Reflection for IBM 14.1

Micro Focus® Reflection® for IBM® is terminal emulation software that connects Windows users to applications on IBM mainframe and AS/400 systems. Built to safeguard data, boost user productivity, and simplify desktop management, Reflection easily meets all your host access needs.

Product Highlights

Make the Right Connections
Connect users to the data they need on IBM mainframe and AS/400 hosts—from their Windows desktops. Give them a rich set of features and functions to make their jobs easier.

Do More, Work Less
No more scrambling to update or standardize your emulation software. Centralized management tools simplify deployment, configuration, usage tracking, and migration—so you can focus on larger IT issues.

Simplify and Speed Up User Tasks
Legacy apps are cryptic and cumbersome to use. Eliminate inefficiencies and data entry errors caused by repetitive alt-tabling or switching back and forth between multiple applications. Give users the modern features they need to be productive.

Protect Private Data
Maintain the integrity of critical business data with the latest encryption protocols, authentication methods, and user-level security features. Highest-level security is integrated into every Reflection product.

Quick View

- Support current operating environments, including Microsoft Windows 8 Pro, Windows 7, and Citrix XenApp.
- Automate routine tasks and integrate host applications with web or Windows desktop applications—all on the familiar VBA platform.
- Protect sensitive data in motion with TLS 1.2 encryption.
- Minimize the likelihood of spoofing and man-in-the-middle attacks with secure authentication.
- Meet the stringent FIPS 140-2 security requirements.
- Easily access Internet addresses from within host sessions.
- Simplify certificate use with Reflection Certificate Manager.
About Micro Focus
Since 1976, Micro Focus has helped more than 20,000 customers unlock the value of their business logic by creating enabling solutions that bridge the gap from well-established technologies to modern functionality. The two portfolios work to a single, clear vision—to deliver innovative products supported by exceptional customer service. www.microfocus.com
