

# Microsoft 365 Data Backup and Recovery Protection

Backing up your Microsoft 365 data is your responsibility. Data Protector for Cloud Workloads ensures your Microsoft 365 data is protected and recoverable.

## Microsoft 365 Data Backup and Recovery Protection at a Glance:

- **Microsoft 365 Exchange Online:**  
Corporate email protection
- **Microsoft 365 SharePoint Online:**  
Collaborative files and documents securely backed up
- **OneDrive for Business:**  
Accessible cloud storage quickly recoverable
- **Teams:**  
Chats, document libraries and sites fully protected

Deploying Microsoft 365 provides many benefits due to its wide range of applications and services. Microsoft commits to ensuring the applications will always be available, but Microsoft 365 data backup and disaster recovery rests with the client. Ensure a dependable data protection solution is deployed to protect your business data from:

- Accidental deletion or overwriting of data
- Malicious data deletion or corruption from internal or external sources
- Recovery from malware or ransomware attacks
- Cloud infrastructure outages
- Expired licenses resulting in lost data

Micro Focus Data Protector for Cloud Workloads is built on a scalable architecture to ensure maximum performance is always available to meet the backup and recovery needs of growing data demands. Automatic synchronization of new users into backup policies ensures data protection when any user changes occur. Store backups on local file systems or using Azure Blob Storage.

Quick search and find can be applied for any file in Office 365, and instant restore can be performed locally or to the cloud. Granular restore can be performed on OneDrive files, Exchange Online mailboxes, contacts and calendars, Exchange archive mailboxes, and SharePoint items.

### Microsoft 365 Exchange Online Protection

Comprehensive backup protection for the corporate email system enables all aspects of exchange to be backed up including emails, contacts, calendar, and events.

### Sharepoint Online Backup

SharePoint provides the collaboration your employees need to be effective and productive when working together. Data Protector for Cloud Workloads provides the protection for your collaborative files with a scalable architecture capable of handling an expanding repository.

### OneDrive for Business

OneDrive provides mobility and flexibility of platform for accessing files, but also increases vulnerability to file loss through human file deletion (accidental and malicious), accidental overwriting of data, and cloud infrastructure outage. Recover files reliably with a solution designed to protect.
