Figure 1: Stages of learning
Fortify offers a comprehensive curriculum of software security training courses to help you gain a high level of application security awareness and proficiency with your Fortify products. Whether your staff members are new to Fortify solutions or wish to increase their knowledge in specific areas, Fortify training services can deliver just the right learning experience.

A Full Spectrum of Software Security Courses
Fortify combines instructor-led TeamStart Workshops with self-paced eLearning courses to provide a comprehensive education program for your application development teams.

Three Steps to Software Security Expertise for Your Teams
Fortify recommends a simple yet comprehensive three-step approach to educating your security, development, and testing teams on software security issues and the effective use of Fortify:

- Establish a fundamental software security capability within an organization using Software Security Assurance eLearning Courses.
- Have your developers and security teams participate in TeamStart Workshops to learn ways to automate software security processes, such as vulnerability detection and Static Code analysis, using Security Fortify.
- Leverage Fortify Product eLearning Courses to maximize retention of the TeamStart content and to support scalability to new team members.

Fortify comprehensive security consulting, product services, training, and certification programs have been developed from more than 800 customer engagements with enterprises and government organizations around the world. When you put Security Fortify on your team, you can leverage this hands-on experience, along with the industry’s most advanced expertise and technology, to accelerate your software security efforts.

About Micro Focus Security
Micro Focus is a leading provider of security and compliance solutions for the modern enterprise that wants to mitigate risk in their hybrid environment and defend against advanced threats. Based on market-leading products from Micro Focus ArcSight, Fortify, and Micro Focus Data Security, the Micro Focus Security Intelligence Platform uniquely delivers the advanced correlation and analytics, application protection, and data security to protect today’s hybrid IT infrastructure from sophisticated cyber threats.

Micro Focus Security Products
