

Reflection Desktop for NonStop Add-On

OpenText Reflection Desktop for NonStop Add-On is a Windows-based terminal emulator that works with Reflection Desktop to connect desktop and mobile users to data-rich HP NonStop/Tandem systems. This easy-to-use, manageable, and secure tool makes it possible to fully leverage your critical HP applications.

Product Highlights

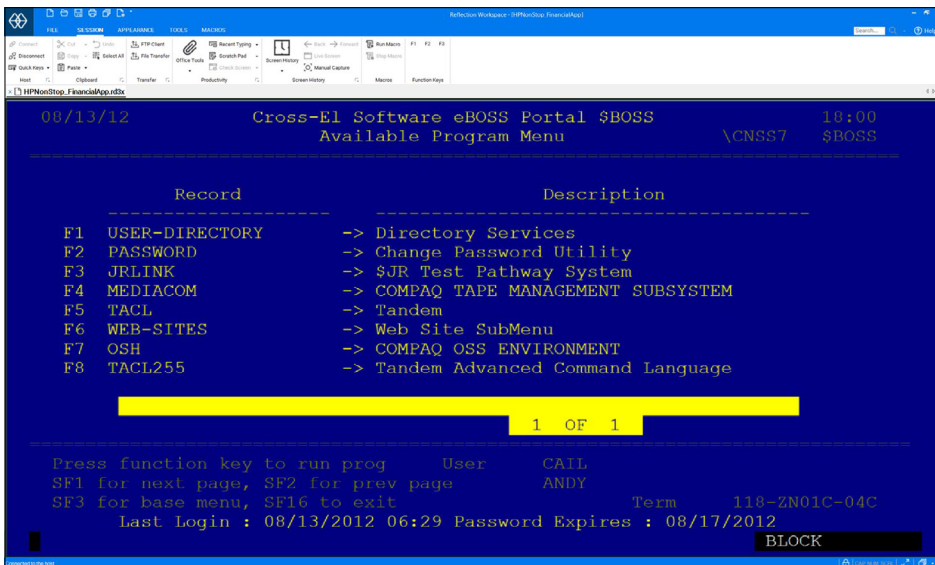

Satisfy the Latest Security Requirements

Reflection Desktop for NonStop Add-On is designed to help you meet internal and external security requirements. Integrated security

components provide the latest TLS and Secure Shell (SSH) encryption and authentication technologies. This high level of security helps you comply with PCI DSS, Sarbanes-Oxley, HIPAA/HITECH, and GDPR mandates.

Quick View

- **New** Windows 11 support.
- **New** Modernized the Settings utility user experience.
- **New** Support for NonStop (6530) compound session files.
- **New** Map OSS (VT emulation mode) colors separate from Guardian mode colors.
- **New** Switch host file display between Guardian API and USS modes when connected to a NonStop FTP Server.
- **New** Clear the clipboard option.
- Run macros before and after host session connections.
- Specify granular print settings prior to printing.
- Integrate legacy applications with Microsoft Office, allowing users to easily use and share HP NonStop host data.
- Ensure business continuity by using load balancing and failover capabilities for uninterrupted host access.
- Give users seamless access to host applications with support for single sign-on.
- Scroll back through large amounts of data, view more data on a single screen, and reuse and edit previous commands.
- Protect critical data with latest TLS, SSH, and elliptic curve cryptography.
- OpenText offers a range of licensing options. Choose the one that best fits your requirements.

Reflection Desktop for NonStop Add-On runs smoothly on the platforms you employ today—and the ones you'll be using tomorrow.

Boost User Productivity with Quick, Streamlined Functions

Reflection Desktop for NonStop Add-On has all the productivity essentials your users need. For example, integration with Microsoft Office allows users to drop host data into an email with the click of a button, print multiple host screens at once, and search for data using the Internet. And now our load balancing and fail-over capabilities help ensure that Reflection is as reliable as NonStop itself.

Integrate Critical Technologies

Reflection Desktop for NonStop Add-On supports a mix of existing and emerging IT

technologies, including Windows 10/Windows 11, Active Directory, Group Policy, Microsoft App-V, VMware, Citrix Virtual Apps and Desktops (formerly XenApp), and IPv6.

Become Virtualization-Ready

Reflection Desktop for NonStop Add-On makes it easier for you to manage emulation on the desktop. Optimized for and tested on the leading virtualization platforms, Reflection delivers all the related benefits—from automated deployment to easier upgrading, patching, and migrating. Users benefit too, from on-demand use and optimal performance.
