

Retain Mobile for iOS

Micro Focus® Retain™ Mobile delivers secure, encrypted messaging and archiving for iOS, Android, and BlackBerry devices. This solution is for organizations that utilize personal employee and corporate devices to generate and consume business data while meeting regulatory and compliance requirements.

Product Highlights

Retain Mobile helps to assure that companies:

- Meet regulatory compliance standards: Dodd-Frank Act, Gramm-Leach-Bliley Act (GLB), SEC, FINRA, FRCP, Sarbanes-Oxley, HIPAA.
- Monitor smartphone usage to ensure compliance with corporate policies.
- Comply with the Dodd-Frank Act (which gives firms 72 hours to comply when trade reconstruction requests are issued)
 - **Fast mobile communication retrieval:** Retain provides fast and easy retrieval, ensuring compliance with trade reconstruction request timelines.
 - **Complete message thread:** Messages are archived in context, meaning you can see the complete message string, including pre- and post-trade communication.
 - **Secure, accessible archive:** The secure archive can be searched by legal counsel, auditors, or other named users.

Retain Mobile securely archives SMS/MMS and encrypted communication data for iOS devices.

How Retain Mobile Works with Apple iOS

Retain Mobile is the only enterprise-ready solution for iOS archiving.* Retain Mobile pulls the secure SMS/MMS and encrypted communication data directly from a secure server. This means there is no need to tether or sync the device and archiving is done in real time.

Not only does Retain Mobile securely archive all mobile and encrypted communication data for iOS devices, but it also archives mobile communication data for BlackBerry devices via the BlackBerry Enterprise Service (BES) and for Android devices through a lightweight app that is installed on each device.

Dual Persona for Mobile Devices*

Retain Mobile for iOS provides organizations with a dual persona for iOS devices, including iPhone and iPad. This solution allows for BYOD in the enterprise by partitioning the device, which allows personal data to be kept separate from corporate data. Retain Mobile assigns a mobile business number that is separate from the native mobile number. This mobile business number is available through a secure application that is installed on the iOS device.

Secure Messaging and Archiving for iOS

Retain Mobile is the only enterprise-ready solution for iOS archiving. Retain Mobile securely archives mobile communication data for iOS devices, including iPhone and iPad.

* Not available in all countries

With Retain Mobile, you don't lose valuable information; more importantly, your organization stays compliant while your sensitive data remains securely within your organization. This solution ensures compliance with corporate policies or government regulations and helps reduce legal liabilities.

www.microfocus.com

The screenshot shows the Retain mobile application interface. At the top, there's a navigation bar with 'Retain' logo, date '06-Apr-2017 09:15', and user 'Welcome'. Below the navigation bar are tabs for 'Browse', 'Search', 'Advanced Search', 'Legacy Search', 'Exported Items', 'Tag Definitions', and 'Options'. A search bar contains 'stewart rogers' and a 'Search' button. The main content area shows search results for 'Current Search In: (117,208 hits) Reset'. The results are displayed in a table with columns: Type, From, Subject, Recipients, Date, Mailbox, and Folder. The table lists several messages from 'Stewart Rogers' with subjects like 'Archiving Big Attachments', 'Build Naturally', 'Important info', 'Are you available?', 'Progress report', 'Client Submission probe', 'Can you send me the images to work on?', 'Meetin in the morning', 'I received the info on that new deal', 'New Customer information', and 'Q3 prep information needed'.

The app allows users to send text messages and place phone calls via the mobile business number, giving true dual persona. This app is tied directly to a secure server that logs and routes mobile communication. This functionality ensures that personal data stays separate from business data. In addition, all phone call logs and secure text messages (SMS/MMS), done via the secure business app, are archived in one central archive, giving you oversight on these business communication.

Retain Unified Archive

Retain provides unified archiving of all business communication, including email, social media,

and mobile communication data for case assessment, search, and eDiscovery. It can be deployed on-premises or in the cloud. This includes email archiving for Microsoft Exchange, Office 365, Gmail, and Micro Focus GroupWise platforms. Retain Mobile archives mobile device communication data for Android, BlackBerry, and iOS, including SMS/text messages, BBM Messages, BBM Enterprise, phone call logs, and PIN Messages. Retain Social provides monitoring and data insight into message context and tone of all posts for Facebook, Twitter, YouTube, LinkedIn, Instagram, Vimeo, Flickr, Pinterest, and Google+ (on and off network).
