

Mobile Carrier Level Archiving

Micro Focus features carrier-level archiving of text messages. This gives you oversight on mobile communication data for your iOS, Android, and other mobile devices on the mobile carrier network. This solution is ideal for environments with corporate-owned devices, BYOD, or a hybrid environment of both.

Product Highlights

Micro Focus features integration with mobile carriers to capture text messages (SMS/MMS) directly from the carrier's network. This captured data is archived, indexed, and is immediately available to access, search, and perform eDiscovery. This data is archived along with multi-platform email in one central, unified archive.

Mobile Communication Oversight

Regardless of the size of your organization or type of industry, understanding, preserving, and having ready access to mobile communication is necessary and—in the event of litigation or a compliance audit—it is vital. With Micro Focus, text messages (SMS/MMS) are archived, regardless of device. Whether it is BYOD or corporate-issued, your organization stays compliant, prepares for potential litigation, and protects your employees by giving you oversight on mobile communication data through complete and compliant mobile data archiving.

Key Benefits

Mobile archiving from Micro Focus helps ensure that companies:

- Meet regulatory compliance standards: Dodd-Frank Act, Gramm-Leach-Bliley Act (GLB), SEC, FINRA, FRCP, Sarbanes-Oxley, and HIPAA.

- Monitor smartphone usage to ensure compliance with corporate policies.
- Comply with the Dodd-Frank Act, which gives firms 72 hours to comply when trade reconstruction requests are issued.
 - Fast mobile communication retrieval: Micro Focus provides fast and easy retrieval, ensuring compliance with trade reconstruction request timelines.
 - Secure, accessible archive: The secure archive can be searched by legal counsel, auditors, or other named users.

With Micro Focus, you don't lose valuable information and your organization stays compliant. Your sensitive data stays securely within your organization.

Key Features

- **Message Retention:** Archives SMS/MMS text messages
- **Retrieve and review:** Easy access to all messages in the system
- **Compliance tools:** Allow administrators, human resources, compliance officers, eDiscovery, and legal teams to review and audit smartphone user data

Quick View

Micro Focus offers enterprise-level archiving for iOS, Android, and BlackBerry devices. Micro Focus enables you to natively capture and archive all text messages (SMS/MMS) directly from the carrier, without the need to tether or sync the device. Micro Focus provides a fully-compliant and complete archive for mobile communication data.
