Definitions

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

Term	Definition
Client Device or CD	Means a physical computer system running a client class operating system, including but not limited to Windows XP, Windows Vista, Windows 7, Red Hat Enterprise Linux Desktop, and SUSE Enterprise Linux Desktop. It also means a physical device that runs a client-based hypervisor for client side Virtual Machines running a client class operating system. It does not include a client class computer system, such as a desktop or laptop PC, running a server class operating system.
Device or Dev	Means an addressable entity, physical or virtual, including but not limited to router, switch, bridge, hub, server, PC, laptops, handheld device or printer that resides within the range defined for interrogation and asset tracking.
E-LTU and E-Media	Means products which are electronically delivered only, and as such any references to FOB Destination or delivery methods that are stated on your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
Instance	Means each implementation of the application installed on a Server.
LTU	Means License To Use.
Mobile Device or MobDev	Means a Device running an operating system designed for mobile devices such as but not limited to mobile phones, tablet computers and smartphones that typically connect to a network by means of Wi-Fi or cellular data.
Server or Svr	Means any designated computer system in which an Instance or Instances of the software is installed.
Suite	Means two or more software products combined into a single license offering. The specific software products included in a Suite are specified in the Software Specific License Terms below. Software products included in a Suite are governed by the individual authorizations and use restrictions associated with each software product.

Additional License Authorizations

For Client Automation software products

Term	Definition
Thin Client Device <i>or</i> TCD	Means a physical computer system running an embedded operating system which requires accesses over the network to an application server, web server, or hosted virtual desktop server for its application processing. Embedded operating systems include but are not limited to Windows XP Embedded, Windows Embedded Standard, and Linux.
Virtual Client Machine <i>or</i> VCM	Means a Virtual Machine running on a physical machine running a client class operating system, such as Windows XP, Windows Vista, Windows 7, or Linux.
Virtual Machine(s) <i>or</i> VM(s)	Means a computer that does not physically exist but is simulated by another computer.
