This Service Description document describes the components and services included in Operations Bridge (“OpsB”) Premium on Open Text Private Cloud (which also may be referred to as “SaaS”) and, unless otherwise agreed to in writing, is subject to the Micro Focus Customer Terms for Software-as-a-Service (“SaaS Terms”) found at <https://www.microfocus.com/en-us/legal/software-licensing>. Capitalized terms used but not defined herein shall have the meanings set forth in the SaaS Terms. Standard Service Features

Standard Service Features

High Level Summary

Micro Focus Operations Bridge SaaS (“OpsB SaaS”) is a native cloud application that delivers Full Stack AIOps, including Event Management, Analytics and OPTIC Data Lake, Dashboarding and Reporting, and Managed Hybrid IT Monitoring.

SaaS Delivery Components

SaaS Delivery Components	Included
One OpsB SaaS Premium production tenant	✓
One OpsB SaaS Premium non-production tenant	✓
Five (5) years daily aggregation in OPTIC Data Lake data retention	✓
One (1) TB monthly of data extraction (egress) from OpsB-SaaS	✓
OpsB-SaaS Integration Hub	○
Capacity extension to OPTIC Data Lake	○
Additional data extraction (egress) from OpsB SaaS	○

✓ = Included
○ = Optional for an additional fee

SaaS Operational Services

SaaS Operational Services	Included
Onboarding:	
Kick-off meeting, handover of product and support materials, verification of online access, scope validation and service goals, discussion of training requirements	✓
Customer Success Management (CSM) Meetings	✓
Product Support	✓
Service Health portal	✓

*Full documentation of the capabilities of Operations Bridge - SaaS solution, and the optional capabilities outlined in this service description is available at: <https://docs.microfocus.com/itom/OBS:SaaS/GetStarted>

Architecture Components

OpsB SaaS solution infrastructure consists of two (2) parts:

- **OpsB SaaS** which is a cloud native platform that delivers event management, analytics, data consolidation, hyperscale cloud monitoring, dashboarding and reporting
- **Micro Focus provided on-premise components** used to collect monitoring data from inside the customer’s firewall or other locations. The on-premise components cover Consolidation, Systems Management and Application Performance Management use cases.

Micro Focus deploys **OpsB SaaS** using a shared infrastructure platform, monitors the system for 24x7 availability, and provides related 24x7 infrastructure support, including application version upgrades. The Customer accesses OpsB SaaS application through the Internet (HTTPS).

Micro Focus provided on-premise components include:

- **Monitoring Service Edge** is an optional component used to collect and forward metrics collected by the Operations Agent to OpsB SaaS, and routes CLI requests to the SaaS instance from inside the customer's firewall
- **Micro Focus Operations Bridge Manager (OBM)** is an optional component that collects event, topology and performance management data originating from servers, networks, applications, storage, and other IT silos within the customer's Data Center secured via a firewall and it forwards to the OpsB SaaS instance for consolidation in the central event console
- **Micro Focus SiteScope** is an optional component in an agentless environment to collect key performance measurements and report topology on a wide range of back-end infrastructure components. The monitors are individually configured to automatically test performance and availability of systems and services in the network environment.
- **Micro Focus Operations Agent** is an optional component to monitor a system by collecting metrics that indicate the health, performance, resource usage, and availability of essential elements of the system
- **Micro Focus Business Process Monitor** is an optional component to monitor synthetic transactions of an application such as end-user experience, availability, and performance of applications
- **Micro Focus Application Performance Management** is an optional component to isolate problems real-time for applications deployed on-premise, cloud, or mobile
- **Micro Focus Operations Bridge Integration Hub** is an optional component to create powerful integrations. Integration Hub seamlessly runs in the environment while extracting and transferring data between systems in real-time.

