Addressing the Four Core Pillars of Digital Transformation

While digital transformation touches virtually every corner of the organization, there are typically common threads on core objectives. Fundamentally, what organizations are trying to do is move faster, have greater agility, secure what matters most, and leverage insights to drive value. Micro Focus' solutions are well aligned to these four core pillars of digital transformation:

1

Enterprise DevOps

Deliver at high speed with low risk

DevOps is essential to the digital transformation of a business and is a foundational change in how an organization delivers value to its customers. With Micro Focus, you can reliably scale DevOps across all environments, from mainframe to cloud—quickly bringing innovative ideas to life at the pace your business demands. Now speed and quality can go hand in hand.

2

Hybrid IT Management

Simplify your IT transformation

Diverse, unpredictable, and constantly changing, hybrid IT brings with it a new level of complexity that cannot be controlled by conventional management methods. With our solutions, you can simplify that complexity and transform IT into an agile, services-driven organization. Business success in our digital-first world depends on it.

3

Security, Risk, and Governance

Secure what matters most

Cyber threats are escalating. Aging apps and processes (along with new ones) are full of unforeseen risks. Privacy and compliance requirements are mounting. And point solutions don't offer the scope, vision, or cross-silo analytics needed for these company-wide challenges. With our solutions, you can take a holistic, analytics-driven approach to securing what matters most—identities, applications, and data.

4

Predictive Analytics

Analyze in time to act

Lakes of data are valuable only if you can surface the insights hidden within their depths. With our solutions, you can leverage machine learning to transform unlimited volumes of data into accurate, actionable, automated insights—at the speed of your business. Now you're ready to make predictions and influence business outcomes.

With six primary product lines, which underpin our digital transformation solutions, Micro Focus is well suited to help customers succeed in an evolving marketplace.
