Retain Unified Archiving vs Netmail

Netmail has limited email and eDiscovery capabilities. As a result, it is lacking in six major organizational areas. These top concerns, based upon a recent survey conducted by NASCIO, are Compliance, eDiscovery, Data Protection, Audit Preparedness, Increasing IT Costs, and Employee Productivity.

Retain Unified Archiving at a Glance:

+ **Unified archiving:** Email, social, and mobile communication archiving in one central location
+ **Built-in eDiscovery:** Retain Unified Archiving includes powerful eDiscovery tools, at no additional cost
+ **Archive search:** Retain Unified Archiving features a "Google" like search tool for quick and easy searches
+ **Flexible archive access:** Access the archive from the email plugin, the web access viewer, the mobile archive app, and the offline viewer
+ **End user access:** Users can access, browse, and search their personal archive

The following outlines a complete list showing where Netmail lacks compliance, eDiscovery, and audit preparedness functionality. This list also provides insight into its lack of functionality, which may cause organizations to see an increase in IT costs and a decrease in employee productivity when implementing Netmail.

Feature Comparison

Feature	Netmail	Micro Focus® Retain™ Unified Archiving
Email Archiving	Exchange, Office 365, GroupWise®	Simultaneous mixed-environment archiving of Exchange, Office 365, Gmail, IBM Notes, Bloomberg Professional, and GroupWise, as well as instant messaging archiving for Skype for Business.
Social Media Archiving	N/A	Archiving support of Facebook, Twitter, YouTube, LinkedIn, Instagram, Vimeo, Flickr, Pinterest, and Google+
Mobile Device Archiving	N/A	Archives mobile device communication data for BlackBerry, Android, and iOS.
Export Support	Exports XML, PST, PDF	Exports PDF, PST, Standalone archive viewer, and complete archive export publisher
End User Access	End user access and search via Outlook and Outlook Plugin	End user access and search via Outlook, OWA, GroupWise Client, Offline Archive Viewer, Retain Archive Mobile App, and Web Access Archive Viewer. End users can restore email to live mailbox.
Search Capabilities	Search across email headers, subject line, message body files, and attachment file names only	Central "Google like" search of all email headers, subject line, message body, attachments, files, and appointments, in addition to social media messages and mobile communication. Search includes keyword search and REGEX terms.
Intelligent, Granular Archiving	N/A	Retain Unified Archiving archives data from Exchange intelligently by storing a single instance of each message and/or attachment, saving valuable disk space and increasing performance. Retain Unified Archiving takes advantage of the Microsoft Recoverable Items Folder, or by using EWS impersonation.
Offline Archive Viewer	Offers "Netmail Lite" for offline viewing	Users can browse and search the Retain Unified Archiving archive without access to the web with the Offline Archive Viewer.
Archive Mobile App	N/A	The Archive Mobile App provides users and administrators direct access to view, browse, search, forward, and print their Retain Mobile Archived messages from any Android or iOS mobile device or tablet.

Feature Comparison (continued)

Feature	Netmail	Retain Unified Archiving
Built-in eDiscovery, Litigation and Case Management	Litigation hold with limited eDiscovery tools. Secondary archive recommended for full legal case assessment	Retain Unified Archiving features built-in litigation support tools for performing eDiscovery, searching, placing litigation holds, redaction, printing, and forwarding.
Litigation Hold	Litigation hold with limited eDiscovery tools. Secondary archive recommended for full legal case assessment	Any mailbox held for litigation can be handed over to the legal team or a Compliance Officer for review where data can be discovered, exported, redacted, and converted to PDF or PST.
Mailbox Hold	Mailbox and individual message holds	Any mailbox held for litigation can be handed over to the legal team or a Compliance Officer for review where data can be discovered, exported, redacted, and converted to PDF or PST.
Email Migrations	GroupWise, Exchange, Office 365	Retain Email archives messaging data in a platform agnostic format, making it easy to migrate to a new email system. Migrate to GroupWise, Office 365, Exchange, or Gmail.
Archive Migrations	McAfee SaaS Archiving, MXLogic, EMC SourceOne, EMC EmailXtender, Mimosa NearPoint, Micro Focus Retain, HP Autonomy, Zantas EAS, and Symantec Enterprise Vault	Retain Unified Archiving can migrate from the following existing archives: AXS-One, Barracuda, CAMM/Assentor/ACA, Commvault, EAS, Email Xtender, Enterprise Vault, GFI, Google Gmail, Google Postini/MBOX File Conversion, Google Vault, IAP/RISS, Mail Meter, Microsoft Exchange, Microsoft Exchange Archives, Exchange Online, Office 365, Mimosa Nearpoint, Outlook PST, Proofpoint, Dell/Quest Archive Manager, Source One, ZL (ZipLip) Technologies, Zantac EAS, and EMC.
Built-in Smart, Confidential and Rule-based Tagging	N/A	Administrators and end users can create custom tags for messages within the archive. Auditors, administrators, and other authorized users can mark archived messages as confidential. These marked messages can only be viewed or searched by users with granted rights.
Email Tagging	Limited manual tagging only	Messages can be marked as confidential or tagged while being archived. These messages are automatically tagged while being archived according to set criteria, including regular expressions.

Retain Unified Archiving provides unified archiving of all business communication including email, social media, and mobile communication data for case assessment, search, and eDiscovery. It can be deployed on-premises or in the cloud, and provides the tools organizations need to ensure communication data is securely archived, and risk for data loss and compliance violations are mitigated. With the Retain Unified Archiving central archive, organizations only need one solution for archiving, searching, and performing eDiscovery of all electronic communication.