Full documentation for integrating on-premise components with the OpsB SaaS instance is available at:

<https://docs.microfocus.com/itom/OBS:SaaS/GetStarted>

In general, the following map to 1 Unit:

Consolidation Use Case:

- 1 Unit for 1 OS Instance or 5 Transactions or 1 million Page Views/Month or 10 Network Devices or 10 Storage elements from other monitoring tools for Monitored Node from 3rd Party Monitoring Tool like SCOM, OEM, etc. OR

Systems management Use Case:

- 1 Unit for agentless monitoring using SiteScope for 1 Node (includes all Micro Focus SiteScope Solution Templates, and SiteScope Monitors) OR
- 1 Unit for URL Monitoring using SiteScope for 10 URLs (includes monitors of the following type: URL, URL Content, URL List, URL Sequence, Web Service, Link Check, XML Metrics) OR
- 1 Unit for Basic Transaction Monitoring using SiteScope for 5 Transactions OR
- 1 Unit for Basic Services Monitoring using SiteScope for 10 Services. Basic Services include URL, ping, port, DNS, FTP, SNMP, SNMP Trap, browsable SNMP, or network bandwidth monitoring OR
- 2 Units for Infrastructure Monitoring using Agent-OR
- Cloud resources monitored via on-premise management pack - 1 Unit for 10 Cloud Service infrastructure Instances (e.g., AWS EC2, AWS ECS, AWS S3, Azure VM, Azure Container Services, Azure Storage) or 1 Cloud Service Platform Instances (e.g., SQL, AD, Load Balancer, RDS, ELB etc.) OR

- Cloud resources monitored via hyperscale cloud monitoring in SaaS - 1 Unit for 1 Cloud Service Infrastructure Instance (e.g., EC2, EC2 ASG, ELB, EBS, S3, RDS, SNS, SQS, ECR, EKS, Azure Virtual Machine, Virtual Machine Scale Set, Container Registry, Load Balancer, etc.) OR
- 1 Unit for 10 Network Devices or 10 Containers or Note: Virtualization hypervisors require licenses for the hypervisor host and each virtual machine (guest) OR
- 1 Unit for 1 service monitored in Microsoft 365 (e.g., Exchange, SharePoint, Teams, OneDrive) or

Application Performance Management Use Case:

- 1 Unit for Synthetic Monitoring of 1 Transaction from single location or
- 5 Units for Synthetic Monitoring of 1 Transaction from Unlimited locations or

125 MB of OPTIC Data Lake storage is included per 1 Unit.

Any required on-premise components are installed and configured by the Customer or Customer can choose to contract out to professional consultants. Micro Focus does not commit to any SLO for the on-premise components.

Micro Focus does not operate third-party integrations on behalf of the Customer and will not commit to any SLO for these components.

Application Administration

Customer will access OpsB SaaS application using a supported web browser and the URL provided to them. Micro Focus SaaS Operations team will create the necessary roles, groups, and users for Customer to access the OpsB SaaS application.

Users with administrative rights will be able to access select administration pages to configure OpsB SaaS capabilities and to integrate data sources into OpsB SaaS. Micro Focus reserves the right to determine which administrative features will be made available in the OpsB SaaS instance.

Customer will open a ticket with Micro Focus SaaS Operations team to execute tasks such as, but not limited to, unlocking user accounts, CLIP integrations, customer provided business intelligence tools integration, and attribute customizations.

Service Support

Customer may contact Micro Focus through a variety of methods such as online support tickets or telephone. The Micro Focus Support Team will either provide support to Customer directly or coordinate delivery of this support.

Online support for OpsB SaaS is available at: <https://pcs.saas.microfocus.com>

OpsB SaaS includes an extensive online contextual help to aid with tailoring and configuration of OpsB to align with your business requirements. Full documentation of the capabilities of OpsB SaaS, and the optional capabilities outlined in this service description is available at: <https://docs.microfocus.com/itom/OBS:SaaS/GetStarted>

As part of the Micro Focus Operations Bridge community, you can get additional assistance and aid from your peers as well as get access to live and recorded webinars (practitioner forum series). Micro Focus Operations Bridge community is available at: https://community.microfocus.com/it_ops_mgt/ops_bdg/

Your suggestions for enhancements to Operations Bridge are important to us. We encourage you to share your ideas, vote for your favorite ones, and enhance existing ideas with your feedback and comments. The

popularity of an idea is measured through votes and comments at:
https://community.microfocus.com/it_ops_mgt/ops_bdg/i/opsbridge_idea_exchange

Micro Focus staffs and maintains a 24x7x365 Service Operations Center, which will be the single point of contact for all issues related to the support for OpsB SaaS. Customer will maintain a list of authorized users who may contact Micro Focus for support. The Customer’s authorized users may contact Micro Focus for support via the Web portal or the Telephone 24 hours a day, 7 days a week.

