Comparing File Reporter Releases

Since the introduction of OpenText File Reporter, the product's set of features and benefits have continuously been updated to address the expanding requirements for identifying network-stored unstructured data and its associated permissions. So, if you're using an older version of File Reporter, you're missing out on some of the advanced product features that can both optimize and protect your most critical and vulnerable data.

Feature	Benefit	4.1 Shipped Feb. 2022	4.0 Shipped Jan. 2021	3.6 Shipped Nov. 2018	3.5 Shipped Jul. 2018	3.0 Shipped Apr. 2017	2.6 Shipped Sept. 2015	2.5 Shipped Oct. 2014	2.0.x Shipped Various Dates
Enhanced Reporting for Microsoft 365	Identifies and reports on additional user, group, and permissions information for SharePoint, as well as group ownership information for Microsoft 365 groups.	•							
Identity Enrichment for Active Directory	Provides extended collection of attributes for associated security principals in Active Directory.	•							
Custom Query Report Enhancements	Select and assign one or more target paths from scans and associate them with a specific Custom Query report.	•							
Reporting for Microsoft 365	Enabled to scan Microsoft 365 cloud repositories for data and associated permissions for OneDrive for Business, SharePoint Online, and Teams.	•	•						
Advanced Duplicate File Detection	Generates a content-based hash for specific files for complete duplicate detection and aggregate reporting.	•	•						
Pre-built Custom Queries and Report Layouts	For reporting on files and permissions in the Microsoft 365 cloud, filequerycookbook.com includes pre-built custom queries and report layouts that you can utilize.	•	•						
Integration with NetIQ Identity Governance	Extends the existing capabilities of NetIQ Identity Governance by OpenText by providing an integrated solution for the collection, review, and certification of user access in unstructured data repositories.	•	•	•					
File content scanning and reporting	Enabled for regular expression (regex) pattern searching to identify files containing specified patterns such as U.S. Social Security numbers, credit card numbers, or other user-defined patterns.	•	•	•	•				
Support for OES 2018	The ability for OES 2018 servers to host File Reporter Linux Agents, as well as for File Reporter to perform file system scans on OES 2018 servers.			•	•				
Scan Processor	A .NET application installed during the Engine installation process that greatly improves the rate at which scans are added to the database.	•	•	•	•	•			
Analytics Tools	An integrated set of data visualization applications that include a Dashboard, Pivot Grid, and Tree Map.	•	•	•	•	•	•
