

OneSource Intranet Accelerator for SharePoint

Intranet at the speed of business: faster, cheaper, better.

Executive summary

We live in an age of hyper-connectivity, a digital workplace and the 'always on' business. An age where being the first to know and the first to act is often the difference between success and failure.

You want an effective intranet so you can deliver to your team the most up-to-date information readily available, on any device, whether they are in the office, in front of customers, or on the go.

Micro Focus OneSource® Intranet Accelerator for SharePoint is a content management system (CMS) delivered as-a-service, which helps you unleash the power of Microsoft SharePoint®, one of the most popular corporate intranet platforms. It saves you time and money by eliminating the need for expensive SharePoint developers and empowering your business users and content owners to be up and running in days, publishing to and communicating with your users using an intuitive interface, ensuring they have access to the latest and greatest content.

Intranets should be easy

A corporate intranet is a critical element of the digital workplace. It is how you communicate to your employees, publish content, and share news. It is how your teams collaborate, store documents, and share knowledge. In an age of information overload, a great intranet where you can quickly find what you need is perhaps the best productivity tool you could have.

SharePoint provides many of the features needed for a robust intranet. However, publishing content, creating, modifying and maintaining pages is time-consuming and requires technical skills that not many business users, content editors and publishers possess. This means that unless you hire expensive SharePoint developers, you will be slow to create and update content, your sites will stagnate, and productivity will decline because your users will be spending too much time searching for information that should be easy to find.

Features and capabilities

OneSource Intranet Accelerator for SharePoint is an "out of the box" content management system that simplifies and speeds up the development and update of intranet sites. It is easy to deploy and requires no technical skills, enabling business users to rapidly create and easily maintain rich and engaging pages with a rich set of capabilities:

- Easy to use, intuitive, drag-and-drop interface, suitable for business users
- Improved user experience vs. standard SharePoint UI
- Control, manage, and structure content in real time
- Full corporate brand compliance
- Responsive design catering for both mobile and web
- Built-in rich set of components: carousels, polls, tabs, news feeds, galleries, multimedia, and many more
- Compliance with accessibility standards
- Complementary web analytics
- Fast load times on high-latency networks

Service overview

OneSource Intranet Accelerator for SharePoint is delivered as a service. It consists of the following components:

Pre-deployment setup

During this stage, we obtain from you the necessary branding elements to allow us to customize the deployment to comply with your branding guidelines.

Deployment

During this stage, we install the already-branded configuration onto your SharePoint environment. We then provide hands-on training to the content managers you nominate, and also provide you with our tutorial videos.

Post-deployment support

You are entitled to email and phone-based support for the duration of your contract. The number of hours per month that you are entitled to is dependent upon the amount of licenses purchased.

Evergreen updates

You are entitled to free updates for the duration of your contract.

“OneSource is amazing—super user-friendly and now I can have the ability to do the majority of our updates right here from my desk. It’s as easy to use as Word.”

Michelle Martin, Communications Lead,
EBC Marketing Team,
Hewlett Packard Enterprise

Benefits

Rapid time to value

Research indicates that intranets could take months of work to configure and customize. With OneSource Intranet Accelerator for SharePoint, you are up and running in as little as a few days.

Reduced cost

OneSource Intranet Accelerator for SharePoint is designed for non-technical users. This means that you will not need to hire or train expensive technical resources.

Increased productivity

Content managers and authors can publish with ease instead of spending valuable time coding and configuring SharePoint. They can likewise easily update pages and content, ensuring that your intranet is fresh and current.

Higher user satisfaction

Your users will be able to interact with an engaging intranet that is context- and device-aware, making their experience more satisfying.

Leverage your Office 365 investment

If you are currently not using Office 365 as your intranet platform, you can now do so by adding OneSource Intranet Accelerator for SharePoint to replace your existing intranet solution and its associated license and maintenance costs.

The Micro Focus Professional Services difference

Micro Focus provides unmatched capabilities with a comprehensive set of consulting and implementation services and unique intellectual property that help you drive innovation through streamlined and efficient software delivery.

- Proven Micro Focus solution implementation expertise
- More than 20 years of experience helping large, complex, global organizations realize value from their Micro Focus investments
- Rich intellectual property and unparalleled reach into product engineering
- Technology-agnostic implementation approach with no vendor lock-in, no rip-and-replace
- Education and support services to ensure adoption