Assistance for the on-premise components will be provided through the standard support channels.

Activity	
Customer Success Management	✓
Email and Online Notifications	✓
On-boarding: Kick-off meeting, handover of product and support materials, verification of online access, scope validation and service goals, discussion of training requirements	✓
Version Updates: Major version updates, minor version updates, patches, and security fixes. Notification period according to notification timelines via release notes and help resources available	✓ ¹
Service Reviews Meeting reviewing service quality, and to provide feedback on improvements required	Yearly
Assisting with the implementation / configuration and tailoring	Available at additional cost
Availability SLA	99.9%

¹Notifications regarding release updates to the Micro Focus Operations Bridge - SaaS solution will be provided via email.

Service Monitoring

Micro Focus monitors the availability of OpsB SaaS solution components deployed in SaaS 24x7. Micro Focus uses a centralized notification system to deliver proactive communications about application changes, outages, and scheduled maintenance.

As part of OpsB SaaS offering, we also include a Service Health portal for the SaaS-deployed components which allows the Customer to see:

- Current availability of OpsB SaaS environment
- Details of any upcoming planned maintenance
- Outage reports for any incidents that have been identified by our support teams
- Historical SLO data

The Link to Service Health portal for your tenant will be provided as part of your onboarding to Micro Focus SaaS. Details are also available via the support portal: <https://pcs.saas.microfocus.com>

Any required on-premise component, not within the sole control of Micro Focus, is Customer's sole responsibility. Micro Focus does not commit to any SLO for the on-premise components.

Capacity and Performance Management

The architecture used by OpsB SaaS allows for addition of capacity to applications, databases, and storage as required to support the services provided.

Operational Change Management

Micro Focus follows a set of standardized methodologies and procedures for efficient and prompt handling of changes to SaaS infrastructure and application, which enables beneficial changes to be made with minimal disruption to the service.

Data Backup and Retention

The data backup and retention described in this section are part of Micro Focus's overall business continuity management practices designed to attempt to recover availability to Customer of OpsB SaaS and access to OpsB SaaS Customer data, following an outage or similar loss of service.

SaaS Data

The following types of SaaS Data reside in the Micro Focus SaaS environment:

- Customer authorized user details (for instance, customer administrator users, operator users)
- Configuration information that may include credentials necessary for integrations with service management tools, customer provided business intelligence tools, certificates necessary to trust connectivity with on-premise Operations Bridge points of presence
- Resulting information collected during product feature use such as events, topology, metrics, health indicators, KPI status
- Reports, dashboards, and reporting data
- Audit logs

The customer will work with Micro Focus SaaS support for user creation and integration configurations.

Data retention in the SaaS-based OPTIC Data Lake, component of OpsB SaaS, is governed by the following:

- Raw data (5-minute interval, 5-minute sample) will be retained for 30 days
- Hourly aggregation will be retained for 365 days
- Daily aggregation will be retained for 1825 days

The Data Backup Frequency is every 8 hours and Micro Focus will perform necessary daily backup of the database and related storage systems (including configuration data) for OpsB SaaS instance. The Backup Retention Time is seven (7) days, meaning Micro Focus retains each daily backup for the most recent seven (7) days ("Data Retention Time").

Micro Focus's standard storage and backup measures are Micro Focus's only responsibility regarding the retention of this data, despite any assistance or efforts provided by Micro Focus to recover or restore Customer's data. Micro Focus will be unable to restore any data not included in the database (for example not properly entered by the user, lost, or corrupted etc.) at the time of backup or if Customer's request comes after the Data Retention Time of such backup. As such, Micro Focus cannot guarantee no data loss.

