# LoadRunner Cloud

OpenText™ LoadRunner™ Cloud is the ultimate performance testing solution for agile teams. It enables early cloud based load testing, comprehensive application monitoring, real-time issue discovery with network virtualization, and efficient problem mitigation to elevate the testing, delivery, and quality of software.

Benefits

- **Scale effortlessly:** Provide comprehensive test coverage that easily scales to over five million users.

- **Minimize hardware maintenance** through a flexible testing model.

- **Conduct tests** across various locations with public cloud, private cloud, or on-premises load generators.

- **Leverage existing LoadRunner scripts,** open-source tools, or create tests using various input sources, supported by smart reports and dashboards for quick performance issue insight and analysis.

The pressure to deliver top quality software while efficiently managing testing resources can be a significant challenge. Organizations need to ensure comprehensive testing coverage, with minimal hardware maintenance, and enable collaborative, data driven decision-making with actionable insight.

OpenText LoadRunner Cloud is a cloud based performance testing solution that simplifies the planning, execution, and scalability of performance tests.

With LoadRunner Cloud, you can effortlessly:

- Scale your testing endeavors to encompass over five million virtual users, ensuring extensive testing coverage.

- Reduce hardware maintenance concerns with a flexible testing model, allowing your team to focus on optimizing code and mitigating performance issues.

- Support tests in various locations using public cloud, private cloud, or on-premises load generators.

- Adapt to your testing requirements with the flexibility you need.

- Leverage a variety of LoadRunner scripts, open-source tools, or create tests through REST API, CSV, or HAR files.

> "These enhanced capabilities bring with them a major increase in complexity, which in turn puts greater pressure on testing. With LoadRunner Cloud, we are confident that we can meet the challenge with an efficient, highly automated approach."

- Swiftly identify and resolve performance issues with smart reports and dashboards with features like multi-user collaboration, asset sharing, and effective project management.

OpenText LoadRunner Cloud is a performance-testing solution with a host of distinctive features. It offers a range of protocol support, covering the latest mobile and web technologies and legacy applications to meet diverse testing needs. Its user-friendly interface and reporting capabilities, including TruClient and DevWeb, expedite scripting, while centralized script and scenario management streamline the testing process. Furthermore, LoadRunner Cloud real-time metric displays are augmented by anomaly detection and detailed client-side breakdowns that provide comprehensive and intuitive performance testing.
