

ArcSight Threat Hunting

Strengthen your cyber resilience and gain comprehensive threat coverage with the ArcSight Threat Hunting service. Amplify your SOC team's efforts with experts trained to protect, detect, and evolve what matters most in your enterprise with ArcSight Intelligence behavioral analytics.

ArcSight Threat Hunting at a Glance

Protect

Uncover the elusive threats your security controls missed to protect your critical assets and organization.

Detect

Collect actionable insights from rich threat intelligence to quickly detect and respond to impending threats.

Evolve

Create a resilient SOC with custom support combined with evolving expert knowledge of your unique threat landscape.

Discovering Vulnerabilities

With limited resources, staff, and experienced analysts, your organization is likely unable to find and remediate threats with speed and accuracy. Insufficient knowledge and insight surrounding both documented and elusive threats mean that your organization is vulnerable to attack, whether from insiders or external threat actors. In addition to this, your existing security tools may be fragmented, overwhelming, and complex. To effectively detect and remediate threats before the damage is done, your security controls need to be amplified by powerful behavioral analytics coupled with custom threat expertise. With an intelligent and experienced threat hunting team, you'll gain more context and assurance that your security controls are a match for evolving threat actors.

Protecting Your Business from Costly Breaches

Stop costly data breaches in their tracks and protect what matters most with ArcSight Threat Hunting, an add-on service for the ArcSight Intelligence SaaS offering. Our team of experienced threat hunters has expansive knowledge of the industry, threat techniques and tactics, effective SOC products, and elusive threat actors. Catalyze your security team's efforts to protect your SOC from elusive threats that your security controls missed. Our team's years of experience in finding threats like insider threats and advanced outside attacks coupled with powerful EDR, SIEM, and behavioral analytics solutions, gives them all they need to guide your security team in effectively detecting, triaging, and responding to critical threats.

With this additional layer of security, your SOC team can regain confidence in your cyber resilience, save money, and achieve peace of mind.

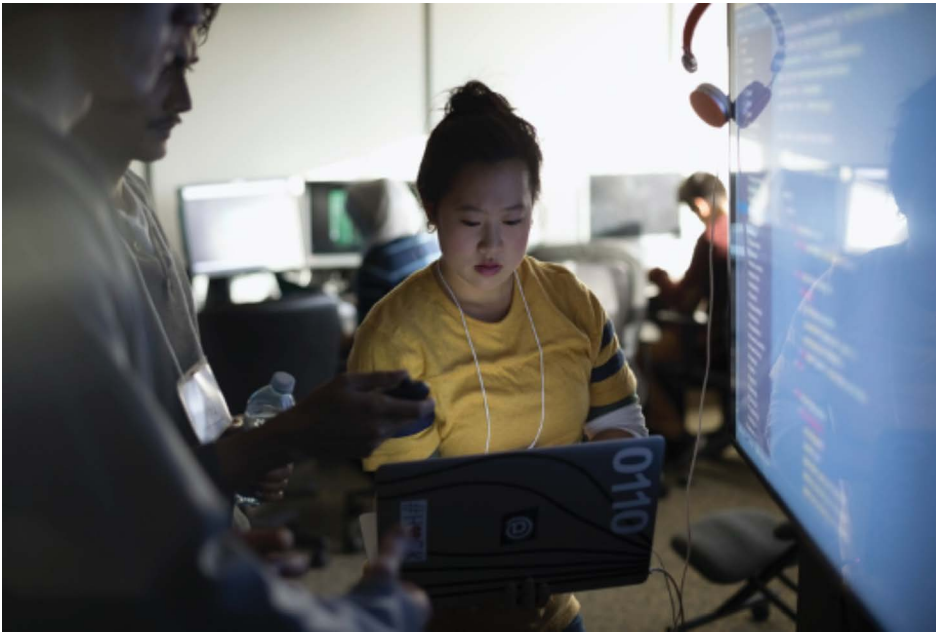

Threat Hunting That Evolves with Your Organization

Every organization is different, and the ArcSight Threat Hunting team is armed with the tools and knowledge to find and mitigate insidious attacks unique to your organization that are missed given your existing security tools and resources. Our team's threat expertise provides you with unique insights and context derived from ArcSight Intelligence to detect complex, hard-to-find threats hidden in your enterprise. In addition, our threat hunting team leverages ArcSight Intelligence's state-of-the-art UI to transform rich threat intelligence into simplified actionable insights so your SOC can swiftly respond to threats and improve your existing security controls. With credible and reliable threat expertise surrounding the industry and cyber-security solutions, ArcSight Threat Hunting enables your SOC with comprehensive threat coverage and proactive detection and response. We tailor our threat hunting for your organization based on unique analytical findings in your enterprise and an understanding of your current threat landscape.

Features and Benefits

Comprehensive Threat Detection: Elusive threats likely have unique, untraditional patterns that easily go undetected with your existing security tools. ArcSight Threat Hunting service combined with ArcSight

Intelligence's behavioral analytics uncovers previously undetected threats before it's too late.

Expert Advice: Resource constraints, talent shortages, and the increasingly rapid evolution of attack techniques makes your organization more vulnerable to advanced threats. Expertise from the ArcSight Threat Hunting team boosts your SOC's ability to identify threats that are missed. You'll gain immediate guidance on response and ways to improve your organization's cyber resilience.

Build a Resilient SOC: Never worry about your resources not stacking up to evolving

threats. With ArcSight Threat Hunting, you can gain confidence in your security controls and save analyst time with actionable insights to achieve cyber resilience.

Insider Threat Detection: Insider threats are notoriously difficult to detect as they are heavily contextual and rarely follow traditional patterns of attack. The ArcSight Threat Hunting experts have rich knowledge and powerful tools to appropriately identify and respond to insider attacks before the damage is done.
