 30 Days](#)

- [New Library in Last 30 Days](#)
- [New Objects in the Last 30 Days](#)
- [Object Source](#)
- [Objects Changed in the Last 30 Days](#)
- [Objects Created in the Last 30 Days](#)
- [Objects Larger than 100MB](#)
- [Objects Owned by QSECOFR](#)
- [Objects Used in the Last 30 Days](#)
- [Restored Objects in the Last 30 Days](#)
- [Source Changes in Last 30 Days](#)
- [Unsaved Objects in the Last 30 Days](#)

 **Note:** The new **Resource** reports use the existing [Object\\_Details](#) collector.

# Version 2.1 - TGAudit Report Reference

This release includes the following:

## Enhancements

### Collectors

The following new [collectors](#) are now available for use:

- [DATABASE\\_CONTENT](#)
- [IFS\\_CONTENT](#)
- [JOURNAL\\_M0](#)
- [JOURNAL\\_M6](#)
- [JOURNAL\\_M7](#)
- [JOURNAL\\_M8](#)
- [JOURNAL\\_M9](#)
- [NETWORK\\_TRANS\\_SHOWCASE](#)
- [SERVICE\\_TOOL\\_SECURITY\\_ATTR](#)
- [TGMOBJINF](#)

 **Note:** See [APPENDIX - TGAudit Collectors](#) for a complete list of available collectors.

## Reports

The following new reports are now available for use:

### Configuration Reports

- [Database Content](#)
- [Cross Reference Physical File](#)
- [Schedule Master File](#)

### Profile Reports

- [Service Tool Security Attributes](#)

### Resources Reports

- [Db2 Mirror Communication Services](#)

REMOTE_TRAN_SUMMARY_BY_USER	Remote Summary User	Network	IBMi
RSC_MGR_COMPLIANCE_DATA	Resource Manager Authority Out of compliance data	Network	IBMi
RSC_MGR_CONFIG	Resource Manager Configuration	Network	IBMi
RSC_MGR_SCHEMA_DETAILS	Resource Manager Authority Schema Details	Network	IBMi

RSC_MGR_SCHEMA_HEADER	Resource Manager Authority Schema Header	Network	IBMi
SENSITIVE_DATABASE_CONTENT	Sensitive Database Content	Profile	IBMi
SERVICE_TOOL_SECURITY_ATTR	Service Tool Security Attributes	Profile	IBMi
SERVICE_TOOL_USERS	Service Tool User Data	Profile	IBMi
SOCKET_SUMMARY_BY_SERVER	Socket Summary by Server	Network	IBMi
SOCKET_SUMMARY_BY_USER	Socket Summary by User	Network	IBMi
SOCKET_TRAN_RULES	Socket Rules	Network	IBMi
SOCKET_TRANSACTIONS	Socket Transactions	Network	IBMi
SOFTWARE_RESOURCES	Installed Software Resources Data	Configuration	IBMi
SUBSYSTEM_AUTOSTART	Subsystem Autostart Jobs	Configuration	IBMi
SUBSYSTEM_COMMUNICATIONS	Subsystem Communication Entries	Configuration	IBMi
SUBSYSTEM_INFORMATION	Subsystem Information Details	Configuration	IBMi
SUBSYSTEM_JOB_QUEUE	Subsystem Job Queue	Configuration	IBMi
SUBSYSTEM_POOL_DATA	Subsystem Pool Data	Configuration	IBMi
SUBSYSTEM_PRESTART	Subsystem Prestart Jobs	Configuration	IBMi
SUBSYSTEM_REMOTE	Subsystem Remote Entries	Configuration	IBMi
SUBSYSTEM_ROUTING	Subsystem Routing Entries	Configuration	IBMi
SUBSYSTEM_WORKSTATION_NAMES	Subsystem Workstation Names	Configuration	IBMi
SUBSYSTEM_WORKSTATION_TYPES	Subsystem Workstation Types	Configuration	IBMi
SYS_VAL_CONFIG	System Value Configuration	Configuration	IBMi
SYS_VAL_DEFAULT	System Value Default	Configuration	IBMi
SYS_VAL_VALID	System Value Default	Configuration	IBMi
SYSCOLAUTH	Privileges Granted on a Column	Configuration	IBMi
SYSCONTROLS	Permission or Column Mask Defined	Configuration	IBMi
SYSCONTROLSDEP	Dependencies of Row Permissions and Column Masks	Configuration	IBMi
SYSCONTROLSDEP	Privileges Granted on a Row	Configuration	IBMi
SYSFIELDS	Columns with Field Procedures	Configuration	IBMi
SYSPACKAGEAUTH	Privileges Granted on a Package	Configuration	IBMi

SYSPROGRAMSTAT	Program, Service Program, and Module with SQL Statements	Configuration	IBMi
SYSROUTINEAUTH	Privileges Granted on a Routine	Configuration	IBMi
SYSSCHEMAAUTH	Privileges Granted on a Schema	Configuration	IBMi
SYSSEQUENCEAUTH	Privileges Granted on a Sequence	Configuration	IBMi
SYSTABAUTH	Privileges Granted on a Table or View	Configuration	IBMi
SYSTABLESTAT	Table Statistics Include all Partitions and Members	Configuration	IBMi
SYSTEM_VALUES	Display System Value Data	System	IBMi
SYSTOOLS. GROUP_PTF_CURRENCY	PTF Groups Installed per IBM Recommendations	Configuration	IBMi
SYSTOOLS. GROUP_PTF_DETAILS	PTFs within PTF Groups Installed per IBM Recommendations	Configuration	IBMi
SYSUDTAUTH	Privileges Granted on a Type	Configuration	IBMi
SYSVARIABLEAUTH	Privileges Granted on a Global Variable	Configuration	IBMi
SYSXSROBJECTAUTH	Privileges Granted on an XML Schema	Configuration	IBMi
TGMOBJINF	Object Information	Resource	IBMi
TG_NETWORK_GROUPS	TG Network Groups	Network	IBMi
TG_OBJECT_GROUPS	TG Object Groups	Network	IBMi
TG_OPERATION_GROUPS	TG Operation Groups	Network	IBMi
TG_USER_GROUPS	TG User Groups	Network	IBMi
USER_OBJECT_AUTHORITIES	User Profile Object Authorities	Profile	IBMi
USER_PRF_VIA_BLUEPRINT	User Profile via Blueprint	Profile	IBMi
USER_PROFILE_ACTIVITY	User Profile Activity	Profile	IBMi
USER_PROFILE_ARCHIVE	User Profile Archive	Profile	IBMi
USER_PROFILE_EXCLUSIONS	User Profile Exclusions	Profile	IBMi
USER_PROFILES	Display User Profile Data	Profile	IBMi
