

# Reflection Desktop for NonStop Add-On

Micro Focus® Reflection® Desktop for NonStop Add-On is a Windows-based terminal emulator that works with Reflection Desktop to connect desktop and mobile users to data-rich HP NonStop/Tandem systems. This easy-to-use, manageable, and secure tool makes it possible to fully leverage your critical HP applications.

## Product Highlights

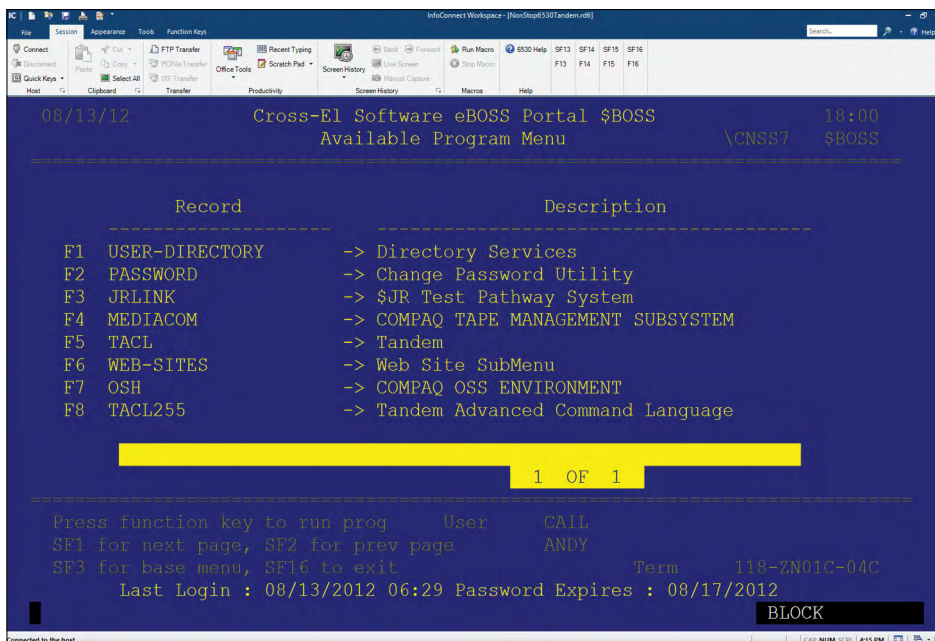

### Satisfy the Latest Security Requirements

Reflection Desktop for NonStop Add-On is designed to help you meet internal and external security requirements. Integrated security

components provide the latest SSL/TLS and Secure Shell (SSH) encryption and authentication technologies. This high level of security helps you comply with PCI DSS, Sarbanes-Oxley, HIPAA/HITECH, and GDPR mandates.

## Quick View

- **New** Designate macros to run before and after host session connections to save time.
- **New** Specify granular print settings prior to printing.
- **New** Leverage new Clipboard copy/paste options for productive data sharing between applications.
- Take full advantage of next-generation Microsoft Windows and Office security and productivity features, including the Ribbon user interface, .NET, and Windows Error Reporting (WER).
- Integrate legacy applications with Microsoft Office, allowing users to easily use and share HP NonStop host data.
- Ensure business continuity by using load balancing and failover capabilities for uninterrupted host access.
- Give users seamless access to host applications with support for single sign-on.
- Maximize end-user productivity with the ability to scroll back through large amounts of data, view more data on a single screen, and reuse and edit previous commands.
- Protect critical data with the latest SSL/TLS and Secure Shell (SSH) encryption, elliptical curve cryptography (ECC), and authentication technologies.

Reflection Desktop for NonStop Add-On runs smoothly on the platforms you employ today—and the ones you'll be using tomorrow.

### **Boost User Productivity with Quick, Streamlined Functions**

Reflection Desktop for NonStop Add-On has all the productivity essentials your users need. For example, integration with Microsoft Office allows users to drop host data into an email with the click of a button, print multiple host screens at once, and search for data using the Internet. And now our load balancing and fail-over capabilities help ensure that Reflection is as reliable as NonStop itself.

### **Integrate Critical Technologies**

Reflection Desktop for NonStop Add-On supports a mix of existing and emerging IT technologies, including Windows 10, Active Directory, Group Policy, Microsoft App-V, VMware, Citrix XenApp, and IPv6.

### **Become Virtualization-Ready**

Reflection Desktop for NonStop Add-On makes it easier for you to manage emulation on the desktop. Optimized for and tested on the leading virtualization platforms, Reflection delivers all the related benefits—from automated deployment to easier upgrading, patching, and migrating. Users benefit too, from on-demand use and optimal performance.

### **Upgrade Information for Extra! 6530 Client Option Users**

Reflection Desktop for NonStop Add-On, which combines the best features of the Extra!® 6530 Client Option and Reflection Desktop products, is the upgrade product for Extra! 6530 Client Option users upgrading to Reflection Desktop and running Windows 7, Windows 8, or Windows 10.
