

# LoadRunner Enterprise

Streamline your move to the cloud

**You may think that LoadRunner Enterprise (formerly Performance Center) can only be run on premises. In reality, you now have more flexibility in how you deploy and license the solution.**

Now is the perfect time to consider moving to the cloud. Our dedicated migration experts are here to make that outcome a success. The right planning and preparation can make your migration virtually seamless and enable you to unlock new LoadRunner Enterprise capabilities.

**OpenText LoadRunner Enterprise SaaS works well for us because of its flexibility. We could start with a limited number of users and expand as needed. There's no big capital expense, and we can charge services back to the bottlers."**

Andrei Semenov  
Senior Manager PMO & Enablement  
CONA Services LLC

As you plan an upgrade, consider the potential benefits of moving to the cloud:

- Streamline ongoing management.
- Reduce infrastructure costs.
- Facilitate a more resilient, easy-to-upgrade environment.

OpenText' Software-as-a-Service (SaaS) capabilities get you up-and-running quickly through fast provisioning. They also provide the assurance that you stay current with the latest releases and upgrades.

Dedicated OpenText resources perform the migration and upgrade to ensure a smooth transition, freeing up your internal resources. With a proven history and an infrastructure you can trust, our cost-effective cloud solutions make moving to the cloud easy.

**As part of your cloud migration, you can upgrade to the latest LoadRunner Enterprise version and take advantage of new features such as:**

- Dynamic provisioning of elastic cloud load generators with CloudBurst, Microsoft Azure, or AWS.
- New user interface and administration.
- Quick trending analysis on failed transactions.
- Improved runtime collate feature, exporting raw data to external dashboard.
- Upgraded DevWeb support, LoadRunner Developer, and VuGen integration.
- Single sign-on authentication.

## It's time to talk to OpenText' team of cloud specialists and quantify the ROI benefits of switching to the cloud:

### Rapidly scalable

OpenText helps you maximize value with SaaS Flex. Mix and match subscriptions under a single contractual model, enabling you to easily adjust consumption patterns. As a cloud-based solution your teams have anywhere and anytime access.

### Highly available

With more than 15 years' experience running enterprise-grade solutions, OpenText serves many of the Fortune 500 with market-tested best practices. Our robust, multi-tenanted, global data centers consistently deliver 99.9% service-level availability.

### Hassle-free upgrades

Stay up to date on the latest hardware and software without delays or hassles. Plus, you won't have to replace costly infrastructure or add IT staff to run multiple platforms. You can consistently optimize existing IT investments and adopt next-generation solutions without

risk.

### Dedicated support

Our customer success managers act as your trusted advisor so that you derive the most value. They minimize day-to-day management, perform ongoing reviews for proposed changes, provide guidance

## OpenText helps make your move easy

The list of migration considerations and tasks can be overwhelming. But there's no need to worry because we're here to help. Our migration services streamline the transition to the cloud from your existing environment.

With the right planning and preparation, you'll be using your new cloud environment without a hitch:

### Assess your on-premises environment

Our migration experts determine the size of your implementation and integrations and account for unique uses of your current solution.

### Get methodical and document the plan

A highly skilled Customer Success Manager (CSM) builds a detailed plan with your team based on your timeline. Key activities include data extraction, integration configuration, data verification, user authentication, and go-live planning.

### Maintain high-level view of the entire process

Migrating a system to the cloud involves more than just moving data. OpenText assists and coordinates each step of the cloud transition. Your CSM will work with you through the process and help minimize any impact.

### Upgrade to the latest version

Migration services include upgrades when the on-premises version is older than the current cloud offering. Not only will you gain flexible consumption, but you can also access the latest capabilities.

### Sit back and relax

Customer experience professionals support your move to the cloud. The team oversees everything so that nothing goes wrong. If something does, they quickly remedy any unexpected bumps in the road.

When you're ready to take advantage of the cloud, we're ready to guide you through a successful migration.
