

# Smoothly Migrate ALM/Quality Center and LoadRunner Enterprise to the Cloud

Smoothly migrate your ALM/Quality Center and LoadRunner Enterprise on-premises instances to the cloud with confidence.

## Executive Summary

Are you considering moving your on-premises Micro Focus ALM/Quality Center or LoadRunner Enterprise solution to the cloud? Micro Focus Professional Services can help you smoothly move to our software as a service (SaaS), our enterprise cloud solution, quickly and with confidence. Our on-premises to cloud migration service will assist you to:

- **Migrate smartly:** Our strategic services help you assess what is the right cloud approach for your organization.
- **Accelerate your migration:** We understand SaaS and can help you move faster.
- **Have migration assurance:** We have the knowledge and skills to help you move safely and with confidence.
- **Understand the new way of working:** We will help you adjust your practices and understand the solution differences.
- **Accelerate adoption:** We assist with accelerating usage and adoption of SaaS capabilities.

## About ALM/Quality Center

Application Lifecycle Management (ALM) empowers organizations to manage the core application lifecycle, from requirements through deployment. It grants application teams the crucial visibility and collaboration needed for predictable, repeatable, and adaptable delivery of modern applications. Explore more about ALM/Quality Center [here](#).

## About LoadRunner Enterprise

LoadRunner Enterprise is a cross-enterprise tool for planning and running multiple

performance test projects. It enables you to remotely monitor concurrent tests across different geographic locations. Explore more about LoadRunner Enterprise [here](#).

## ALM/Quality Center and LoadRunner Enterprise On-Premises Migration to SaaS Service

This service helps you to rapidly transition from ALM/Quality Center or LoadRunner Enterprise on-premises to cloud. Professional Services consultants assess your current solution, architect your migration, and then help you adapt to the new platform.

## Six Steps That Help You Move to the Cloud

Our consultants run the migration from start to finish and ensure that you successfully transition and adopt the SaaS platform.

- 1. Evaluate how cloud migration benefits your organization:** Experts work with you to help you evaluate the benefits of moving your ALM/Quality Center or LoadRunner Enterprise on-premises to SaaS. You receive a personalized migration scheme to help you plan for a successful migration to SaaS.
- 2. Build a customized migration map and timeline:** Our consultants assess the current-state environment to ensure a smooth migration from the on-premises solution to cloud. This includes a detailed plan of the migration, testing to be done, mentoring, and tasks for all involved participants.
- 3. Perform a trial run:** Our consultants work to move solution data and metadata to the SaaS environment to meet your expectations. This includes upgrading your data to match the SaaS environment and validating the data prior to moving to a production version.
- 4. Transition all assets to the cloud:** Once the environment and data are ready and validated, we move your assets to the SaaS environment. This includes moving and configuring existing out-of-the-box integrations to supported Micro Focus and third-party applications.
- 5. Educate users:** Our team provides mentoring for the new SaaS solution, including a new features walkthrough, administration and configuration options, maintenance, and operations. You'll be ready to start using your new cloud platform and to take advantage of your new way of working.
- 6. Solve any problems before using the platform:** While the transition occurs and we are coaching your team to adopt the new platform, we will be working to ensure that any problems are resolved before your formal transition is completed. Our consultants have years of experience upgrading and migrating customers to the latest versions of ALM/Quality Center and LoadRunner Enterprise and will ensure a seamless and smooth migration.
