Additional License Authorizations

For File Analysis Suite Products

This Additional License Authorizations (“ALA”) sets forth the applicable License Options and additional specific software license terms that govern the authorized use of the software products specified below and are part of the applicable Micro Focus End User License Agreement (“EULA”) and/or any separate agreement that grants Licensee a license to such products (i.e., Customer Portfolio Terms or other Master Agreement and/or Quotation) (“Applicable Agreement”). The EULA, and/or the Applicable Agreement, if such agreement exists, shall be known as the Governing Agreement. Capitalized terms used but not defined herein shall have the meanings set forth in the Governing Agreement.

Products covered

Products	E-LTU or E-Media available *	Subscription License Non-production software class
File Analysis Suite (FAS)	Yes	Class 1

* Any product sold as E-LTU or E-Media shall be delivered electronically regardless of any contrary designation in a purchase order.

** Additional licenses solely for non-production use, may be available as specified in the Non-Production Licensing Guide found at software.microfocus.com/legal/software-licensing depending on the non-production software class specified above. Any such non-production licenses will be subject to the Non-Production Licensing Guide and the applicable License Option terms and conditions set forth in this ALA.

Definitions

Term	Definition
E-LTU and E-Media	Means products which are electronically delivered only, and as such any reference to FOB Destination or delivery methods that are stated on your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
FAS Standalone Customer	Means customer hosting File Analysis Suite in their own Data Center or Cloud environment.
GB	Means gigabytes which designates the amount of physical capacity that can be managed.
Internal Use	Means access and Use of software for purposes of supporting your internal operations or functions.
Managed Security Provider (MSP)	Means partner hosting the File Analysis Suite for their customers in their own Data Center or Cloud environments.
TB	Means terabytes which designates the amount of physical capacity that can be managed.
Term Support	Means a fixed period support offering that is only valid during the time period of the associated Term.

Software Specific Terms

Software products with software specific license terms are described below. Software products covered by this ALA document (as listed above) and not covered in this section do not have software specific license terms.

File Analysis Suite (FAS)

File Analysis Suite (FAS) delivers file analysis capabilities that enrich data and expose value across our customer's deep and rich data eco-systems. File Analysis Suite is built to help mitigate the risks associated with managing and preserving sensitive data while containing the total cost of compliance. The File Analysis Suite (FAS) license is a consumption-based license and is based in Terabytes (TB) of raw source data, such as the total volume of the source files scanned within a file target (own Data Center or Cloud environments).

FAS for Managed Security Providers is licensed by a Managed Security Provider (MSP) for the amount of TB purchased by the MSP. The license is limited to use by a Managed Security Provider who has signed a Managed Security Provider Agreement and only for the purpose of providing Managed Security Services. An MSP partner hosting File Analysis Suite for their customers in their own Data Center or Cloud environments cannot use the entitlement for their internal use.

Hosting Requirements

Managed Security Providers (MSP) and Stand-Alone Customers hosting File Analysis Suite in their own Data Center or Cloud environments are required to follow the following:

Version Currency, Update Requirements	<ul style="list-style-type: none">▪ FAS Software installed on Customer Environments or on Partner Environments must be updated to the latest code within 90 days of notification of an update to a FAS component.▪ Security Updates will need to be installed within 30 days of notification of an update to a FAS component.▪ Micro Focus is not responsible to fix any issues that are found in older software components if the component has been updated with a newer release.
Environment Hosting Requirements	<ul style="list-style-type: none">▪ MSP and Customers hosting FAS in an internal data Center are required to meet with the FAS Professional Services Team before any software is installed and receive approval to ensure their FAS hosting environment will meet FAS hardware and software requirements.▪ MSP and Customers hosting FAS in deployments in a Cloud environment are required to meet with the FAS Professional Services Team to ensure the cloud environment will support FAS.▪ Do not deploy non approved services or software, (i.e., virus software) on the server hosting environment. Non approved software may have detrimental effects on the performance of FAS. Micro Focus is not responsible for negative impacts of non approved software running on host sever environment.

Internal Use: No Internal Use is allowed with regard to Service Provider Licenses. Internal Use means installation, access and use of the Eligible Products by Partner for the purpose of running or supporting Partner's own internal business operations or functions.

Transfer: Service Provider (SP) Partner is not entitled to transfer the Products to any of the Service Provider (SP) Partner's end customers at any point during or after the contract term.

Support Services Required

1. Annual 24x7 Support and Content Update Subscription is required to host File Analysis Suite
2. FAS Service Pack on premise

Integrations: File Analysis Suite (FAS) comes already bundled with a set of out of the box adapters that allow FAS to connect to a preselected set of repositories. The following adapters are included in the out of the box version of FAS: File system, Exchange®, SharePoint, Office365, One Drive, Content Manager, Google Drive. FAS provides a customer adapter SDK which can be used to scan data from third-party applications.

Additional License Authorizations

For File Analysis Suite Products

Additional License Terms

The following additional license terms shall apply to any software governed by this ALA:

1. You shall install and use the software as authorized in the applicable agreement only as a complete product and may not use portions of such software on a standalone basis separate from the complete software unless expressly authorized in the Supporting Material, specifications, or an applicable agreement.
2. Software contains software and associated specifications licensed from third parties that are confidential to, and trade secrets of, such parties. You will not take any action other than to Use it as authorized under the agreement as part of the software products and will not disclose it to third parties.
