

# AccuRev 7.0

Micro Focus® is proud to introduce AccuRev Version 7.0, the easy-to-use enterprise-class Software Configuration Management (SCM) solution. This release puts new tools in your hands to help you easily accomplish your development and release engineering tasks. Along with these improvements, AccuRev 7.0 provides numerous enhancements to the GUI, command line interface, and user documentation, many based on feedback from AccuRev users.

## Product Overview

The Micro Focus AccuRev application life-cycle solution unleashes the power of software development teams to deliver superior results. Designed for enterprises where software is critical, AccuRev's unique architecture removes constraints and enables teams to deliver more features, ship faster, reprioritize as needed, and sustain high product quality.

## Key Features

### New Server Improvements

- The AccuRev WebUI has been updated to run with Tomcat 8.0.33
- Replica Rollback—streamlines disaster recovery operations in a replicated environment
- New License Manager (replaces Reprise License Manager)
- PostgreSQL upgrade from 8.4.3 to 9.5.3

### Change Package Improvements

- Promote and Demote and Issue Variant (Change Packages)
- Version Browser enhancement “Merge with Backing Stream” (Change Packages)

### GUI Improvements

- New Show Ancestry feature for the Version Browser
- StreamBrowser performance updates have been dramatically improved
- New Rich Text editor to resolve issues with past rich text editing
- New Spell Checker which supports English, Spanish, French, German and Portuguese languages