Disaster Recovery for SaaS

Business Continuity Plan

Micro Focus SaaS continuously evaluates different risks that might affect the integrity and availability of OpsB SaaS. As part of this continuous evaluation, Micro Focus SaaS develops policies, standards and processes that are implemented to reduce the probability of a continuous service disruption. Micro Focus documents its processes in a business continuity plan (“BCP”) which includes a disaster recovery plan (“DRP”). Micro Focus utilizes the BCP to provide core Micro Focus SaaS and infrastructure services with minimum disruption. The DRP includes a set of processes that Micro Focus SaaS implements and tests Micro Focus SaaS recovery capabilities to reduce the probability of a continuous service interruption in the event of a service disruption.

OpsB SaaS is implemented using a cloud-based technology service stack in a redundant mode over multiple availability zones. The failure of one zone will not impact the service availability as the system will automatically failover from the other zones. In the event of a disaster impacting more than one zone at the same time, such as a complete cloud region, the DRP’s target is to provide restoration of Operations Bridge - SaaS within 24 hours (Recovery Time Objective, RTO) following Micro Focus’s declaration of a disaster.

The Vertica database backend used by OpsB SaaS is deployed in a single availability zone. If the availability zone hosting Vertica goes down, the DRP’s target is to provide restoration of OpsB SaaS within 24 hours (Recovery Time Objective, RTO) following Micro Focus’s declaration of a disaster.

Backups

Micro Focus SaaS performs backups of OpsB SaaS databases and application configurations with an eight (8) hours recovery point objective. Backups are performed using cloud-based technology across multiple regions. The integrity of backups is validated by (1) real time monitoring of the storage snapshot process for system errors, and (2) and annual restoration of production data from an alternate site to validate both data and restore flows integrity.

SaaS Security

Micro Focus maintains an information and physical security program designed to protect the confidentiality, availability and integrity of Customer Personal Data and confidential information (the “Micro Focus Security Program”).

Technical and Organizational Measures

Micro Focus regularly tests and monitors the effectiveness of its controls and procedures. The measures set forth in <https://www.opentext.com/assets/documents/en-US/pdf/opentext-technical-and-organizational-measures-en.pdf> may be modified by Micro Focus but represent a minimum standard. Customer remains responsible for determining the sufficiency of these measures.

Audit

Micro Focus appoints an independent third party to conduct an annual audit of the applicable policies used by Micro Focus to provide OpsB SaaS. A summary report or similar documentation will be provided to Customer upon request. Subject to Customer’s execution of Micro Focus’s standard confidentiality agreement, Micro Focus agrees to respond to a reasonable industry standard information security questionnaire concerning its information and physical security program specific to SaaS no more than once per year. Such information security questionnaire will be considered Micro Focus confidential information.

Micro Focus Security Policies

Micro Focus conducts annual reviews of its policies around the delivery of SaaS against ISO 27001, which includes controls derived from ISO 27034 – “Information Technology – Security Techniques – Application Security.” Micro Focus regularly re-evaluates and updates its information and physical security program as the industry evolves, new technologies emerge, or new threats are identified.

Security Incident Response

In the event Micro Focus confirms a security incident resulted in the loss, unauthorized disclosure, or alteration of Customer-provided SaaS Data (“Security Incident”), Micro Focus will notify Customer of the Security Incident and work to reasonably mitigate the impact of such Security Incident. Should Customer believe that there has been unauthorized use of Customer’s account, credentials, or passwords, Customer must immediately notify Micro Focus Security Operations Center via softwaresoc@microfocus.com.

Micro Focus Employees and Subcontractors

Micro Focus requests that all employees involved in the processing of SaaS Data are authorized personnel with a need to access the Customer-provided SaaS Data, are bound by appropriate confidentiality obligations and have undergone appropriate training in the protection of customer data. Micro Focus requests that any affiliate or third-party subcontractor involved in processing Customer-provided SaaS Data enters into a written agreement with Micro Focus, which includes confidentiality obligations substantially similar to those contained herein and appropriate to the nature of the processing involved.

