How to Find Your Open Enterprise Server (OES) Version

Use this guide to help find which version of Open Enterprise Server you are using.
**Method 1**

Go to the Welcome page on OES server:

```
http://<Hostname/ip_address>/welcome/
```

The installed version can be seen on the top. Please refer to the version marked within the red box in the below screenshot.

---

**Method 2**

1. Log in to server console and execute the below command:

   ```
   # cat /etc/novell-release
   ```

   Open Enterprise Server 2018 (x86_64)
   
   VERSION = 2018.2
   
   PATCHLEVEL = 2

2. From the output,

   - The major version of OES is **2018** ([OpenText™ Open Enterprise Server 2018](https://www.microfocus.com/en-us/products/open-enterprise-server/overview))
   - Patch level or Support pack is **2**
