

HCMX Is a Leader in the Forrester Wave™ for Hybrid Cloud Management

[The Forrester Wave™: Hybrid Cloud Management, Q4 2022](#) is just out, and we are pleased to announce that Hybrid Cloud Management X (HCMX) has been named a Leader, earning the highest designation possible in the Forrester report.

FORRESTER®

**WAVE
LEADER 2022**

Hybrid Cloud
Management

In light of our recent, hot-trending release of [OpenText™ Hybrid Cloud Management X FinOps Expresss](#) (HCMX FinOps Express), focused solely on the cloud financial management capabilities of OpenText™ Hybrid Cloud Management X's (HCMX) broader coverage, it is noteworthy that HCMX was recognized by customers interviewed for the Forrester report for its cloud cost-management capabilities—such as financial governance and workload scheduling.

We are appreciative of this recognition. HCMX delivers strong capabilities for managing cloud costs. By providing visibility and show-back detail across clouds, it promotes a culture of financial responsibility and improves

decision-making related to cloud spend. AI-powered recommendations help manage reservations and reduce the rate paid for public cloud services. And self-service guardrails for developers and engineers help to prevent reckless provisioning and costly cloud bill surprises. For example, an automated scheduler switches workload times on/off and scales resources up/down to match demand.

In their report Forrester noted that HCMX also has superior workflow designers and configuration management capabilities.

HCMX supports multiple lifecycle phases with a UI-friendly workflow designer that includes numerous templates for provisioning,

Connect with Us

maintenance, and Day 2 operations. HCMX also includes a blueprint designer for building hybrid cloud infrastructure and apps. Add in rich compliance features plus built-in systems for configuration management and orchestration, and you get a uniquely comprehensive approach for managing public and private clouds end to end, from a single point of control.

At OpenText™, we view HCMX as an essential product that merits significant financial investment and the focus of an experienced team of development engineers. We are honored that Forrester gave us the maximum possible points in the product vision and execution roadmap criteria.

We invite you to [read the full Forrester report](#) for the most recent and trustworthy analyst insights on:

- The role and importance of cloud management tooling.
- Cloud management trends.
- Detailed vendor evaluations with rankings.