Data Subject Requests

Micro Focus will refer to Customer any queries from data subjects in connection with SaaS Data.

Scheduled Maintenance

To enable Customers to plan for scheduled maintenance by Micro Focus, Micro Focus reserves predefined timeframes to be used on an as-needed basis. Micro Focus reserves a weekly two (2) hour window (Scheduled to occur on Sunday in the 00:00 to 23:00 Greenwich Mean Time, the exact 2-hour time block is dependent on the location of the OpsB SaaS instance) and one (1) monthly eight (8) hour window (Scheduled to occur on Sunday in the 00:00 to 23:00 Greenwich Mean Time, the exact 8-hour block is dependent on the location of the OpsB SaaS instance). These windows will be used on an as-needed basis.

Planned windows will be scheduled at least two (2) weeks in advance when Customer action is required, or at least four (4) days in advance otherwise. In the rare event where, Micro Focus needs to make an emergency change requiring a downtime outside of those planned maintenance windows, the customers will be notified as soon as possible.

Scheduled Version Updates

“SaaS Upgrades” are defined as major version updates, minor version updates, and binary patches applied by Micro Focus to Customer’s SaaS in production. These may or may not include new features or enhancements. Micro Focus determines whether and when to develop, release and apply any SaaS Upgrade. Customer is entitled to SaaS Upgrades during the applicable SaaS Order Term unless the SaaS Upgrade introduces new functionality that Micro Focus offers on an optional basis for an additional fee.

Micro Focus determines whether and when to apply a SaaS Upgrade to Customer’s SaaS. Unless Micro Focus anticipates a service interruption due to a SaaS Upgrade, Micro Focus may implement a SaaS Upgrade at any

time without notice to Customer. Micro Focus aims to use the Scheduled Maintenance windows defined herein to apply SaaS Upgrades. Customer may be required to cooperate in achieving a SaaS Upgrade that Micro Focus determines in its discretion is critical for the availability, performance, or security of SaaS.

Service Decommissioning

Upon expiration or termination of the SaaS Order Term, Micro Focus may disable all Customer access to OpsB SaaS, and Customer shall promptly return to Micro Focus (or at Micro Focus's request destroy) any Micro Focus materials.

Micro Focus will make available to Customer any SaaS Data in Micro Focus' possession in the format generally provided by Micro Focus. The target timeframe is set forth below in Termination Data Retrieval Period SLO. After such time, Micro Focus shall have no obligation to maintain or provide any such data, which will be deleted in the ordinary course.

Upon expiration or termination of the SaaS Order Term, the license key for the on-premise components will be invalid.

Service Level Objectives

Micro Focus provides clear, detailed, and specific Service Level Objectives (SLOs) for the services that SaaS provides to its customers. These SLOs are targets used by Micro Focus to deliver the service and are provided as guidelines. They in no way create a legal requirement or obligation for Micro Focus to always meet these objectives.

Micro Focus will provide self-service access to Customer to the Service Level Objectives data online at <https://home.software.microfocus.com/myaccount>.

Solution Provisioning Time SLO

Solution Provisioning is defined as OpsB SaaS being available for access over the internet. Micro Focus targets to make OpsB SaaS available within ten (10) business days of the Customer's Order for SaaS being booked within the Micro Focus order management system.

Customer is responsible for installing and configuring any additional on-premise components for their applications. Any on-premise components of the solution are not in scope of the Solution Provisioning Time SLO. Additionally, CLIP, third party tool integration, and the import of Customer data into the application are not in scope of the Solution Provisioning Time SLO.

Initial SaaS Response Time SLO

The Initial SaaS Response Time refers to the Service Support described herein. It is defined as the acknowledgment of the receipt of a customer request and the assignment of a case number for tracking purposes. Initial SaaS Response will come as an email to the requester and include the case number and links to track it using Micro Focus online customer portal. The Initial SaaS Response Time covers both service request and support requests. Micro Focus targets to provide the Initial SaaS Response no more than one hour after the successful submission of a customer request.

SaaS Support SLOs

There are two types of SaaS Support SLOs: Service Request and Support Request SLOs.

