

Reporting and Insights

Digital Safe Foundations delivers cloud-native, social collaboration-optimized archiving and supervision optimized for mid-tier and smaller organizations. A central capability of the platform, **Foundations Reporting and Insights**, streamlines the ability to perform deep analysis on your communication and collaboration data.

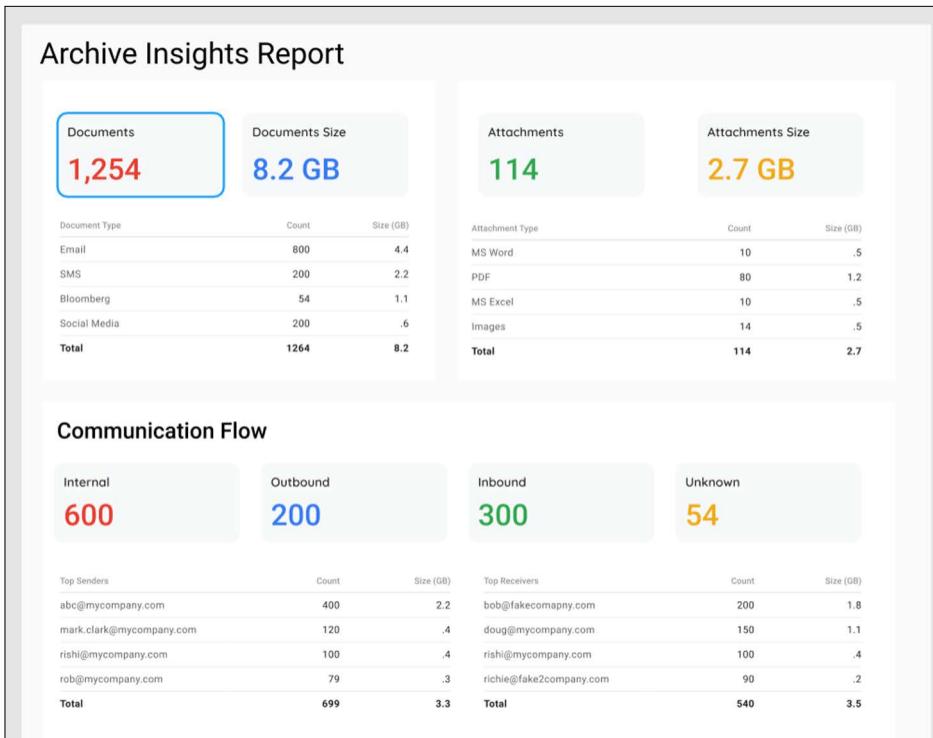

Quick View

- **Excellent User Experience (UX)**—Simple, unified, and intuitive UX streamlines analysis and decision-making.
- **High Precision**—Formatted to the individual pixel, Foundations Reporting and Insights meets all regulatory requirements for detail and accountability.
- **Automated Scheduling**—Reports can be scheduled for automatic generation at daily, weekly, monthly, or other intervals to suit your organization's needs.
- **Automated Distribution**—Foundations Reporting and Insights can be distributed by email at regularly scheduled intervals as well as manually downloaded.
- **Format Versatility**—Reports can be downloaded in various formats, including PDF, Microsoft Excel, CSV, and Microsoft Word, for easy handling and sharing with stakeholders.
- **Dynamic Display**—Interactive tables and charts support easy sorting, filtering, conditional formatting, and moving/hiding columns.

Product Highlights

Many mid-sized companies that operate under strict regulatory oversight but lack the budgets of their larger counterparts have been compelled to compromise on their compliance archiving and supervision solutions. Digital Safe Foundations is optimized for mid-sized to small organizations, delivering a modern, cloud-native social collaboration-optimized, archiving and supervision product that delivers precise search and supervision with an easy-to-use interface to drive highly efficient workflows.

A key platform capability, Foundations Reporting and Insights provides high visibility and intuitive tools to perform deep analysis on your data. Reporting and Insights offers interactive reports to enable easy data access and drill-down sorting and filtering to deliver actionable insights, including supervisory findings, cross-channel statistics, and trending and pattern-revealing graphs across the range of social collaboration and email channels used for business operations today.

Key Features

- Crisp, Streamlined UX
- Highly Detailed with Precise Graphical Rendering
- Automated Scheduling
- Automated Report Distribution via Email
- Format Versatility (with support for PDF, Microsoft Excel, CSV, Microsoft Word, and others)
- Dynamic Display, with interactive elements and text formatting

Organizations rely on reporting to make better business decisions and safeguard compliance. Foundations Reporting and Insights simplifies compliance operations, helping mid-sized and smaller organizations adhere to regulations and corporate controls for employee communications and behavior. Reporting and Insights is an application built from the ground up to optimize user experience. The application comes standard with a set of pixel-perfect reports designed to meet all regulatory requirements. These provide deep insights into archive and supervision data, using visualizations and interactive features to let your users drill down into specific details. Archive administrators have the option to configure multiple reports with individually customizable schedules for automated generation and distribution, to align to your particular business needs and those of stakeholders in other departments and organizations.

Key Benefits

- Streamline compliance operations through intuitive UX features engineered into Foundations Reporting and Insights. All reports are managed in a single location, and each provides insights into your data.

- Tailor report data and formatting using interactive features provided in Foundations Reporting and Insights. Apply data filters, sort, and select formatting options such as fonts and alignment to clarify and highlight areas of focus or scrutiny.
- Interact deeply with your compliance data. Filter data to simplify the process of summarizing findings from hundreds of pages to a focused few for faster review and planning.
- Schedule the automatic generation and distribution of different reports at specified intervals to serve multiple stakeholders and minimize manual operations.
- Format reports to accommodate specific stakeholder needs and processes, through Reporting and Insights support for PDF, Microsoft Excel, Microsoft Word, CSV, RTF, and JSON output formats.
- Use default reports right away and tailor them to suit your needs over time. Reports provide granular visibility to user activities related to security, searches, and user administration. Deep visualizations are built-in and provide insights into archive, user communications, social media statistics, etc.
