

GroupWise Reporting & Monitoring

Micro Focus® GroupWise® Reporting & Monitoring is the only fully comprehensive, customizable, monitoring and reporting tool for Micro Focus GroupWise. GroupWise Reporting & Monitoring provides over 120 unique real-time reports and delivers more than 1,000 user-defined alerts and notifications. It provides an easy-to-use, intuitive dashboard to quickly evaluate the health of GroupWise, Retain™, GroupWise Disaster Recovery, BlackBerry Enterprise Server, Notify Mobile Device Management, and other systems.

Product Highlights

Reporting

GroupWise Reporting & Monitoring delivers over 120 reports for managing GroupWise and other systems.

The web-based control center allows you to:

- Quickly locate critical messaging infrastructure details, capacity planning reports, management, and GroupWise ROI analysis in easy-to-view graphical reports
- Hover your mouse over any graph or chart to see exact values
- Run a detailed report on each user to discover mailbox information and content statistics
- Create your own custom reports with run-time parameters using the included Query Builder
- Build reports in pie chart, bar chart, and graph formats

Monitoring and Alerting

GroupWise Reporting & Monitoring provides over 1,000 pre-defined alerts and notifications based on GroupWise best practices.

GroupWise Reporting & Monitoring provides the following:

- **Customized alerts:** Includes uptime, status, statistics, and other alerts based on your system needs
- **Automated, real-time alerts:** GroupWise Reporting & Monitoring uses its own SMTP engine to email reports even if your GroupWise or other systems are down
- **Potential bottleneck alerts:** Keeps message traffic flowing and identifies potential traffic flow problems
- **Monitoring from your mobile device:** Access GroupWise Reporting & Monitoring anytime, anywhere

System Dashboard

GroupWise Reporting & Monitoring displays the entire GroupWise system in one interface. Its easy-to-use system viewer provides a quick way to evaluate the overall health of monitored systems. Use it out of the box or customize the dashboard to meet your unique needs.

View all reports on one screen including:

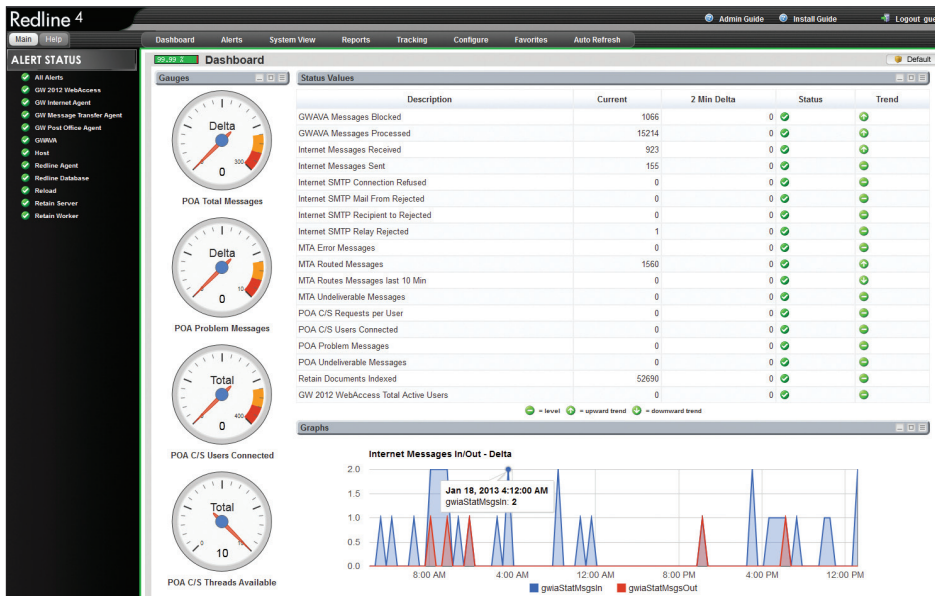

- **Alert indicators:** Ties into the monitoring infrastructure
- **Performance indicators:** Shows key information about GroupWise
- **Graphs and gauges:** Displays message traffic and connected users

Take Control of GroupWise with Superior Email Reporting and Monitoring

With GroupWise Reporting & Monitoring, you can schedule reports, automate them and send them out to supervisors. Through the control center interface, you can access over 150 predefined reports. The reports are organized by solution area to include system operations, disk space management, user compliance reporting and ROI analysis.