- The Service Request SLO applies to the majority of routine system requests. This includes functional system requests (product add/move/change), informational, and administrative requests.
- The Support Request SLO applies to issues that are not part of the standard operation of the service and which causes, or may cause, an interruption to or a reduction in the quality of that service.

The Response and Resolution Targets are provided as guidelines and represent typical request processing by Micro Focus SaaS support teams. They in no way create a legal requirement or obligation for Micro Focus to always respond in the stated time. The Response and Resolution Targets, including their scope and determining factors (such as impact and urgency), are further described at <https://home.software.microfocus.com/myaccount/slo/>.

Termination Data Retrieval Period SLO

The Termination Data Retrieval Period is defined as the length of time in which the Customer can retrieve a copy of their SaaS Data from Micro Focus. Micro Focus targets to make available such data for download in the format generally provided by Micro Focus for 30 days following the termination of the SaaS Order Term.

Service Level Commitments

SaaS Availability SLA

SaaS availability is the SaaS production application being available for access and use by Customer over the Internet. Micro Focus will provide Customer access to the SaaS production application on a twenty-four hour, seven days a week (24x7) basis at a rate of 99.9 % (“Target Service Availability” or “TSA”).

Measurement Method

TSA shall be measured by Micro Focus using Micro Focus monitoring software running from a minimum of four global locations with staggered timing. On a quarterly basis, the TSA will be measured using the measurable hours in the quarter (total time minus Downtime Exclusions) as the denominator. The numerator is the denominator value minus the time of any outages in the quarter (duration of all outages combined) to give the percentage of available uptime (2,198 actual hours available / 2,200 possible available hours = 99.9 availability).

An “outage” is defined as two consecutive monitor failures within a five-minute period, lasting until the condition has cleared.

Downtime Exclusions

The TSA shall not apply to or include any time during which SaaS is unavailable in connection with any of the following (specifically, the number of hours of unavailability in the measured period per the Measurement Method section above due to the following shall not be included in either the numerator or the denominator for the measurement):

- Overall Internet congestion, slowdown, or unavailability
- Unavailability of generic Internet services (e.g., DNS servers) due to virus or hacker attacks
- Outages caused by disruptions attributable to force majeure events (i.e., unforeseeable events outside of Micro Focus’ reasonable control and unavoidable even by the exercise of reasonable care
- Customer-caused outages or disruptions
- Outages not caused by Micro Focus or not within the control of Micro Focus (i.e., unavailability due to problems with the Internet), unless caused by Micro Focus’ service providers
- Unavailability due to Customer equipment or third-party computer hardware, software, or network infrastructure not within the sole control of Micro Focus
- Scheduled maintenance activities

- Scheduled SaaS Upgrades
- Customer exceeding the service restrictions, limitations or parameters listed in this Service Description and/or the Order
- Unavailability due to customizations made to the Micro Focus SaaS which are not validated, reviewed, and approved in writing by both parties
- System downtime requested by Customer
- Suspensions of the Micro Focus SaaS by Micro Focus as a result of Customer’s breach of the SaaS Terms

Reporting

Micro Focus will provide self-service access to Customer to the availability data online at <https://home.software.microfocus.com/myaccount>

In addition, Micro Focus will provide an Actual Service Availability Report (“ASA Report”) in accordance with this Service Level Commitments section to Customer upon request. If Customer does not agree with the ASA Report, written notice of non-agreement must be provided to Micro Focus within fifteen (15 days) of receipt of the ASA Report.

Remedies for Breach of Service Levels

- i. **Sole remedy.** Customer’s rights described in this section state Customer's sole and exclusive remedy for any failure by Micro Focus to meet the agreed service levels.
- ii. **Escalation.** Quarterly ASA below 98% shall be escalated by both parties to the Vice President (or equivalent).
- iii. **Credits.** Subject to the terms herein, Micro Focus will issue a credit reflecting the difference between the measured ASA for a quarter is less than the TSA. (“**Remedy Percent**”). For clarity, several example calculations using this formula are illustrated in the table below:

Target Service Availability (TSA)	Actual Service Availability	Result	Remedy Percent
99.9 %	99.9%		Not Applicable
99.9%	94.9%	5% missed	5%
99.9%	90.9%	9% missed	9%

Customer must request credits in writing to Micro Focus within ninety (90) days of receipt of the ASA Report resulting in such credit and identify the support requests relating to the period where the SaaS production application was not available for access and use by the Customer over the internet. Micro Focus shall apply the requested credits on a quarterly basis.

Standard Service Requirements

Roles and Responsibilities

This section describes general Customer and Micro Focus responsibilities relative to OpsB SaaS. Micro Focus’s ability to fulfill its responsibilities relative to SaaS is dependent upon Customer fulfilling the responsibilities described below and elsewhere herein:

Customer Roles and Responsibilities

Customer Role	Responsibilities
Business Owner	<ul style="list-style-type: none">• Owns the business relationship between the customer and Micro Focus• Owns the business relationship with the range of departments and organizations using SaaS• Manages contract issues
Project Manager	<ul style="list-style-type: none">• Coordinates customer resources as necessary• Serves as the point of contact between the customer and Micro Focus• Drives communication from the customer side• Serves as the point of escalation for issue resolution and service-related issues
Administrator	<ul style="list-style-type: none">• Serves as the first point of contact for SaaS end users for problem isolation• Performs SaaS administration• Provides tier-1 support and works with Micro Focus to provide tier-2 support• Coordinates end-user testing as required• Leads ongoing solution validation• Trains the end-user community• Coordinates infrastructure-related activities at the customer site• Owns any customization
Subject Matter Expert	<ul style="list-style-type: none">• Leverages the product functionality designed by Customer's SaaS administrators.

Micro Focus Roles and Responsibilities

Micro Focus Role	Responsibilities
Customer Service Centre (CSC)	<ul style="list-style-type: none">• Primary point of contact for service requests. The customer can contact the Service Operations Center for all services such as support and maintenance, or issues regarding availability of SaaS• Provides 24x7 application support
Operations Staff (Ops)	<ul style="list-style-type: none">• Monitors the Micro Focus systems and SaaS for availability• Performs system-related tasks such as backups, archiving, and restoring instances according to Micro Focus's standard practices• Provides 24x7 SaaS infrastructure support

Assumptions and Dependencies

This Service Description is based upon the following assumptions and dependencies between the Customer and Micro Focus:

- Customer must have internet connectivity to access OpsB SaaS
- OpsB SaaS will be delivered remotely and in English only
- A SaaS Order Term is valid for a single application deployment, which cannot be changed during the SaaS Order Term
- The service commencement date is the date on which Customer's Order is booked within the Micro Focus order management system
- The import of Customer data into SaaS during the implementation requires that the information is made available to Micro Focus at the appropriate step of the solution implementation and in the Micro Focus designated format
- Customer must ensure that its administrators maintain accurate contact information with Micro Focus
- Customer has determined, selected, and will use options in the Customer environment that are appropriate to meet its requirements, including information security controls, connectivity options, and business continuity, backup, and archival options
- Customer will establish and follow secure practices for individual account-based access for accountability and traceability

Furthermore, this Micro Focus Operations Bridge Service is provided based on the assumption that Customer will implement and maintain the following controls in its use of Micro Focus Operations Bridge - SaaS:

- Configuring Customer's browser and other clients to interact with OpsB SaaS
- Configuring Customer's network devices to access OpsB SaaS
- Appointing authorized users
- Configuring its SaaS account to require that end user passwords are sufficiently strong and properly managed
- Procedures for access approvals, modifications, and terminations.

Good Faith Cooperation

Customer acknowledges that Micro Focus's ability to provide SaaS and related services depends upon Customer's timely performance of its obligations and cooperation, as well as the accuracy and completeness of any information and data provided to Micro Focus. Where this Service Description requires agreement, approval, acceptance, consent or similar action by either party, such action will not be unreasonably delayed or withheld. Customer agrees that to the extent its failure to meet its responsibilities results in a failure or delay by Micro Focus in performing its obligations under this Service Description, Micro Focus will not be liable for such failure or delay.
